Foreword

The Summary Statistics report describes police services and crime trends in British Columbia. It is published every year by the Ministry of Attorney General. This edition covers the ten-year period from 1990 to 1999, with emphasis on 1999.

The report summarizes the structure of policing, the type and incidence of criminal activity, the number and distribution of police personnel throughout the province, and the cost of police services. The appendices contain detailed data for individual policing jurisdictions, as well as for the province.

There may be some variance in the data and statistics in this edition of the Summary Statistics report in comparison to previous editions. Where this occurs, the latest edition will reflect the most current data.

More information on police statistics for British Columbia can be obtained from:

Overview of the Structure of Policing in British Columbia

Generally speaking, there are four types of forces that provide police services to the residents of British Columbia: an RCMP provincial force, 59 RCMP municipal forces, 12 independent municipal forces, and four First Nations forces. In addition, the RCMP federal force, the Organized Crime Agency of British Columbia (OCABC), the Canadian National railway police, and the Canadian Pacific railway police also provide law enforcement in B.C.

Municipalities with a population exceeding 5,000 persons are responsible for providing police services to the area within their boundaries. These municipalities may contract with the RCMP to provide municipal policing or may form an independent (non-RCMP) municipal force. The RCMP provincial force polices municipalities with a population below 5,000 persons, as well as unincorporated (usually rural) areas.

The provincial and municipal forces provide police services to specific geographic locations within the province. Either a municipal force or the provincial force polices each area in the province. All policing jurisdictions and their corresponding three-digit police code (or POLCD) are listed at the end of this section.

RCMP Provincial Force

The RCMP provincial force serves unincorporated areas as well as 81 municipalities with populations below 5,000 persons. In 1999, the provincial force had an authorized strength of 1,693 officers. The provincial force consists of 124 provincial force units or detachments and is responsible for providing police services to about 721,600 people.

The cost of the provincial force is shared between the federal and provincial governments under the terms of the Provincial Police Services Agreement. The province pays 70% of the contract costs while the federal government pays the remaining 30%. Municipalities with a population of less than 5,000 do not make a direct contribution toward the provincial police services they receive. However, the rural property tax collected by the province from residents in the unincorporated areas serves to offset, to some degree, the cost of policing rural communities.

The RCMP provincial force detachments are usually named after the municipalities in which the detachment offices are located. The RCMP provincial force detachments serve municipalities with a population of less than 5,000 persons as well as surrounding unincorporated areas. For example, the Oliver RCMP provincial detachment polices the Town of Oliver and rural areas and other communities outside the municipal boundary.

The RCMP provincial force is also responsible for policing unincorporated areas surrounding municipalities that have populations exceeding 5,000 persons. For example, the Kamloops provincial RCMP unit is only responsible for policing areas outside the boundaries of the City of Kamloops (i.e., the City of Kamloops is served by a municipal RCMP force).

Where both municipal and provincial units operate out of the same detachment, the RCMP members from each unit report to one commanding officer to provide police services to the combined provincial and municipal policing areas.

Municipal Police Forces

The Police Act and Municipal Act state that, when the population of a municipality reaches 5,000 persons, it must assume responsibility for its police services. In 1996, there were 67 municipalities with populations exceeding 5,000 persons. This number increased to 71 in 1997 following the release of the 1996 Canada Census.

As previously mentioned, these municipalities may form their own independent police forces or contract with the RCMP for municipal policing services. As discussed below, 12 municipalities have their own police departments, while 59 contract with the RCMP for municipal police services.

Independent Municipal Forces

Currently, 12 municipalities in British Columbia have formed their own police departments. These 12 police departments are often called independent municipal police forces, as they are entirely responsible for their own police services.

The 12 independent municipal forces include Vancouver, Victoria, Saanich, Central Saanich, Esquimalt, Oak Bay, Delta, Abbotsford, New Westminster, West Vancouver, Nelson and Port Moody.

On January 1, 1995, the municipalities of Matsqui and Abbotsford amalgamated into one municipality. Prior to 1995, the RCMP policed Abbotsford and an independent police department policed Matsqui. The new municipality adopted the name of Abbotsford and is policed by the independent Abbotsford Police Department (formerly known as the Matsqui Police Department).

RCMP Municipal Forces

In 1999, there were 59 municipalities with RCMP municipal police services. Each of these municipalities has signed a Municipal Police Unit Agreement with the Attorney General for the provision of RCMP police services to the area within their municipal boundaries. Under this agreement, the cost of policing these municipalities is shared between the municipality and the federal government.

There are two different cost-sharing formulas. Municipalities with populations exceeding 15,000 persons are responsible for 90% of the cost of their police services. Municipalities with populations between 5,000 and 15,000 persons are responsible for 70% of the cost of their police services. The federal government pays the remaining 10% and 30% respectively.

Chronology of New RCMP Municipal Forces (1986–1997)

During the 1980s, eight B.C. municipalities exceeded 5,000 population and became responsible for their policing. Rather than establishing their own police departments, or contracting for municipal police services, the RCMP provincial force extended police services to these municipalities on a fee-for-service basis. The municipalities reimbursed the province for the RCMP provincial force services they received. In 1992, seven of the municipalities with RCMP extended contracts converted to RCMP municipal contracts. The eighth municipality converted in 1994.

The results of the 1991 Canada Census revealed that the population of three municipalities—Sechelt, View Royal and Smithers—had exceeded 5,000 persons. Consequently, these municipalities became responsible for municipal policing in 1992. Two of the municipalities signed RCMP municipal contracts in 1992 and the third signed a contract in 1994.

In 1993, Qualicum Beach expanded its municipal boundaries and its subsequent population exceeded 5,000 persons. Qualicum Beach entered into a contract for RCMP municipal police services during that year.

In 1994, Langford became incorporated as a municipality with a population exceeding 5,000 and signed a RCMP municipal police services contract.

Overall, between 1992 (when seven of eight extended contracts were converted to municipal contracts) and 1994 (when Langford was incorporated as a municipality) the number of RCMP municipal police contracts rose from 43 to 56.

In 1995, the number of RCMP municipal contracts decreased by one contract to 55 following the amalgamation of Abbotsford and Matsqui (see above).

The results of the 1996 Canada Census resulted in five municipalities—Hope, Ladysmith, Lake Country, Spallumcheen and Whistler—becoming responsible for providing municipal police services. Consequently, the number of RCMP municipal contracts increased to 60. However, the results of the 1996 Canada Census also revealed that the population of Fernie had dropped below 5,000 persons. Subsequently, Fernie reverted to a provincial detachment, and the total number of RCMP municipal contracts fell to 59.

First Nations Policing

The First Nations Policing Policy, announced in June of 1991 by the federal government, gives First Nations communities the opportunity to participate with provincial and federal governments in the development of dedicated policing services in their communities. First Nations communities may choose to develop and administer their own policing service, or they may choose a police service delivered by a contingent of First Nations RCMP officers working within the RCMP provincial force. The First Nations Policing Policy is designed to give First Nations communities greater control over the delivery and management of policing services in their communities.

First Nations Community Policing Services (FNCPS)

There are 36 RCMP officers working out of 21 RCMP detachments who are part of the First Nations Community Policing Services (FNCPS) and three RCMP officers are employed as Program Coordinators/ Policy Analysts in Aboriginal Policing Services at Vancouver, Kamloops and Prince George District Headquarters. These officers serve many aboriginal communities. The FNCPS was formed under a tripartite agreement between the province, the federal government and the participating Bands. The province's share of funding the FNCPS is 48% and the federal share is 52%. The program represents an enhancement to the RCMP provincial police service.

Community Constable Program (ACCP)

In those communities where a tripartite agreement has not yet been signed, the RCMP continues to operate its Aboriginal Community Constable Program (ACCP). Under the ACCP, there are 32 First Nations officers who work out of 25 RCMP detachments and serve a number of aboriginal communities. The province pays 54% and the federal government pays 46% of this cost-shared program.

First Nations Administered Police Services (FNAPS)

There are four First Nations Administered Policing Services (FNAPS) in British Columbia including Stl'atl'imx Tribal Police, Kitasoo-Xaixais Public Safety Department, Ditidaht First Nation Public Safety and Policing Service and Tsewultun Police Service. These police services are modelled on the independent municipal police departments, with governance provided by a police board selected from the communities served. Police officers selected by the police boards are either experienced officers or recruits trained at the Police Academy at the Justice Institute of B.C. All officers are appointed under the Police Act.

Overview of Crime Data Collection Procedures in British Columbia

Every police department within British Columbia participates in the Uniform Crime Reporting (UCR) Survey. Managed nationally by the Canadian Centre for Justice Statistics (CCJS), the UCR Survey forms the basis of crime data collection within the province and across the country. The UCR Survey is designed to collect aggregate data on the incidence of crime. It apportions a criminal incident into three major components including the most serious offence (MSO) within the incident (by type and number of), clearance (by charge or other means) and persons charged in connection with the offence (by gender and adult/youth).

Statistics Canada, in co-operation with the Canadian Association of Chiefs of Police, developed the UCR data collection system. Although some details of the UCR Survey have been modified since its implementation in 1962, the fundamental aspects of the UCR Survey have remained fairly constant since that time. This publication contains UCR data for the last ten years, 1990 to 1999.

In addition to the UCR Survey, the Ministry of Attorney General receives more detailed data on specific crime categories such as homicide, sexual assault and spousal assault. These data are collected from three separate, but related, databases including the Operational Statistics Reporting (OSR) System, the UCRII database and the Homicide database.

The Uniform Crime Reporting (UCR) Survey

Provincially, UCR aggregate data are stored in the Police Management Information System (PMIS) maintained by Police Services Division (PSD). The PMIS contains data from 1977 onward. The data are updated monthly and quarterly.

Policing jurisdictions in B.C. perform periodic reviews or audits to ensure their crime data are recorded accurately. PSD also monitors this data to identify any discrepancies. As a result, the UCR data contained in this report are considered to accurately represent B.C.'s crime trends.

The collection, analysis and explanation of crime data can be complex due to the diverse ways in which the data can be examined. Different data collection systems produce different findings of the same series of events because the data reflect the definitions that are used and the manner in which information is gathered.

The UCR Survey records police-reported crime data. As such, UCR data contains only information on those crimes that come to the attention of the police and are reported by the police. UCR crime data does not contain a count of all crimes in B.C. Some crimes are never detected, and some that are detected are never brought to the attention of the police; consequently, the UCR Survey can never record all criminal events.

Victimization surveys provide data that is complementary to UCR data. These surveys are generally conducted by telephone and involve questions concerning the victimization of respondents. Victimization surveys contain information on a greater number of criminal incidents than the UCR data because victims are asked to describe both incidents they reported to the police and incidents they did not report. Victimization surveys contain methodological features that preclude information on such crimes as homicide and kidnapping, as well as "victimless crimes" (i.e., prostitution and drug offences), crimes committed against commercial or public property, and crimes committed against persons under sixteen years of age.

UCR Survey Rules

The police occurrence report forms the basis of data collection for the UCR Survey. There are standard rules for counting incidents, persons charged and clearance data under the UCR Survey. A review of the most basic UCR Survey rules, and the ramifications of each, are discussed below.

Unfounded Incidents

Reported offences (crimes reported by citizens to the police or crimes otherwise detected by police) are subject to a preliminary investigation by the police to determine the validity of the report. On occasion, a reported offence may not have actually occurred. For example, a vehicle that is reported stolen may turn out to have been borrowed by a family member. These incidents are considered "unfounded" and are subtracted from the number of reported offences to produce the number of actual offences.

In this publication, the number of offences always refers to actual rather than reported offences.

Number of Offences

The total number of UCR offences is not a census of all crimes that are reported by the police. This occurs for two reasons. First, under the UCR Survey, most violent crimes (i.e., attempted murder and homicide, sexual offences, non-sexual assault, abduction) are scored differently from property and "other" crimes (i.e., prostitution, arson, and vandalism, among others). The number of violent offences recorded is equal to the number of victims involved in an incident of violent crime. For example, when one person murders three people, three offences are recorded, whereas when three people murder one person, only one offence is recorded. For all property crimes, other crimes, and the violent crime of robbery, the total number of offences recorded is equal to the number of distinct or separate incidents. For example, in an incident where several vehicles parked in one block are spray-painted with paint from the same spray can, only one incident of vandalism is reported.

The second reason that the total number of UCR offences does not represent the total of all crime reported by the police occurs as a result of the "most serious offence" (MSO) rule. The MSO rule stipulates that where a single criminal incident contains a number of violations of the law, then only the most serious one is recorded for UCR purposes. There are standard rules for determining the most serious offence where crimes in the same incident are of a similar severity. The application of the MSO rule tends to underestimate the true incidence of relatively less serious crimes that come to the attention of the police because these crimes are counted only when they do not occur in conjunction with a more serious crime in the same incident.

In short, the total number of UCR offences represents the number of victims of violent crimes plus the number of separate incidents of property and other crimes.

Clearance

When the police have identified at least one offender in relation to an offence and have sufficient evidence to solve the offence, a Report to Crown Counsel (RCC) recommending charges is completed and forwarded to the local Crown counsel office. Once an RCC is forwarded, the police consider the incident to be cleared by charge and this status is reported in the UCR Survey. This occurs even if the police have not yet apprehended the accused.

In some instances, the police identify an offender and have enough evidence to support a charge but do not recommend charges. Such offences are reported in the UCR Survey as "cleared otherwise"—that is, cleared other than by recommending charges to Crown. Offences are cleared otherwise in specific situations such as the offender is under the age of 12, the victim is uncooperative, the offender has diplomatic immunity, or the offender has been sentenced for other crimes.

Persons Charged

When an offence is cleared by charge, the number of persons recommended for charge by the police is recorded in the UCR Survey. These persons are categorized according to gender and age (adult vs. youth).

The UCR Survey reporting rules dictate that offenders who are simultaneously recommended for charge on more than one offence are counted only once against the most serious offence. In addition, offenders are counted each time the police recommend charges against them (for separate incidents). Consequently, the persons charged data represents a count of the number of persons for whom charges were recommended, rather than a count of the number of separate individuals recommended for charge. As a result, the correlation of persons-charged data with court data is difficult because the UCR Survey does not contain information regarding the total number of recommended charges.

Time Lapse

UCR data are reported monthly by each of the reporting police departments and are available on this basis to interested users. Incidents are recorded in the UCR Survey against the months in which they came to the attention of police, regardless of when the incidents actually occurred. A criminal incident may be solved weeks or months after the incident is recorded in the UCR Survey. Consequently, a one-to-one relationship does not exist between the number of actual offences and the number of cleared offences in any given time frame.

Other Crime Databases

Operational Statistics Reporting (OSR) System

The Operational Statistics Reporting (OSR) System operates within the Police Information Retrieval System (PIRS) and is primarily utilized by the RCMP. The OSR is an incident-based database that stores more detailed information concerning criminal events including characteristics of the accused, victim and offence. In addition, the OSR permits the collection of special survey statistics within the province. For example, these special survey codes are used to identify cases involving spousal assault or child abuse.

Because the OSR contains three of the basic elements of the UCR Survey (i.e., MSO, clearance and persons charged), UCR aggregate data can be extracted from the OSR.

Uniform Crime Reporting II (UCRII) Survey

The UCRII Survey represents an expansion of the UCR Survey. It captures data at the incident level (similar to the OSR) as well as at the accused and victim levels. Examples of the data captured in the UCRII include detailed crime information (i.e., modus operandi, value of property lost), detailed accused information (i.e., date of birth, charges) and detailed victim information (i.e., date of birth, degree of injury and relationship between the victim and the accused).

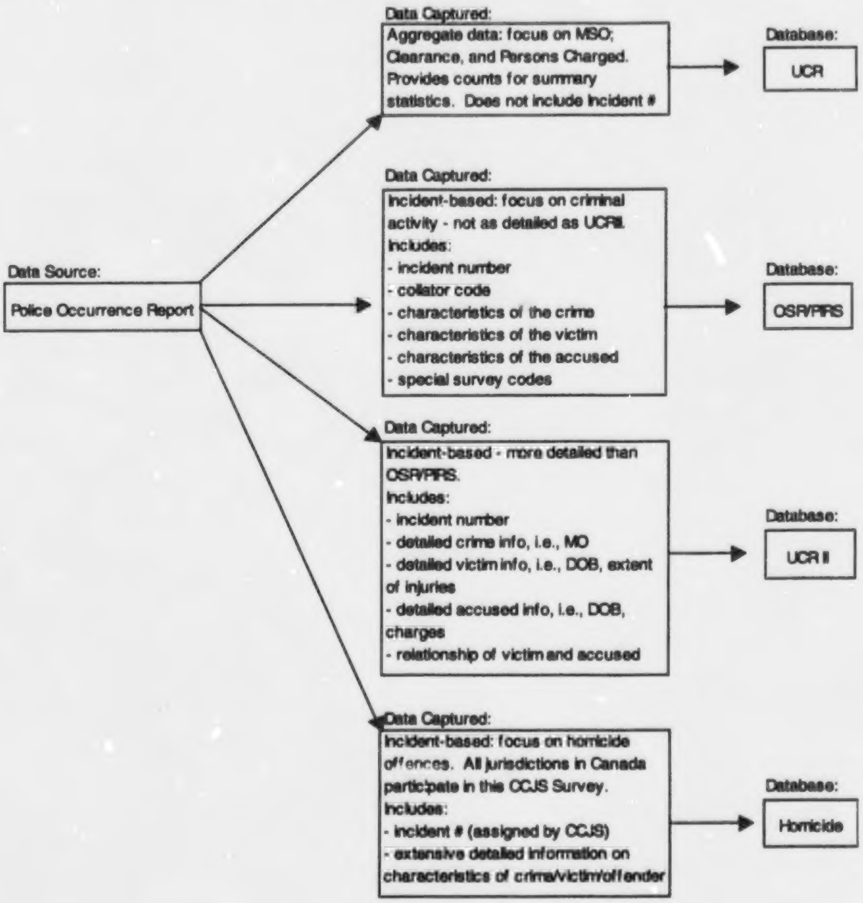
Over 150 jurisdictions in Canada participate in the UCRII Survey. The Vancouver Police Department (VPD) is the only police force in B.C. that currently contributes to the UCRII. Plans are currently underway for the implementation of a common integrated record system for all police agencies in the province.

Because the UCRII contains three of the basic elements of the UCR Survey (i.e., MSO, clearance and persons charged), UCR aggregate data can be extracted from specific UCRII fields at the incident and accused levels.

The Homicide Survey

All jurisdictions in Canada participate in the national Homicide Survey. Police agencies are required to complete a detailed survey questionnaire for each homicide they report. Aspects of the incident, including characteristics of the victim and accused, are recorded. The Homicide Survey database is administered and updated by the CCJS, and provided to PSD on an annual basis. The Homicide Survey data supersede the UCR Survey homicide data.

Chart 1: Sources of Crime Data in British Columbia



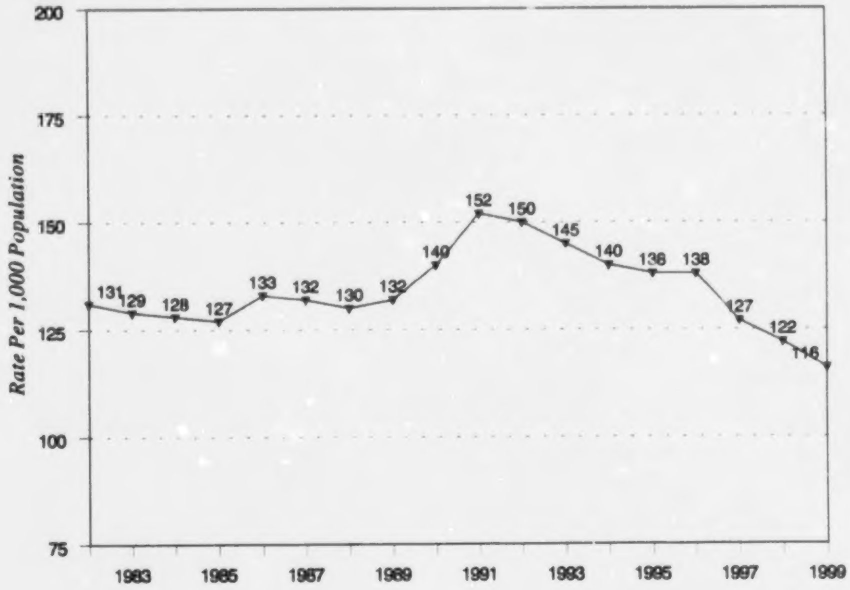
Data Source:
Police Occurrence Report
Data Captured:
Aggregate data: focus on MSO; Clearance, and Persons Charged. Provides counts for summary statistics. Does not include Incident #
Database:
UCR
Data Captured:
Incident-based: focus on criminal activity - not as detailed as UCRII.
Includes:
- incident number
- collator code
- characteristics of the crime
- characteristics of the victim
- characteristics of the accused
- special survey codes
Database:
OSR/PIRS
Data Captured:
Incident-based - more detailed than OSR/PIRS.
Includes:
- incident number
- detailed crime info, i.e., MO
- detailed victim info, i.e., DOB, extent of injuries
- detailed accused info, i.e., DOB, charges
- relationship of victim and accused
Database:
UCR II
Data Captured:
Incident-based: focus on homicide offences. All jurisdictions in Canada participate in this CCJS Survey.
Includes:
- incident # (assigned by CCJS)
- extensive detailed information on characteristics of crime/victim/offender
Database:
Homicide

CHAPTER 1

Crime in British Columbia: A Summary

In 1999, there were 467,400 (non-traffic) crimes reported in British Columbia. This is 19,700 or 4% less than the number of crimes reported in 1998. The 1999 crime rate was 116 crimes per 1,000 population, a decrease of 5% from the 1998 crime rate of 122 crimes per 1,000 population.

Figure 1: British Columbia Crime Rate, 1982 to 1999.



British Columbia's crime rate has been on a downward trend since 1991. Several theories have been proposed for the decrease, but fluctuations in the incidence of criminal activity are not easily explained or understood.

Many factors influence the reporting of crimes to the police. For instance, policy decisions or legislative changes that affect police enforcement practices may impact the reporting of some types of crimes. Factors such as age, gender, level of income and education of either the victim or offender may also affect reporting. In addition, it has been suggested that population density and changes in public attitude may contribute to fluctuations in the reporting of certain types of crime.

Other factors have likely had an impact on the number of crimes committed. Overall decreases in the crime rate have been reported around the world in recent years. Many theories have been put forth to explain these declines. The most popular theory is based on demographics (i.e., a drop in the proportion of young males aged 15 to 24 in the population has resulted in a corresponding decline in the crime rates). Other explanations include the move toward community-based policing (i.e., informal methods of resolving conflict lead to fewer crimes being reported), declining police budgets, and aggressive law enforcement practices.

It is unlikely that a single factor or theory accounts for recent declines in the crime rate. More likely, a combination of factors accounts for this downward trend.

This chapter provides a brief description of the number and types of Criminal Code offences, municipal and provincial crime rates, the number of crimes solved, and the number of persons charged in British Columbia. At the end of the chapter there is a discussion of youth crime.

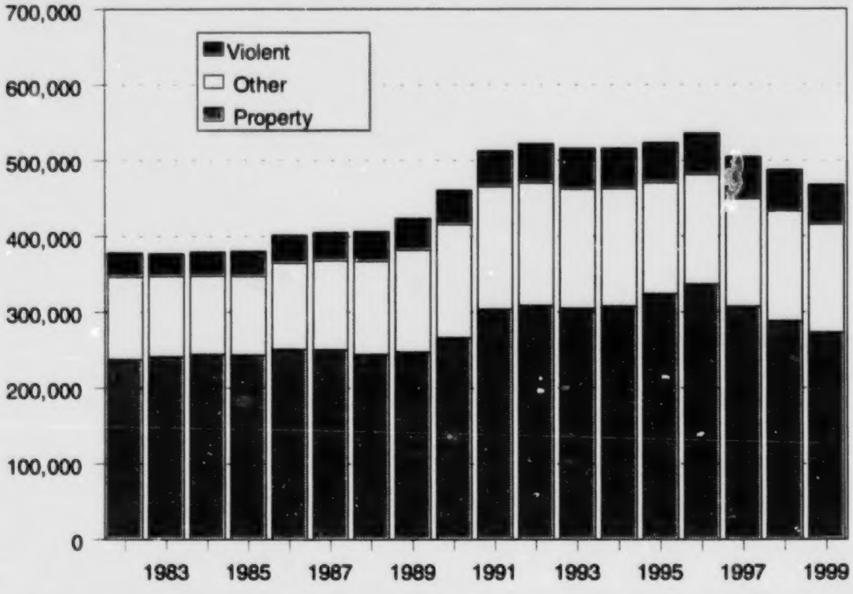
In Chapters 2, 3 and 4, the characteristics and trends of various Criminal Code offences are discussed in more detail. In Chapters 5 and 6, those offences arising from federal drug statutes, and Criminal Code and provincial traffic statutes are discussed.

In 1999 there were 467,400 reported Criminal Code offences, 19,700 fewer than reported in 1998.

Criminal Code Offences

Criminal Code offences are divided into three major categories: crimes against persons (or violent crimes), crimes against property and other crimes.

Figure 2: Number of Crimes by Category, 1982 to 1999.



These Criminal Code categories do not include drug offences or offences under other federal statutes such as the Customs Act or the Canada Shipping Act. They also do not include offences under provincial statutes such as the Liquor Control and Licensing Act or the Securities Act, nor do they include Criminal Code traffic offences, provincial and municipal traffic offences, or other municipal by-law infractions.

In 1999, there were 467,400 Criminal Code offences reported, 19,700 or 4% less than in 1998. In 1998 there were 487,100 crimes reported, 17,300 or 3% less than in 1997. In 1997 there were 504,400 crimes reported, 31,400 (6%) less than in 1996.

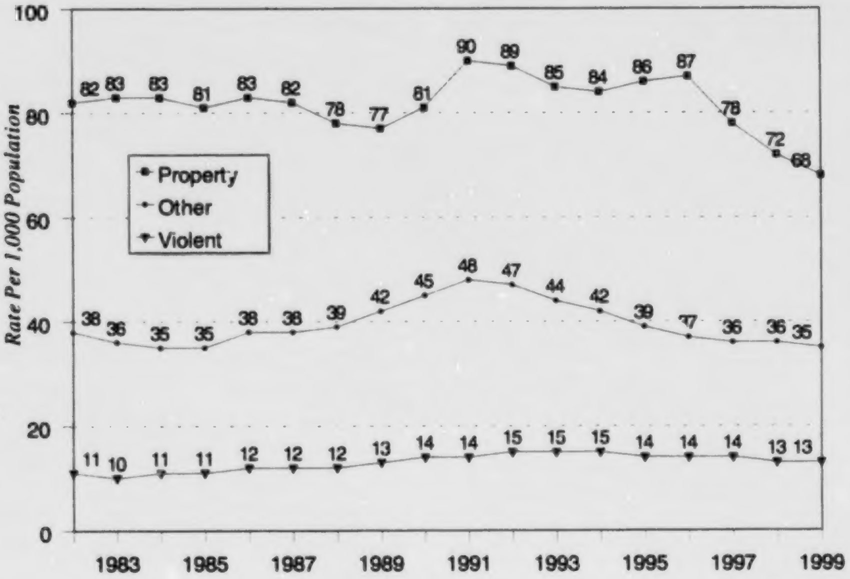
In 1999, crimes against persons (violent offences) represented 11% of all Criminal Code offences; crimes against property accounted for 58%; while the remaining 31% were other crimes. These proportions have remained about the same over the last decade.

Crime Rate

The crime rate is the number of Criminal Code offences reported for every 1,000 people. It is often a better measure of trends in crime than the actual number of offences because it allows for population growth. B.C.'s crime rate in 1999 is 116 reported Criminal Code offences per 1,000 people, 5% less than in 1998.

The B.C. crime rate fell by 5% in 1999. Overall, B.C.'s crime rate has declined 24% since 1991.

Figure 3: British Columbia Crime Rate by Category, 1982 to 1999.



After peaking at a high of 152 Criminal Code offences per 1,000 persons in 1991, B.C.'s crime rate has been decreasing over the last number of years (see Figure 1). In addition to the 5% reduction reported in 1999, E.C.'s crime rate also fell 12% between 1996 and 1998, and decreased another 8% between 1992 and 1996. In total, B.C.'s crime rate has declined 24% since 1991. The 1999 crime rate is the lowest reported in nearly 20 years. However, despite these recent declines, B.C.'s crime rate is still higher now than it was during the 1970s.

Fluctuations in the crime rate are quite often the result of changes in the number of property crimes. As shown in Figures 2 and 3, property offences have a major impact on the crime rate as they account for approximately 60% of total reported crime. The property crime rate declined 6% between 1998 and 1999.

British Columbia's crime rate is traditionally higher than the national average. It is also higher than other provinces. Crime rates tend to increase from east to west; crime rates in the Atlantic provinces are generally lower than in Quebec and Ontario, which in turn are lower than rates in the Western provinces. There is no satisfactory explanation for this phenomenon.

Although B.C.'s crime rate is historically higher than the rest of the country, trends detected in the national crime rate data are frequently parallelled in B.C. (Please note this report does not include comparisons with other provinces. National data are available from the Canadian Centre for Justice Statistics, Statistics Canada.)

It is important to keep in mind that the crime data included in this publication are limited to those crimes reported to or by the police. Victimization surveys indicate that a substantial number of crimes are never reported to the police.

More often than not, a high crime rate indicates that a municipality is a core city or tourist destination.

Municipal Crime Rates

In 1999, as in most years, municipal crime rates (the number of crimes per 1,000 resident population in a particular municipality) ranged from a low of 40 to a high of 232 Criminal Code offences per 1,000 population. The average crime rate for municipalities in British Columbia in 1999 was 116 crimes per 1,000 population, the lowest it has been in more than ten years.

Municipal crime rates do not necessarily reflect the relative safety of one municipality over another. More often than not, a high crime rate indicates that a municipality is a core city or tourist destination. Unincorporated areas or other municipalities that have significant residential populations usually surround core cities. Core cities are also the business and entertainment centres for many people who reside outside, as well as inside, the municipality. Core cities may also have a large "part-time" population relative to the resident population. Part-time residents include tourists, cottage or chalet owners, students or seasonal staff.

The municipal crime rate is based on the resident population of a municipality that excludes commuters, students, tourists and other part-time residents. If a person from outside a municipal boundary enters and commits a crime or becomes a victim of crime, that crime is attributed to the municipality. Since the person does not reside within the municipality, he or she is not included in the municipal resident population. Consequently, core cities and tourist destinations often have higher than average crime rates. Examples of core cities include Vancouver, Victoria, Williams Lake, Courtenay and Whistler.

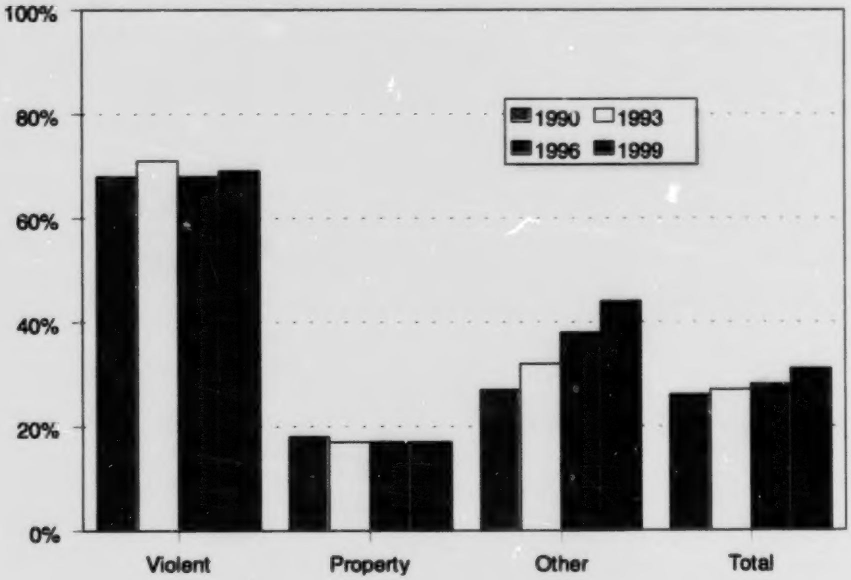
If core cities expanded their boundaries to include residential areas outside their borders, the crime rate for the combined populated area would be considerably lower than the municipality itself. Similarly, if tourist destinations included part-time residents in their population base, their crime rates would be substantially lower.

Although municipal crime rates cannot be used to measure the relative safety of one location over another, they can be used as an indication of the trend in crime in each municipality. If two municipalities share similar characteristics, comparing their actual crime rates may be valid. However, these comparisons should be made with a great deal of caution.

Crimes Cleared (Solved)

When police solve an offence, they record that it has been cleared by charge or cleared by other means. An offence is cleared by charge when the police file a Report to Crown Counsel (RCC) recommending charges. An offence is cleared by other means when the police have identified an offender and have enough evidence to support a charge, but for a variety of reasons do not recommend a charge. Offences are cleared otherwise in specific situations such as the offender was under 12 years of age, the victim was uncooperative, in a case of diplomatic immunity, or the offender was previously sentenced.

Figure 4: Percentage of Crimes Cleared 1990, 1993, 1996 and 1999.



In 1999, police solved (cleared) 31% of all reported Criminal Code offences.

In 1999, 31% of all reported Criminal Code offences were cleared (solved). Approximately 16% were cleared by charge, and 15% were cleared by other means. The remaining 69% of offences remain unsolved.

The clearance rate is the number of crimes solved by police as a percentage of the number of crimes reported to police. There is a considerable difference in the clearance rates for violent crimes compared with property and other crimes. In 1999, 69% of violent crimes were cleared as opposed to only 17% of property crimes and 44% of other crimes.

From 1990 to 1999, the percentage of violent crimes cleared has remained about the same, ranging between 68% and 71%.

The clearance rate for property crimes declined from 18% in 1990 to 17% in 1993 and has remained at 17% during the past seven years.

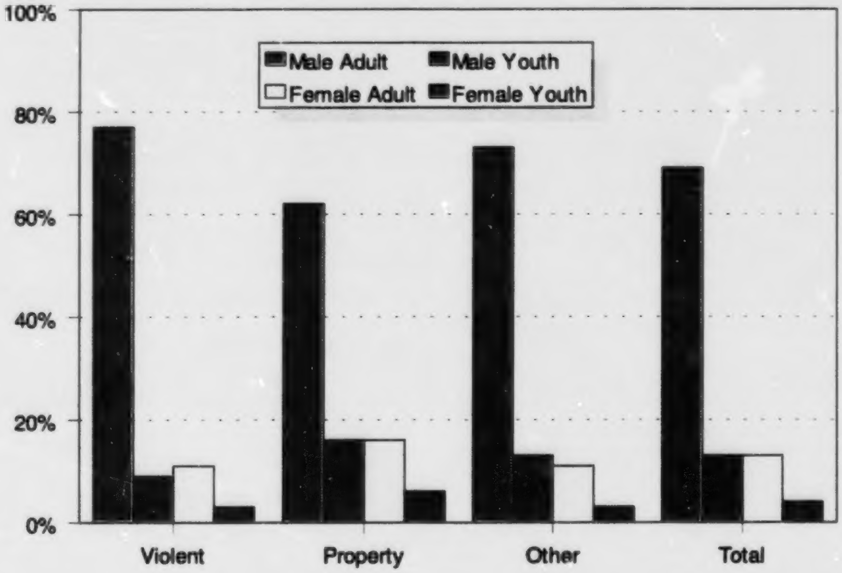
Clearance rates for other crimes have steadily increased from a low of 27% in 1990 and 1991 to a high of 44% in 1999. The increase in clearance rates for other crimes is in part a result of a decrease in the number of mischief and property damage offences. These offences traditionally have low clearance rates. Since 1991, the proportion of other crimes comprising mischief and property damage offences has dropped 23% (i.e., in 1991 these offences comprised 63% of all other crimes, whereas, in 1999 mischief and property damage offences comprise only 39% of all other crimes). Consequently, as the number of mischief and property damage offences (with traditionally low clearance rates) has decreased, the clearance rate for other crimes as a whole has increased.

Persons Charged

In 1999, of the 68,500 persons recommended for charge, 83% were adults and 17% were young offenders.

In 1999, the police reported that 68,500 persons were charged with Criminal Code offences in British Columbia. Since Crown Counsel determines whether a charge will be laid, this figure actually represents the number of persons recommended for charge by the police.

Figure 5: Persons Charged in B.C. by Gender and Type of Offence, 1999.



Of the 68,500 persons charged, 21,000 (31%) were charged with crimes of violence, 30,600 (45%) with property crimes, and 17,000 (25%) with other crimes. By comparison, violent crimes represent only 11% of reported crime, property crimes represent 58% of reported crime, and other crimes represent 31% of reported crime.

Persons charged data are divided into four categories: adults, male and female; and youths, male and female. In Canada, a young offender is between 12 and 17 years of age and an adult offender is 18 years and older. In 1999, of the 68,500 persons recommended for charge, 11,700 (17%) were young offenders and 56,800 (83%) were adults.

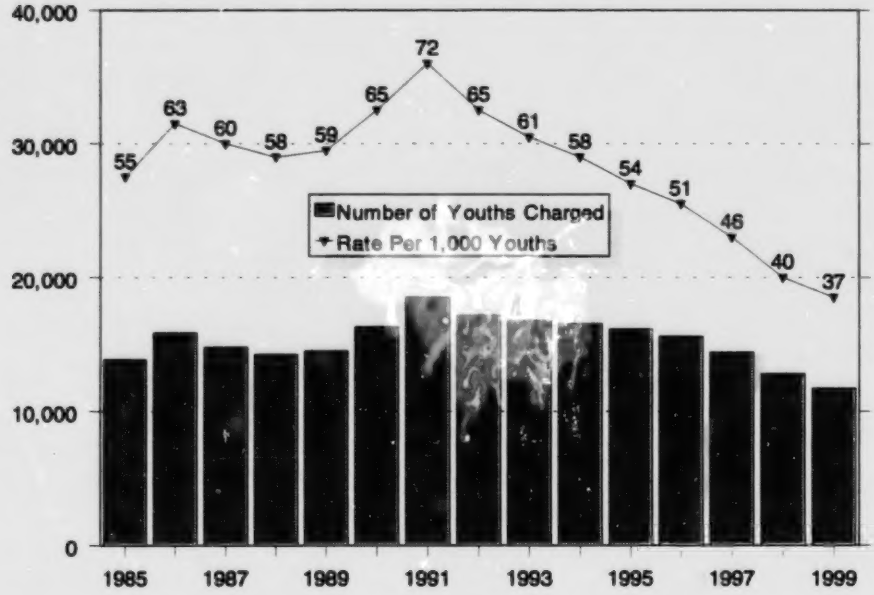
In 1999, approximately 84% of the 56,800 adults charged and 76% of the 11,700 youths charged were male. These proportions have remained constant over the last decade.

In 1999, adults represented 88% of persons charged with violent crimes, 79% of persons charged with property crimes and 84% of persons charged with other Criminal Code offences. Young offenders represented only 12% of persons charged with violent crimes, 21% of persons charged with property crimes and 16% of persons charged with other Criminal Code offences.

Youth Crime

In B.C., as in the rest of Canada, young persons between the ages of 12 and 17 who break the law are subject to the same charges as adults. The difference is that youth are processed under the Young Offenders Act (YOA) which came into effect in 1985.

Figure 6: Youths Charged, Number & Rate, 1985 to 1999.



There is no offence known as youth crime; rather, the determination that an accused person is a young offender is based on the age of the offender at the time the offence was committed.

There is no offence known as youth crime; rather the determination that an accused person is a young offender is based on the age of the offender at the time the offence was committed. The data discussed below are based on the number of youths charged with criminal offences (i.e., the number of youths for whom the police submitted a report to Crown Counsel). Unless the police solve the offence, it is not known whether an adult or youth committed the crime. Therefore, data on youth crime are dependent on the identification of the offender by the police.

Though less than 30% of total reported crimes are solved, it is assumed that youth charged data (the number of Criminal Code charges reported per 1,000 persons between the ages of 12 and 17) provide an indication of trends in youth involvement in crime.

There is a widespread impression across Canada that youth crime – especially violent youth crime – is out of control. This perception is supported by the fact that there was an increase in the number of youth charged from the mid-1980s (after the introduction of the YOA in 1985) until 1991. The media often focus on high profile incidents of youth violence and cite the increase in the youth violent crime charge rate (until 1994) as evidence of an increase in youth crime. Some observers argue that the rise in youth crime is a consequence of the leniency of the YOA.

In 1999, 79% of the criminal offences for which young people were charged were non-violent crimes.

In 1991 the youth charge rate peaked (the violent youth charge rate did not peak until 1994). Since that time, B.C. has experienced a downward trend in youth charge rates. These downward trends are similar to the trends in the overall crime rate at both provincial and national levels. Overall decreases in crime rates are currently being reported around the world.

As mentioned above, detecting the real extent of youth involvement in crime is difficult. Fluctuations in trends in crime data can be influenced by a variety of factors including changes in law, changing levels of community tolerance toward specific types of crime, changing social policy, or changes in charging practices.

Pending Changes to YOA

On March 11, 1999 the federal Minister of Justice introduced the new Youth Criminal Justice Act (YCJA) in the House of Commons. The purpose of the bill is to establish guiding principles to direct the work of judges and other parties in the youth justice system. The YCJA proposes to increase the availability of alternative measures for first-time young offenders who commit minor offences, and to increase the number of violent offences transferred to adult court. The Government of Canada is proposing a major restructuring of the youth justice system. A five to six year implementation phase is being developed to allow cooperation of all levels of government in implementing the new Act.

Youth Crime in 1999

In B.C., there were 11,700 young offenders charged with Criminal Code offences in 1999, 1,100 or 9% less than in 1998. This represents a youth charge rate of 37 charges per 1,000 youths, an overall decrease of 8% from B.C.'s youth charge rate in 1998.

Approximately 79% of the criminal offences for which young people were charged were non-violent crimes (i.e., crimes against property or other Criminal Code offences). The remaining 21% of charges against youth were for violent crimes (crimes against the person).

Youths represented 17% of total persons charged in 1999, compared with 18% in 1998. Youths represented 12% (2,500 of 21,000) of those charged with violent offences; 21% (6,500 of 30,600) of those charged with property offences; and 16% (2,700 of 17,000) of those charged with other Criminal Code offences.

Substantially more male youths are charged with Criminal Code offences than female youths. In 1999, about three-quarters of the youths charged with Criminal Code offences were male. Approximately 84% of adults charged within the same crime categories were male.

Youth Crime Trends

During the last ten years, the total population of B.C. youths has increased by 27% (from 251,000 in 1990 to 318,500 in 1999). During the same time period, the total population of B.C. (adults and youth) has increased by 31%. Consequently, despite an increase in the total number of young people aged 12 through 17 years, the proportion of youths in the province has remained stable at approximately 8% of the total population.

There were 16,300 charges against youths in 1990 compared with 11,700 charges in 1999. In 1999, the overall youth charge rate for B.C. decreased to 37 charges per 1,000 youths, representing an 8% decrease from 1998 and a 49% decrease from 1991 when the youth charge rate peaked at 72 charges per youth.

The youth violent-charge rate has increased steadily since the implementation of the YOA in 1985. It peaked in 1994 at a rate of 11 charges per 1,000 youth. This represented an 83% increase from 1989. B.C. crime data indicate that this peak can be attributed largely to an increase in the number of youths charged with level 1 non-sexual assault (the least serious assault category).

Trends in Total Charges (Youth vs. Adult)

It may seem appropriate to compare youth charge rates with adult charge rates. However, such a comparison is problematic. The population base for youth includes only those persons between the ages of 12 and 17 while the adult population base includes all persons over the age of 17. Generally speaking, male offenders between 18 and 24 years commit the majority of crimes. As such, the adult population figure used in charge rate calculations includes many older people who commit relatively few crimes. This larger population base makes it difficult to provide meaningful comparisons between the charge rates for youths and adults.

However, it is possible to compare the percentage of change in the total numbers of adults and youths charged over time. This allows for the examination of trends in adult and youth charge data.

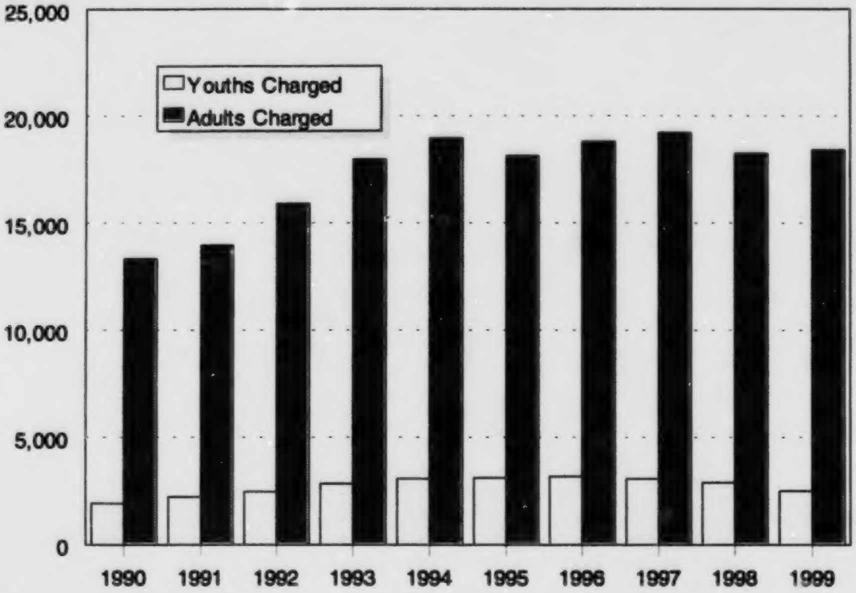
Between 1990 and 1999, the number of youths charged with Criminal Code offences of all types decreased by 28%. By comparison, charges against adults increased by 24% during the same time period. These overall fluctuations are driven by the number of persons charged with property crimes (because property offences comprise the largest proportion of reported Criminal Code offences). Specifically, the number of youths charged with property offences declined by 45% between

Between 1990 and 1999, the number of youths charged with Criminal Code offences of all types decreased by 28%. By comparison, charges against adults increased by 24% during the same time period.

1990 and 1999, while the number of adults charged with property offences rose by 10% during the same time period.

In contrast to declines in the number of persons charged with property crimes, the number of youths and adults charged with other Criminal Code offences increased between 1990 and 1999. The number of youths charged rose by 5%, while the number of adults charged increased 33%.

Figure 7: Persons Charged with Violent Crimes, Adults & Youths, 1990 to 1999.

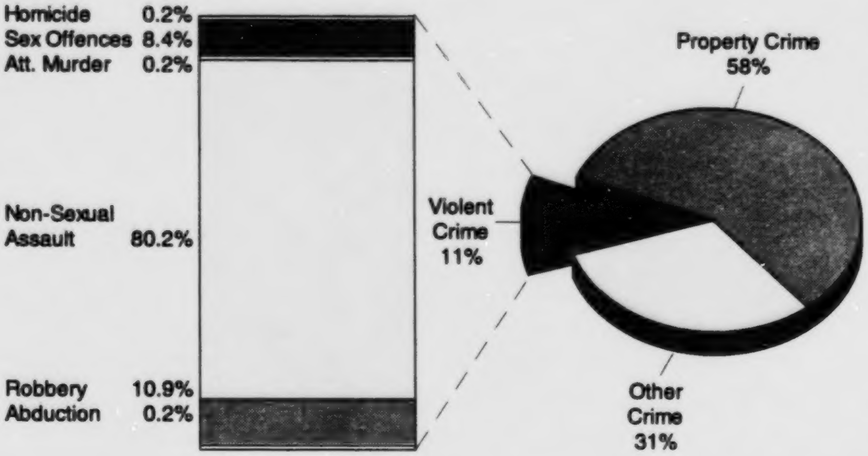


The most dramatic increase in the persons charged data is found in the violent crime category. The number of youths charged with violent offences rose by 30% between 1990 and 1999, while the number of adults charged with violent offences increased by 38%.

Youths charged with violent offences rose by 30% between 1990 and 1999, while the number of adults charged with violent offences increased by 38%.

Violent Crime in British Columbia

Figure 8: Violent Crime by Category, 1999.



Crimes against persons, more commonly called violent crimes, are considered the most serious of the three Criminal Code offence categories. Only 11% of all crime reported during 1999 was categorized as violent. These crimes include homicide, attempted murder, sexual and non-sexual assault, robbery and abduction. Crimes in this category carry the maximum penalty under the law.

Violent Crime in 1999

In 1999, there was a 4% decrease in the number of violent crimes and a corresponding 5% decrease in the violent crime rate (from 13.5 violent crimes per 1,000 population in 1998 to 12.8 violent crimes per 1,000 population in 1999). There were 51,700 violent offences in 1999, 2,200 less than the 54,000 violent offences reported in 1998.

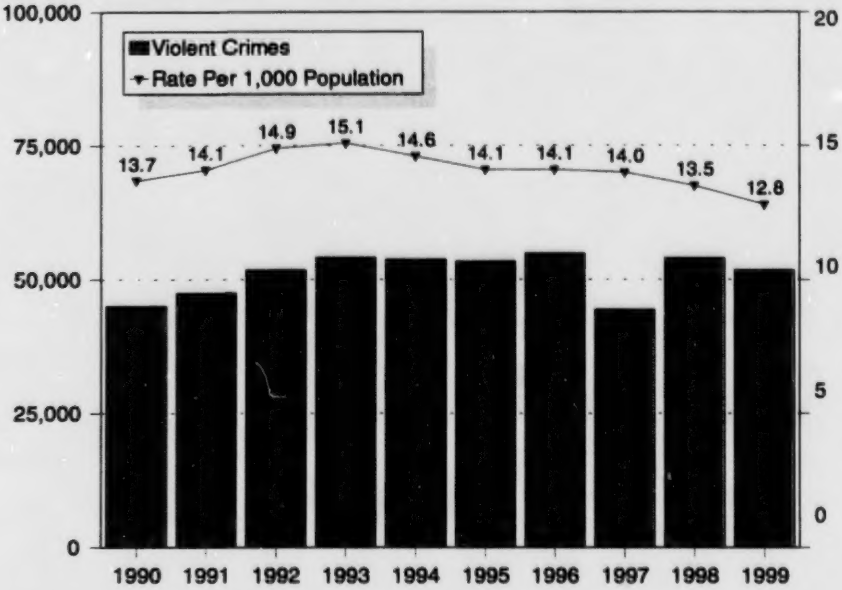
More violent crimes are cleared (solved) than any other type of crime. In 1999, 69% of violent crimes were cleared as opposed to only 17% of property crimes, and 44% of other crimes.

About 88% of those charged were adults (18 years and over) and about 85% of those charged were male.

Violent Crime Trends

Compared with ten years ago, the number of violent crimes is substantially higher. Between 1990 and 1999, the number of violent crimes rose 15%, from 44,900 to 51,700 offences. However, during the same time period there was a decrease in the violent crime rate. It fell from 13.7 violent crimes for every 1,000 persons in 1990, to 12.8 in 1999, an overall decrease of 6%.

Figure 9: Number and Rate of Violent Crimes, 1990 to 1999.



The rise in violent crime is mostly due to the increasing number of level 1 non-sexual assaults.

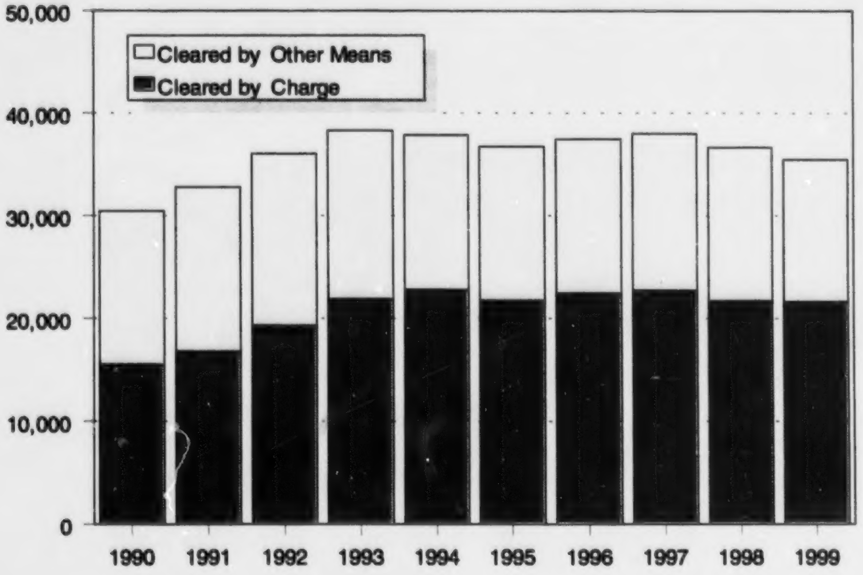
Despite the increase in the number of violent offences, the more serious categories of violent crime, namely homicide, attempted murder, aggravated sexual and aggravated non-sexual assault, showed little or no increase between 1990 and 1999. The rise in violent crime is due to the increasing number of offences in the least serious category of assaults, i.e., level 1 non-sexual assault (assault that does not involve a weapon or serious bodily harm).

Between 1990 and 1999, the number of reported level 1 non-sexual assaults rose from 26,900 to 34,000, an increase of 26%. Moreover, during the last ten years, level 1 assault offences averaged 32,900 offences per year, accounting for approximately two-thirds of all violent crime reported in the province. Consequently, this category of crime drives the violent crime rate. The findings that violent offences make up a small proportion of all Criminal Code offences reported and that level 1 assault is the major crime within the violent crime category are parallelled in the rest of Canada.

It is important to note that recent increases in reported violent offences might be due to factors other than an increase in the number of these crimes being committed. Changes to federal legislation concerning sexual and non-sexual assault have likely had an impact on the reporting of these offences. Under the revised legislation the previous categories of assault and battery were merged into one offence, and the types of assault were reorganized into a three-tiered system of offences based on the seriousness of harm/violence. Moreover, procedural changes to the legislation enhanced the ability of the police to make arrests and recommend charges. Heightened public awareness and reduced tolerance of violence may also have led to increased reporting of violent crimes. Finally, the stigma of being victimized may be less pronounced today than previously. As a result, crimes of violence that occurred in the past are being reported and recorded in the present.

Although the percentage of violent crimes solved has remained around 70% since 1990, a larger proportion of these crimes are now being cleared by charge as opposed to being cleared by other means. The number of persons charged with violent crimes has increased by 37% in the last ten years. In 1999, 20,900 persons were charged with violent offences compared with the 15,200 persons charged in 1990.

Figure 10: Number of Violent Crimes Cleared (Solved), 1990 to 1999.



Increases in reported violent offences may be due to factors other than an increase in the number of these crimes being committed.

Homicide

In Canada, homicide offences are classified into four categories as defined by the Criminal Code: first degree murder, second degree murder, manslaughter and infanticide. First degree murder occurs when the death is planned and deliberate, or occurs during the commission of another serious offence or when the victim is a peace officer. Second degree murder is all murder that is not in the first degree. Manslaughter is generally a homicide committed in the heat of passion. Infanticide occurs when a mother causes the death of her newly born child. Deaths caused by criminal negligence, suicide, accidental or justifiable homicide are not included in the criminal homicide classification.

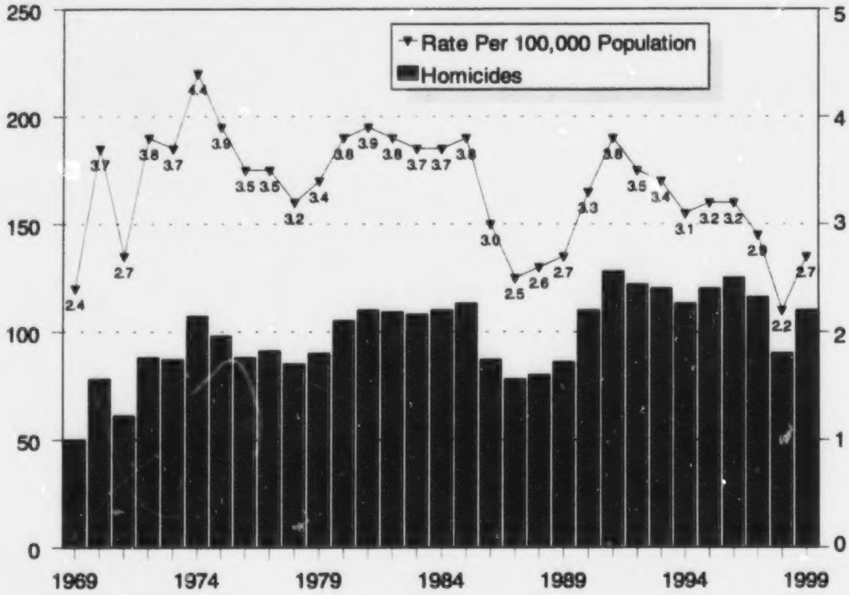
Historically there have been more homicides per capita reported in B.C. than in any other province. However, in 1998, B.C.'s homicide rate of 2.2 per 100,000 population was the fourth highest in the country after a decline of 24% was reported over the 1997 homicide rate. Despite these figures from 1998, in 1999 B.C.'s homicide rate of 2.7 homicides per 100,000 population was again the highest per capita in comparison with the other provinces. The second highest provincial homicide rate was reported in Manitoba (2.3 homicides per 100,000 population) followed by Alberta (2.1 homicides per 100,000 population). Despite a higher than average homicide rate (the average homicide rate in Canada was 1.8 per 100,000 population in 1999), B.C. trends discussed below parallel national trends.

Homicide in 1999

In 1999, there were 110 homicide victims in B.C., 20 more than the number of homicides reported in 1998. Of these homicides, 47% were first degree, 38% were second degree and 15% were manslaughter (no infanticides were reported). Police cleared 76 homicides and charged 80 persons with homicide during 1999.

In 1999 there were 110 homicides in B.C., 20 more than in 1998.

Figure 11: Number and Rate of Homicides, 1969 to 1999.



As in previous years, during 1999 the majority (89%) of persons charged with homicide were male and only 7% of persons charged with homicide were young offenders.

Detailed homicide data for 1999 were not yet available at the time of publication. Consequently, the following discussion is based on 1998 B.C. homicide data.

Of the 60 homicides solved in 1998, 78% of victims (47) were killed by someone they knew while 22% (13 victims) were killed by a stranger. When the victim was killed by someone he or she knew, 17% (10 victims) were killed by their spouse or ex-spouse while 10% (6 victims) were killed by a family member other than a spouse or ex-spouse. An additional 52% (31 victims) were killed by an acquaintance or friend.

As noted above, in 1998 there were ten homicides committed by a spouse. Spousal relationships include married (legal and common-law), separated and divorced spouses. In seven of the solved spousal homicides the accused was a legal or common-law husband. In the remaining three incidents the accused was a divorced or separated wife.

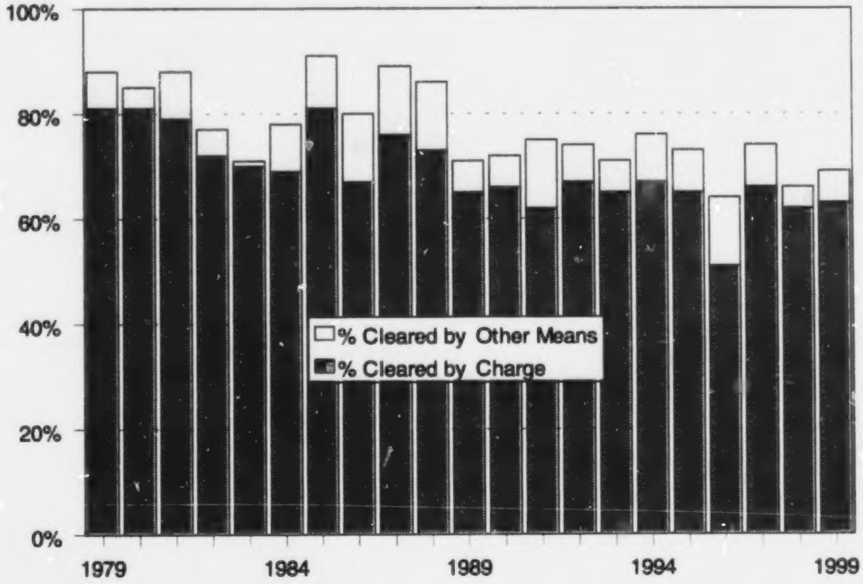
There were two children (under age 12) killed in 1998; one was killed by his/her father and the other by an authority figure (e.g., doctor, babysitter, teacher, etc.). In addition, two youths (aged 12-17 years) were killed; one was killed by an acquaintance and the other by a stranger.

In 1998, 76% of homicide victims were male and 24% were female (the gender of one victim was unknown). Almost 68% of the homicide victims were between the ages of 18 and 50. Approximately 4% of homicide victims were under the age of 18.

Of the total homicide victims in 1998, 28% (25 victims) were killed by shooting, 30% (27 victims) were stabbed, 29% (26 victims) were beaten to death, 11% (10 victims) were strangled or suffocated, and 2% (2 victims) were killed by other means. Approximately half of shooting victims were killed by rifle or shotgun (40%), followed by handgun (36%) and other firearms (24%).

Police cleared 69% of homicides in 1999 and charged 80 persons.

Figure 12: Percentage of Homicides Cleared, 1979 to 1999.



Homicide Trends

The homicide rate was 2.7 homicides per 100,000 population in 1999, an increase of 23% over the 1998 rate. (Because the number of homicides per 1,000 persons is small, homicide rates are calculated on a per 100,000 population basis). Notably, the 1998 homicide rate of 2.2 per 100,000 population was the lowest recorded in the past 30 years. During the past 20 years the homicide rate has fluctuated between 2.2 and 4.4 homicides per 100,000 population.

Over the last two decades in British Columbia there have been substantially more male victims of homicide, sometimes up to twice as many as female victims. This trend is similar to the national trend.

Between 1990 and 1999, an average of 71% of all homicides were solved. Of the 76 homicides cleared in 1999 (69% clearance rate), 69 were cleared by charge (63% of total homicides) and seven were cleared by other means (6% of total homicides).

B.C.'s Unsolved Homicide Unit

In 1996, the provincial government announced the creation of the Unsolved Homicide Unit, an integrated police unit made up of members from the RCMP and the Vancouver Police Department. The purpose of the Unit is to ensure the effective coordination of investigations into unsolved homicides that have occurred over the past 35 years.

Between January 1997 and July 2000, the Unit assisted with 80 investigations. As a consequence of these investigations, 31 cases were solved (27 were cleared by charge and four were cleared by other means) and a total of 33 persons were charged. Thirty-two of the 80 investigations are ongoing.

In 1999, there were 4,300 sexual offences reported, a decrease of 12% from 1998.

Attempted Murder

In 1999, there were 85 attempted murder offences in British Columbia. This is a 22% decrease from the 109 offences reported in 1998. Between 1990 and 1999 there was an average of 115 attempted homicides per year in B.C. A high of 141 attempted murders was reported in 1992, and a low of 85 attempted murders was reported in 1999.

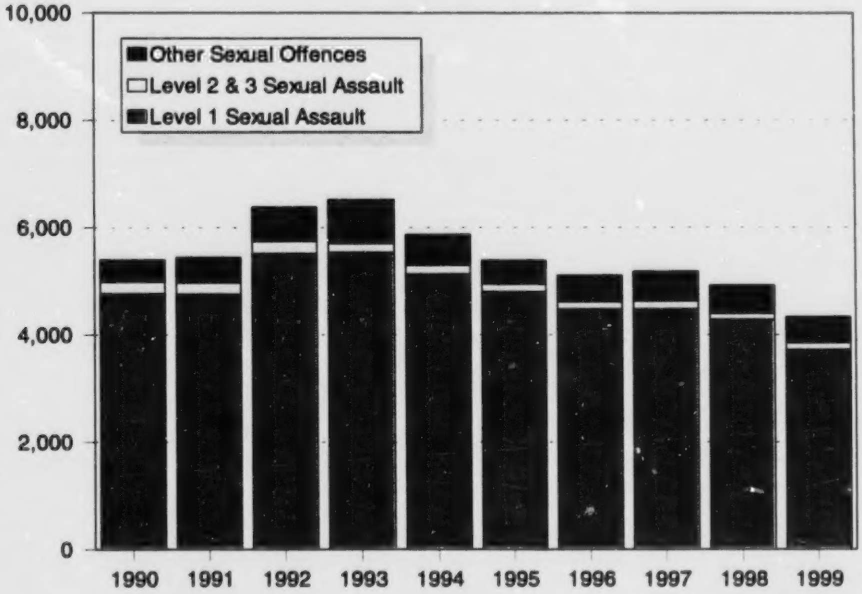
Sexual Assaults and Other Sexual Offences

Law reforms introduced by the Canadian government in 1983 and 1988 served to change the substantive, procedural and evidentiary aspects of Canada's rape law. Under the revised legislation, the crimes of rape, attempted rape and indecent assault were repealed and replaced with a three-tiered system of sexual offences. Sixteen new offences were introduced specifically to deal with child sexual abuse.

The three-tiered system of sexual offences is based on the seriousness of harm and violence. Level 1 sexual assault occurs when any form of sexual activity without bodily harm is forced upon another person; level 2 sexual assault occurs when a person is sexually assaulted by someone who uses or threatens to use bodily harm or a weapon; and level 3 sexual assault occurs when a person wounds, maims, disfigures, beats or endangers the life of a person during a sexual assault.

The intent of the law reforms was threefold: first, to reflect the violent rather than the sexual nature of the offences; second, to expand the opportunities for courts to receive children's testimony in cases of child sexual abuse; and, finally, to broaden the scope of sexual offences by presenting the offences as gender neutral as opposed to offences against females only.

Figure 13: Number of Sexual Offences, 1990 to 1999.



Sexual Assault in 1999

In 1999, a total of 4,300 sexual assaults and other sexual offences were reported in British Columbia, a decrease of 600 offences or 12% from the 4,900 offences reported in 1998. The 4,300 sexual crimes reported in 1999 represent the lowest number of sexual crimes reported during the last ten years.

The 4,300 sexual crimes reported in 1999 represent the lowest number of sexual crimes reported during the last 10 years.

In 1999, 3,700 (86%) sexual crimes reported in B.C. were classified as level 1 sexual assaults, whereas 100 (2%) were level 2 sexual assaults and 27 (1%) were level 3 sexual assaults. Another 485 (11% of the total) were other types of sexual offences, such as sexual touching or interference, sexual exploitation and incest.

Of the 1,700 persons charged with sexual offences in 1999, 85% were male adults, 1% were female adults, 12% were male youths and 1% were female youths. These proportions have remained about the same over the last ten years.

Sexual Assault Trends

A ten-year trend analysis of sexual offences reveals that the total number of reported offences peaked in 1993 at 6,500 and has been declining since that time. Despite the recent decreases, the number of reported sexual offences in B.C. has grown substantially since the early mid-1980s. This phenomenon also occurred across Canada.

The increase in the number of sexual offences since 1984 is primarily due to a rise in the number of reported level 1 sexual assaults. This upward trend in the number of sexual assaults has likely been influenced by many factors, including higher levels of reporting, changes in societal attitudes toward the reporting of sex crimes, the reporting of historical sexual offences, and changes in federal legislation discussed above.

The sexual offence rate (the number of sexual offences per 1,000 population in B.C.) peaked at a high of 1.84 in 1992 and has been steadily declining since that time. The 1999 sexual offence rate of 1.07 is the lowest rate reported in more than ten years.

Sexual Assault Survey Results

The results from a survey conducted by Police Services Division of sexual assaults reported to police during 1993 and 1994 revealed the following characteristics of a typical reported sexual assault in B.C. (the findings of this survey are available in full from Police Services Division's Survey of Sexual Assaults Reported to Police in British Columbia, 1993-1994).

The victim is a female under the age of 19 (if under the age of 19 then the victim is likely to be between the ages of six and 12). The accused person is male, over the age of 17, and is either a family member or a friend of the victim. If the accused is a male relative of the victim, then he is most likely to be her father or stepfather. The offence occurred once or during a period of less than one month, and took place at the victim's home, the accused's home or a home shared by both.

Fifty percent of persons charged with a sexual assault have a previous criminal record; however, the record is likely not for violent or sexual offences. The police will clear (solve) the offence, most likely by recommending charges.

In half the incidents where charges are laid, the accused is convicted of at least one offence. If so, he is likely to serve a prison sentence of less than two years in length. It is equally likely that the accused is not convicted or is still awaiting trial (when the data were collected). For those charges ending in non-conviction, it was most likely that Crown counsel stayed the charges.

Non-sexual assaults accounted for 80% of the violent crimes reported in British Columbia during 1999.

Assault (Non-Sexual)

As previously noted, revisions to federal assault legislation established three levels of non-sexual assault offences similar to those provided for sexual assaults. Level 1 non-sexual assault, the least serious of these offences, does not involve a weapon or serious physical injury; level 2 involves a weapon or results in bodily harm; and level 3 is aggravated assault or assault that is life-threatening. The ability of the police to make arrests and recommend charges in all types of assaults was enhanced by the legislation.

In addition to these three types of assault, non-sexual assaults also include the offences of assaulting a police officer or other officer, shooting with intent (firing a gun, rifle or airgun with the intention of hurting or endangering the life of another person), and causing unlawful bodily harm (any intentional harm to another person by any means).

Assault in 1999

In 1999, 41,500 assaults were reported. This represents a decrease of 1,600 offences (-4%) over the 43,100 assaults reported in 1998. Assaults accounted for 80% of the 51,700 violent crimes reported in B.C. in 1999.

In 1999, 34,000 (82%) of the total number of assaults were classified as level 1, compared with 6,200 (15%) as level 2 and 250 (less than 1%) as level 3 offences. Other assault offences accounted for the remaining 1,100 (3%) offences.

In 1999, 75% of assaults were cleared (solved): 43% were cleared by charge and 32% were cleared by other means.

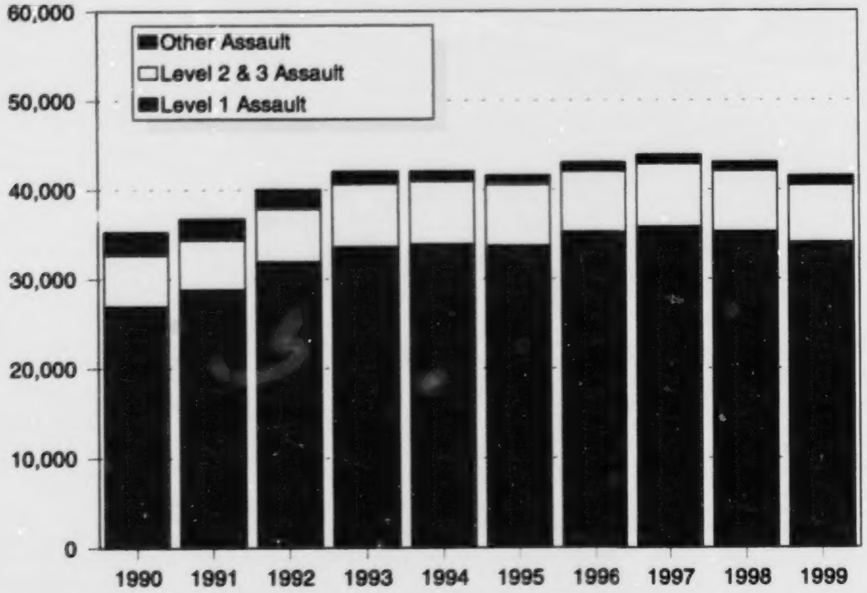
Of the 17,400 persons charged with assault in 1999, 89% were adults and the remaining 11% were youths between 12 and 17 years of age. In the same year, males represented 86% of the adults charged and 70% of youths charged.

Changes made to federal assault legislation have contributed to the substantial increase in the number of reported assaults over the last 10 years.

Assault Trends

Overall, the number of assaults has increased substantially during the last ten years. The number of assaults increased by 18% from 35,300 in 1990 to 41,500 in 1999. The number of level 1 assaults increased by 26% (from 26,900 in 1990 to 34,000 in 1999).

Figure 14: Number of Assaults (Non-Sexual), 1990 to 1999.



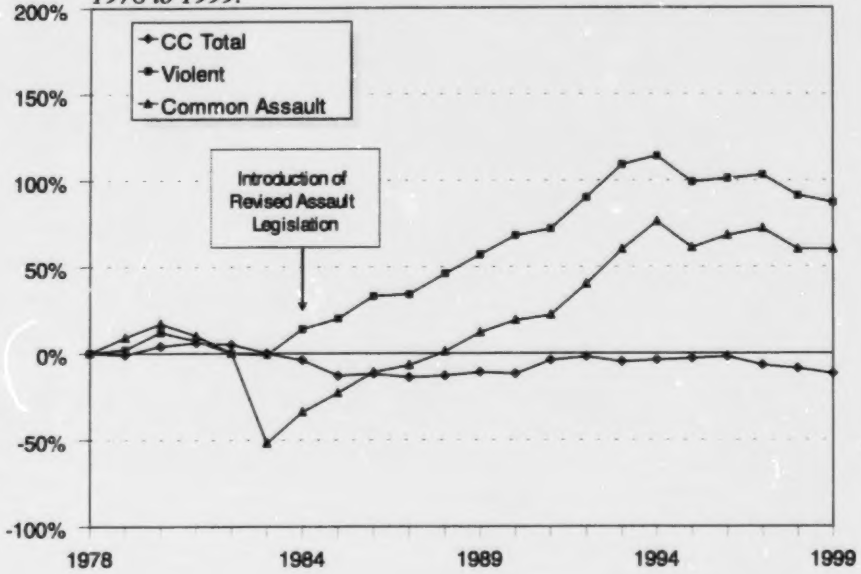
The increase in the number of level 1 assaults reported over the last ten years may reflect an increase in the occurrence of this type of offence. It may also be explained, at least partially, by increased reporting of these offences. In turn, increased reporting has likely been influenced by the changes in federal legislation discussed above.

The rate of adults charged with level 1 assault and total violent crime grew at approximately the same pace as overall Criminal Code charge rates between 1977 and 1983. Starting in 1984, however, charge rates for level 1 assault and total violent offences grew much more rapidly, while the overall Criminal Code charge rate stayed relatively stable. This suggests that the changes made to federal assault legislation in 1984 contributed not only to an increase in the number of offences reported, but also to an increase in the rate of adults charged with assault.

Further evidence of the impact of the revised legislation on assault data is found in trends in charging patterns. A ten-year trend analysis indicates that after the legislative revisions, the proportion of assaults cleared by charge steadily increased, while there was a corresponding decrease in the proportion of assaults cleared by other means.

According to survey results, the victim of a level 1 assault is equally likely to be male or female and is most likely between the ages of 18 and 35.

Figure 15: Adults Charged, % Change in Charge Rates (per 1,000 population), 1978 to 1999.



Assault Survey Results

Police Services Division conducted a survey of non-sexual assaults reported to police during 1995. Based on the findings of the survey, the following description represents the characteristics of a typical reported level 1 (common) assault in B.C.

The victim is equally likely to be male or female and is most likely between the ages of 18 and 35. Eight out of ten accused are male and are most likely to be between the ages of 18 and 35. In two-thirds of the incidents the victim and accused know each other. Three out of ten level 1 assaults are spousal assaults. In almost half the incidents the assault takes place in the victim's home, the accused's home, or a home shared by both. One in ten assaults occur in a bar or restaurant.

More than half of the accused charged with level 1 assault have a prior criminal record, and 40% of those records are for a previous violent or weapons offence.

More than one-third of the incidents will be cleared by charge by the police. Crown counsel will proceed with police-recommended charges 85% of the time. In more than 40% of the incidents where charges are laid, the accused will be convicted of at least one criminal offence.

In the remaining incidents proceeded with by Crown, the accused is not convicted. For those charges that end in a non-conviction, charges are most frequently stayed (with or without a recognizance).

Spousal Assault

There is no Criminal Code offence known as spousal assault; rather, the determination that an offence is a spousal assault is based on the finding that an offence (e.g., homicide, assault, criminal harassment) occurred against a spouse. As such, the number of spousal assault incidents reported represents the number of Criminal Code incidents that contain supplementary information indicating that a crime against a spouse has occurred.

__The determination that an offence is a spousal assault is based on the finding that an offence (e.g., homicide, assault, criminal harassment) occurred against a spouse.__

The number of spousal assault incidents does not necessarily count the number of different victims of a spousal assault. For example, if the same person is a victim of spousal assault at different times and has reported these crimes when they occurred, each incident would be recorded separately, and in effect the same victim would be counted more than once.

The reporting of spousal assault offences in British Columbia is supported by the provincial government's Violence Against Women in Relationships (VAWIR) policy. The VAWIR policy directs officials in the justice system (including police, Crown counsel, probation officers, victim assistance workers, and others) to emphasize the criminality of violence and to take the necessary measures to ensure the protection of women and children who may be at risk. The policy states that when attending an incident involving violence between spouses, where there are grounds to believe an offence has occurred, police officers should always make an arrest when it is in the public interest. The policy shifts the responsibility to lay charges from the victim to the criminal justice system. The policy defines a spouse as a marital partner, a common-law partner or a partner in a dating or intimate relationship. Spousal assaults also include assaults between partners in same-sex relationships.

Spousal Assault in 1999

In 1999, there were 9,800 incidents of spousal assault reported in British Columbia, approximately 100 more than reported in 1998.

Spousal assault offences fall into three categories: incidents where the offender is male, incidents where the offender is female and incidents where both spouses are involved. In 1999, 79% of spousal assault incidents involved a male offender, 12% involved a female offender and 9% involved both spouses assaulting each other. These proportions have remained about the same since 1993.

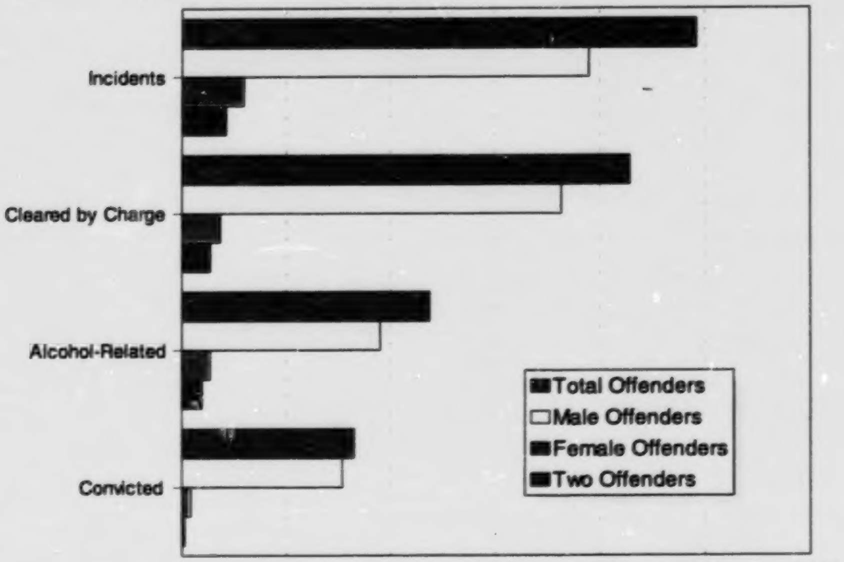
Spousal assaults are primarily a subset of non-sexual assault offences. In 1999, Criminal Code offences associated with spousal assault incidents accounted for 24% of all assaults.

Although most spousal assaults involve the offence of assault, almost 400 Criminal Code offences associated with spousal assault incidents during 1999 were related to other crimes such as sexual assault, homicide, robbery, and property offences.

In 1999, the spousal assault rate increased to 2.44 spousal assaults per 1,000 population.

More than 90% of the 10,900 Criminal Code offences reported within spousal assault incidents were cleared during 1999. Almost 80% of these offences were cleared by charge. Of the 8,300 persons charged, 6,900 (83%) were charged in incidents where the offender was male, 700 (9%) were charged in incidents where the offender was female, and 600 (8%) were charged in incidents involving both spouses. Almost 50% of all spousal assault incidents were alcohol-related.

Figure 16: Spousal Assaults Reported to Police, 1999.



Spousal Assault Trends

Between 1993 and 1999, the total number of reported spousal assault incidents fluctuated from a low of 9,200 reported in 1993 to a high of 10,000 in 1997. The spousal assault rate (number of spousal assaults per 1,000 population) remained relatively stable during the same period, averaging approximately 2.5 spousal assaults per 1,000 population. In 1999 the spousal assault rate was 2.44 , an increase of less than 1% from the 1998 rate of 2.43. Notably the 1998 rate was the lowest reported in six years.

The percentage of Criminal Code offences occurring within spousal assault incidents, which are cleared (either by charge or by other means), has remained steady at approximately 95% over the last six years. The percentage of these crimes cleared by charge has climbed each year during the past seven years, rising from 62% reported in 1993 to 79% reported in 1999.

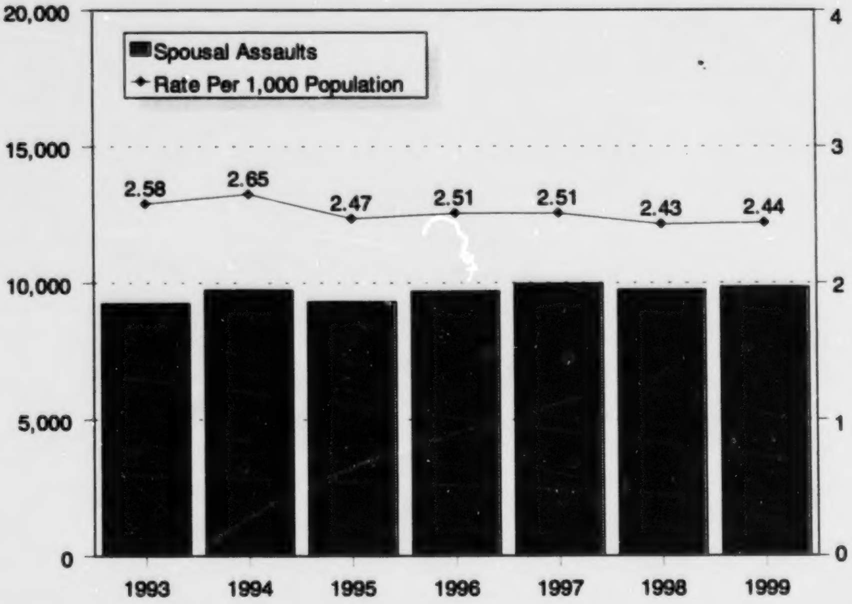
In 1999 the percentage of offences cleared by charge was considerably higher for spousal assault incidents (74% cleared by charge) compared to non-spousal assault incidents (42% cleared by charge). This trend has also been apparent during the past seven years. Overall, these data indicate that the police are recommending charges in cases involving violence in relationships.

There was also an overall increase in the number of persons charged in connection with spousal assault incidents during the past seven years. Between 1993 and 1999, total persons charged rose from 6,100 to 8,300, an increase of 36%.

The number of spousal assaults in which alcohol use was a factor has remained consistent at about 50% between 1993 and 1999.

Between 1993 and 1999, the number of persons charged with spousal assault offences rose from 6,100 to 8,300, an increase of 36%.

Figure 17: Number and Rate of Spousal Assaults, 1993 to 1999.



Spousal Assault Survey Results

The results from a survey conducted by Police Services Division of spousal assaults reported to police during 1995 revealed the following characteristics of a typical reported spousal assault in B.C. (The findings of this survey are available in full from Police Services Division's Survey of Spousal Assaults Reported to Police in 1995 in British Columbia).

The victim is a female and is most likely between the ages of 25 and 35. The accused is male and similarly is most likely between the ages of 25 and 35. The victim and accused are in a common-law relationship and the offence took place in a home shared by the victim and accused. More than half of the incidents involved alcohol.

More than two-thirds of the accused charged have a prior criminal record and half of those records are for a previous violent offence.

Three-quarters of the incidents are cleared by charge by the police and Crown counsel approves nearly all these incidents. More than half of the incidents proceed on a single charge and that charge is most likely a level 1 assault (assault that does not involve a weapon or serious bodily harm).

In approximately half of the incidents proceeded with by Crown, the accused is convicted of at least one criminal offence. Of those charges that result in conviction, the offender is likely to receive a suspended sentence with probation, be incarcerated for a period of one to six months, or put on probation (with or without a fine).

In the remaining incidents proceeded with by Crown, the accused will not be convicted. For those charges that end in a non-conviction, charges are most frequently stayed (with or without a recognizance).

Notably, many findings of Police Services Division's survey of spousal assaults parallel those reported in the 1998 Canadian Centre for Justice Statistics report, *Family Violence in Canada: A Statistical Profile*.

Hate/Bias Crime

A hate/bias crime is any Criminal Code offence motivated by hate, prejudice or bias against an identifiable group based on race, national or ethnic origin, language, colour, religion, sex, age, mental or physical disability, sexual orientation or any other similar factor. There are two offences in the Criminal Code that exclusively identify hate propaganda as hate/bias crimes. In addition, the Criminal Code allows the court to take into account relevant aggravating circumstances (such as the motivation of the offence by bias, prejudice or hate) related to an offence or an offender when passing a sentence.

In 1996, a provincial Hate Crime Team was established to respond to hate and bias crimes.

In 1996, a provincial Hate Crime Team was established to respond to hate and bias crimes. The team's mandate is to ensure the effective identification, investigation and prosecution of crimes motivated by hate. Police Services Division provides the team with a database to track and analyze incidents of hate or bias crime.

Preliminary 1999 Hate Crime Database Results

Preliminary analysis of incidents entered into the database indicates that in 1999 there were 139 reported incidents identified by the Hate Crime Team as hate or bias offences. These incidents involved 150 victims and 128 suspects.

Almost six in ten victims were male while approximately one in four victims were female. Businesses represented 3% of victims, and 12% of victims were vilified groups (the offence targeted specific groups rather than individuals). The remaining 1% of victims were transgender. Almost 60% of victims were under 45 years of age. The age of the victim was unrecorded in 22% of the incidents.

Of the 128 suspects, more than nine out of ten suspects were male. More than half of the suspects were adults between the ages of 18 and 29 and an additional one-quarter of suspects were between 30 and 39 years. Fewer than one in five suspects were young offenders (between the ages of 12 and 17).

Preliminary analysis indicates that the accused was a stranger to the victim in 38% of the incidents. In 29% of the incidents the relationship between the victim and accused was unknown.

Approximately one in four incidents involved an assault (25%). When the level of the assault was known (75% of incidents), 40% were level 1, 33% were level 2 and 2% were level 3. The remaining offences involved a variety of crimes including, uttering threats (22%), the wilful promotion of hate (17%), mischief (15%), harassing communications including phone calls, faxes, emails (12%) and criminal harassment (2%), among others.

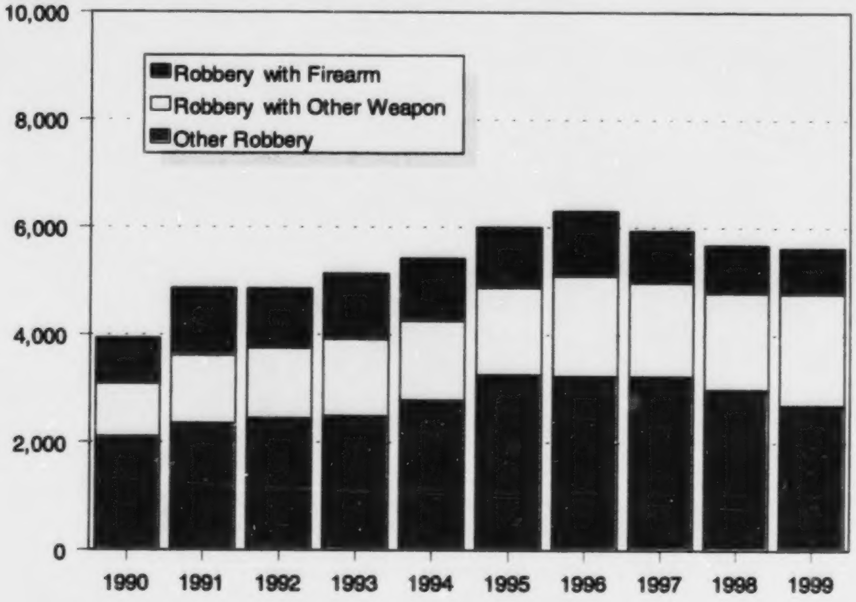
The most frequently cited type of bias was racial (56%). Bias towards sexual orientation was cited in another 25% of incidents. Religious bias was noted in 9% of incidents (when religious bias was cited, this bias involved anti-Semitism in 80% of incidents). An additional 5% of hate incidents involved bias towards gender. An incident may involve more than one motive (bias); consequently more than one motive may have been reported in the database.

In 1999, there were 5,600 robberies reported, a decrease of 1% from 1998.

Robbery

Robbery offences are divided into three categories: robbery with a firearm, robbery with another weapon and other robbery. Other robbery includes assault with intent to steal (mugging) and stopping a mail conveyance with the intent to rob or search it.

Figure 18: Number of Robbery Offences, 1990 to 1999.



Unlike other violent crimes in which an offence is counted for every victim, only one robbery offence is counted regardless of the number of victims in that incident.

After remaining relatively constant throughout the 1980s, the number of robberies increased steadily between 1990 and 1996. Beginning in 1997, however, the number of reported robberies has decreased. In 1999, there were 5,600 robberies reported, 1% less than in 1998 and 5% less than in 1997.

Notwithstanding these recent declines, the number of reported robberies in B.C. has increased by 1,700 offences or 43% since 1990.

Despite recent declines, the number of robberies reported in B.C. has increased by 43% since 1990.

In 1999, 2,700 (48%) of the total number of robbery offences were classified as other robbery, compared with 2,100 (37%) as robbery with a weapon other than a firearm, and 800 (15%) as robbery with a firearm.

In 1999, 28% of robberies were cleared (solved). This is comparable to previous years.

Adults comprised 75%, and young offenders accounted for 25% of the 1,600 persons charged with robbery in 1999. Males represented 88% of the total adults and youths charged with robbery.

Robbery Survey Results

Police Services Division recently conducted a survey of 1996 robbery offences in British Columbia. The results of which were released in *B.C. Crime Trends* Newsletter, Issue #3 (March 2000).

Survey findings indicate that one-third of robberies occurred on a street, road or highway. An additional 9% occurred in other outdoor areas including parks, school grounds and parking lots. Approximately 8% of the robberies occurred at convenience stores, 8 % in homes, 7% at banks, and 6% at gas stations.

Two-thirds of the surveyed victims were male and one-third were female. Approximately 27% of the victims were between the ages of 11 and 20 years while another 21% were between the ages of 21 and 30 years. A lone victim was involved in eight out of ten incidents. The victims were threatened in 32% of the surveyed incidents and physical force was used in 56% of the surveyed robberies. In approximately half of the incidents a weapon was used during the robbery. Of these incidents, 41% of the weapons were knives and 27% were firearms.

In eight out of ten surveyed robberies the accused was male. Youths (between the ages of 12 and 17 years) were identified as accused persons in 30% of the robberies while an additional 32% of the accused were between the ages of 18 and 25 years. Half of the robberies involved a lone accused, while another 28% involved two accused persons.

Of the surveyed incidents, approximately one-third were cleared by charge (solved) and the remaining two-thirds were not cleared (unsolved). An accused was not identified in almost all of the incidents that remained unsolved.

Abduction

There are four separate categories of abduction, each of which refers to the removal of a child from the parent or guardian's care. These offences are different from the offence of kidnapping, which refers specifically to the forcible removal or confinement of a person regardless of age or relationship. Abduction is characterized by behaviours such as unlawfully taking, enticing away, harbouring, or concealing a young person.

The current laws regarding abduction were enacted in 1983; they replaced sections of the Criminal Code that were only applicable to the abduction of females under a specific age.

The four categories of abduction are as follows: abduction of an unmarried person under the age of 16 against the will of a parent or guardian; abduction of a person under the age of 14 with the intent of depriving the parent or guardian of possession of the child; abduction by a parent or guardian of anyone under the age of 14 in contravention of a custody order, with the intent to deprive the person with legal custody of having custody of the child; and abduction of a person less than 14 years of age by a parent or guardian where there is no custody order, with the intent to deprive the other parent of the child.

In 1999, there were 81 abduction offences, of which 41% were abductions of children under the age of 14, 37% were abductions in contravention of a custody order, 20% were abduction of a child under 14 (without a custody order), and the remaining 2% were abductions of persons under the age of 16. Over the past ten years, there was an average of 116 abductions each year in British Columbia.

Over the past 10 years there has been an average of 116 abductions each year in B.C.

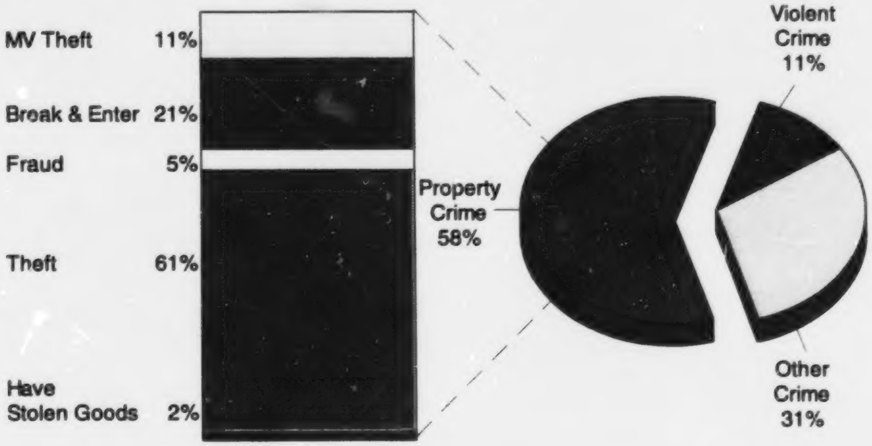
In 1999, 60% of abductions were cleared (solved). The average clearance rate for abduction offences from 1990 to 1999 was 57%. During 1999, 36% of abductions were cleared by charge while 25% were cleared by other means. Of those offenders charged with abduction in 1999, 74% were male, and 26% were female.

Other Crimes Against Persons

There are other Criminal Code offences that are not included in the violent crime category, but may constitute a crime against another person (as opposed to property). The most evident of these offences is criminal harassment. Within the federally prescribed method of coding criminal offences, criminal harassment crimes are included in the "other" crime category. Consequently, criminal harassment is discussed in more detail in Chapter 4.

Property Crime in British Columbia

Figure 19: Property Crime by Category, 1999.



Property crimes represented 58% of all Criminal Code offences reported in British Columbia during 1999. These crimes include break and enter, motor vehicle theft, other theft (such as shoplifting, theft of bicycles, theft from motor vehicles) as well as fraud and possession of stolen property. Because three out of five reported crimes are property offences, these offences have a greater impact on B.C.'s crime trends than other types of crime.

Property Crime in 1999

In 1999, police reported 272,700 property crimes, a decrease of 5% compared with the 287,900 offences reported in 1998.

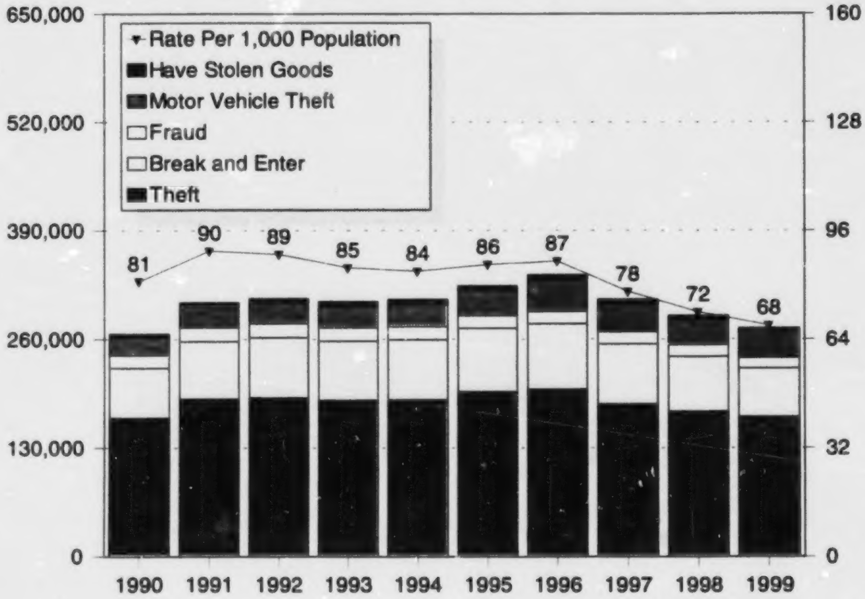
Most property crimes are either thefts or break and enter offences. In 1999, there were 166,800 reported thefts and 58,100 break and enter offences. These two offence categories together represented 82% of all property crimes and 48% of total Criminal Code offences in 1999.

In 1999, 30,600 persons were charged with property crimes. Approximately 79% of total persons charged were adults and 21% were youths between 12 and 17 years of age. Males represented 78% of total persons charged and females represented 22%. These percentages have remained about the same over the last ten years.

Property Crime Trends

After remaining fairly stable during the 1980s, the number of property crimes in B.C. increased from 266,200 in 1990 to 308,500 in 1992. This represented an increase of nearly 42,300 offences or 16%. The number of property crimes decreased in 1993, then increased again from 1994 to 1996. After reaching an all-time high of 336,700 offences in 1996, the number of property crimes fell 9% in 1997 to 307,100 offences and then decreased again by 6% in 1998 to 287,900 offences. There were 272,700 offences in 1999, a decrease of 5% from 1998.

Figure 20: Number and Rate of Property Offences, 1990 to 1999.



The number of offences cleared (solved) is low for most property crimes. In 1999 only 17% of property crimes were cleared.

The property crime rate remained relatively constant throughout the 1980s, averaging about 80 offences per 1,000 population. It rose to 90 offences per 1,000 population in 1991, but began to decrease after that time, falling to a four-year low of 84 offences per 1,000 population in 1994. Slight increases were reported in the property crime rate in 1995 and 1996, but since that time the property crime rate has decreased substantially. Between 1996 and 1997, the property crime rate decreased by 11% (to 78 offences per 1,000 population) and between 1997 and 1998 the property crime rate further decreased by 7% (to 72 offences per 1,000 population). From 1998 to 1999, the rate decreased 6% (to 68 offences per 1,000 population).

The number of offences cleared (solved) is low for most property crimes. Over the last ten years, clearance rates have continued to decline. In 1999, only 17% of property crimes were solved, compared with 20% in 1989. From 1990 to 1992 the clearance rate was 18% and since that time, the rate has remained consistent at 17%.

Break and Enter

Break and enter offences are divided into three categories: residential, business, and other break and enters. Other break and enter offences include break and enter of trains, boxcars, unattached trailers or storage lockers.

Break and Enter in 1999

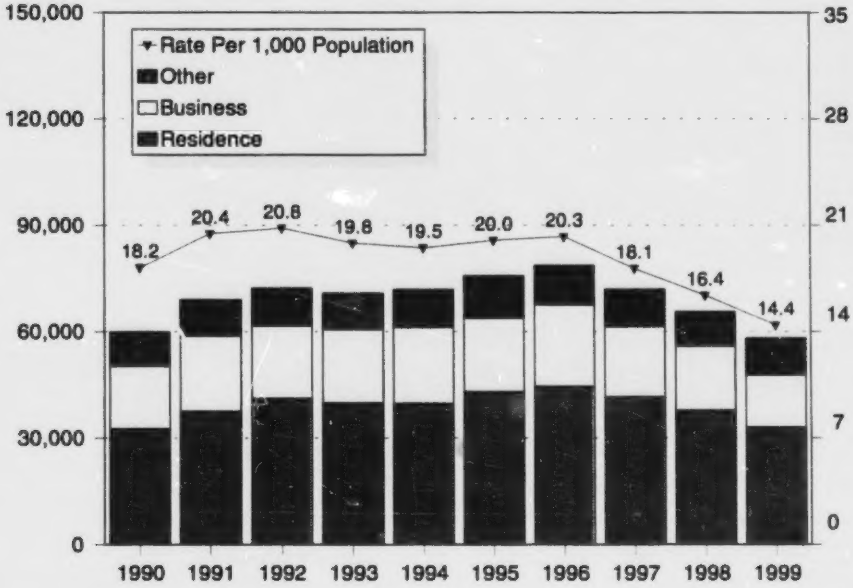
The number of break and enter offences fell from 65,500 in 1998 to 58,100 in 1999, a decrease of 7,400 offences or 11%.

During 1999, 57% of the total break and enter offences occurred in homes, 25% in businesses, and 18% in other premises. Break and enter offences accounted for 21% of all property crime and 12% of all Criminal Code offences in 1999.

In 1999, 64% of the 4,700 persons charged with breaking and entering were male adults, 4% were female adults, 29% were male youths, and the remaining 3% were female youths.

In 1999, the break and enter crime rate fell to a 10-year low of 14 per 1,000 population.

Figure 21: Number and Rate of Break and Enter Offences, 1990 to 1999.



Break and Enter Trends

Throughout the 1980s and into 1990, the number of break and enter offences fluctuated between 56,700 and 63,000. The number of offences increased by 15% in 1991 and by another 5% in 1992, reaching a five-year high of 72,200 offences. The number of break and enter offences levelled off between 1992 and 1994, then increased again during 1995 and 1996. However, between 1996 and 1997 the number of reported break and enter offences declined by 6,700 offences, or 9%. From 1997 to 1998, the number of break and enter offences decreased by 6,300 offences representing an additional decline of 9%. This trend continues and in 1999 there was a decrease of 7,400 offences or 11%.

The rate of break and enter offences per 1,000 persons has fluctuated during the past ten years, peaking at a high of 21 break and enters per 1,000 persons in 1992 and falling to a low of 14 break and enters per 1,000 persons recorded in 1999.

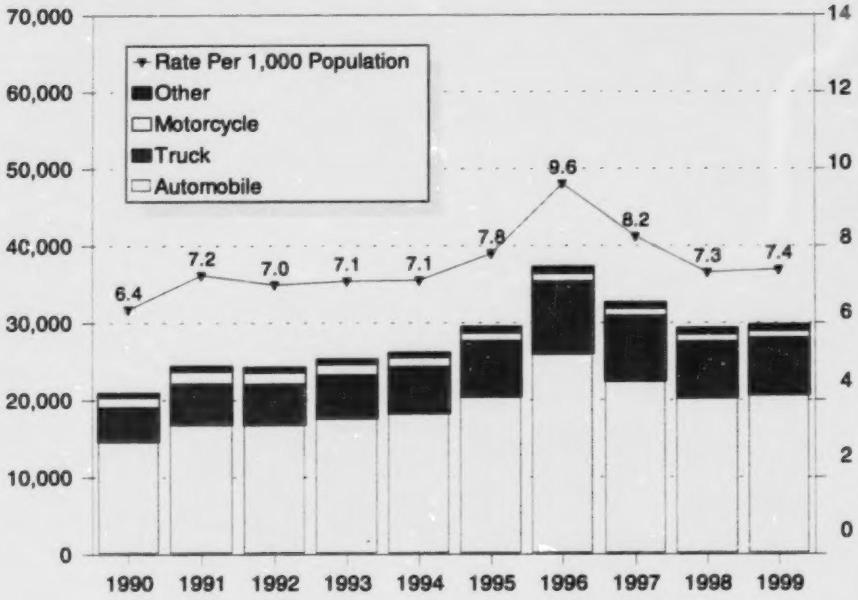
The clearance (solved) rate for break and enter offences has averaged approximately 11% over the past ten years. The clearance rate for break and enter offences during 1999 was 10%.

Motor Vehicle Theft

Motor vehicle theft data include theft or attempted theft of automobiles, trucks, motorcycles and other vehicles (such as snowmobiles, farming and industrial implements, and all terrain vehicles). Most stolen vehicles are cars or trucks.

In the spring of 1998 the Attorney General announced the creation of a joint task force to combat auto crime in British Columbia.

Figure 22: Number and Rate of Motor Vehicle Thefts, 1990 to 1999.



In the spring of 1998, the Attorney General announced the creation of a joint task force composed of police, Crown Counsel, ICBC and government staff to combat auto crime in British Columbia. In September 1998, 12 police officers from the RCMP and Lower Mainland municipal police departments began work on the Auto Theft Task Force (ATTF). The ATTF's priorities include targeting offenders who are stealing vehicles for thrill seeking purposes; crimes in which vehicles are stolen and disposed of offshore or in other parts of Canada, or taken to "chop shops" for dismantling; and crimes in which vehicles are stolen and then used in the commission of further criminal offences. The ATTF is a pilot program that may expand to communities outside the Lower Mainland in the future.

Motor Vehicle Theft in 1999

There were 29,800 motor vehicle thefts reported in 1999 representing an increase of 400 offences or 1% from 1998. This is the first year since 1996 that there has been an increase in motor vehicle thefts. Between 1996 and 1997 the number of motor vehicle thefts decreased by 4,600 offences or 12% and from 1997 to 1998 motor vehicle thefts decreased by 3,300 offences or 10%.

Of the 29,800 motor vehicle thefts reported in 1999, 69% were cars, 25% were trucks and the remaining 6% were motorcycles or other vehicles.

Only 7% of motor vehicle thefts were cleared (solved) during 1999. Of the 1,600 persons charged with motor vehicle theft in 1999, 62% were male adults, 5% were female adults, 28% were male youths, and the remaining 5% were female youths.

Adults accounted for 68% of persons charged with this offence, while youths represented 32%. However, since more than 90% of motor vehicle thefts in 1999 remain unsolved, generalizing about the characteristics of offenders is difficult.

The rate of motor vehicle thefts per 1,000 population has increased by 16% over the last 10 years.

Motor Vehicle Theft Trends

Between 1990 and 1999, the number of reported motor vehicle thefts increased by 42% or 8,900 offences. Similar to other types of property crime, the number of motor vehicle thefts remained fairly constant until 1990 and 1991 when the number of offences increased by 33% and 17% respectively. During the next three years, motor vehicle thefts levelled off and then increased again by 13% in 1995 and 26% in 1996. For the first time in ten years, however, the number of reported motor vehicle thefts declined between 1996 and 1997 (by 12%) and declined again between 1997 and 1998 (by 10%). The number of motor vehicle thefts levelled off in 1999, reflected by an increase of 1% from 1998.

The rate of motor vehicle thefts per 1,000 population has increased by nearly 16% over the past ten years, rising from a rate of 6.4 per 1,000 population in 1990 to 7.4 per 1,000 population in 1999. When the motor vehicle theft data are examined on a per 1,000 licensed vehicle basis, a similar trend is found.

The clearance (solved) rate for motor vehicle theft has decreased from 13% in 1990 to 7% in 1999. Although the clearance rate is low, about 95% of stolen vehicles are recovered. However, many of these vehicles are damaged by the offender breaking into the vehicle, driving carelessly or removing parts for resale.

Theft

Theft, including attempted theft, is divided into four categories: theft of bicycles, theft from motor vehicle, shoplifting and other theft. Other theft includes offences such as theft of electricity or gas, theft of data or computer software, illegal use of pay-TV descramblers and computer-aided long-distance calls. Theft accounts for 61% of all property crime and 36% of all Criminal Code offences.

Every theft is classified according to the value of the goods stolen. From 1986 to 1994, thefts were divided into over and under $1,000 categories. In 1995 these categories were revised to theft over and under $5,000. Since 1995, the theft under $5,000 category has represented approximately 98% of total theft offences. This section describes the data concerning theft but does not distinguish between the over and under theft categories.

Theft in 1999

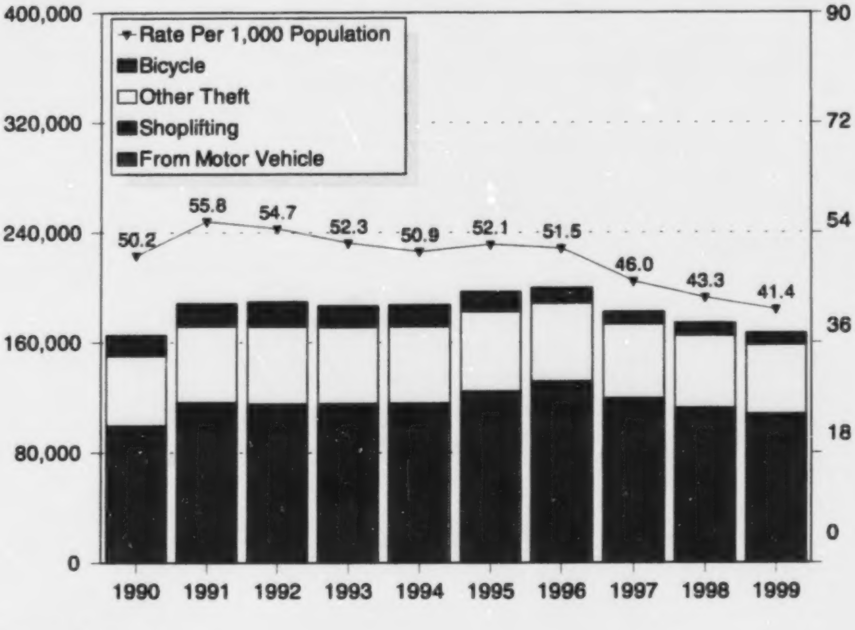
In 1999, there were 166,800 thefts reported to the police. This represents a 4% decrease compared with the 173,500 thefts reported in 1998.

As in previous years, thefts from motor vehicles accounted for just over half of all thefts in 1999, while approximately 30% were other thefts, 13% were shoplifting crimes and 5% were bicycle thefts.

Of the 18,000 persons charged with theft in 1999, 59% were male adults, 20% were female adults, 13% were male youths and 7% were female youths.

Theft accounts for 61% of all property crime, and 36% of all Criminal Code offences.

Figure 23: Number and Rate of Thefts, 1990 to 1999.



Theft Trends

Like other property crimes, the number of thefts remained stable through the 1980s, then rose steeply in 1990 and 1991, levelled off during the next few years, and then decreased during 1997 and 1998. Most of the increases in 1990 and 1991 were due to the growth in the number of thefts from motor vehicles.

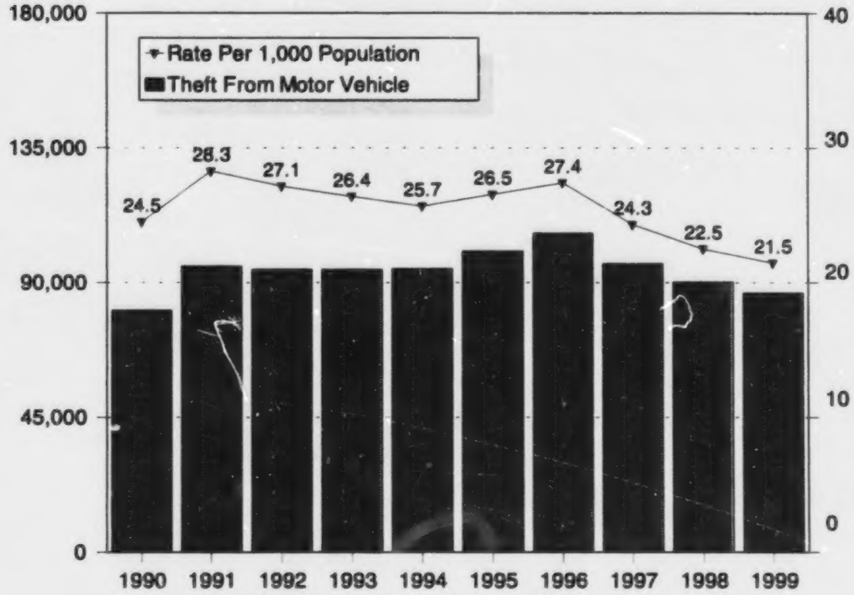
Although the number of reported thefts fluctuated between 1990 and 1999, the clearance (solved) rate has remained relatively stable, averaging 16%. The number of persons charged with theft also remained stable, averaging 20,200 per year.

The number of thefts from motor vehicles climbed steadily from 1989 to 1991 and levelled off between 1992 and 1994. Since 1994, thefts from motor vehicles rose by 6% in 1995 (to 100,400 offences), increased a further 6% in 1996 (to 106,400 offences), but declined 10% in 1997 (to 96,200 offences), and declined a further 6% in 1998 (to 90,100 offences). This trend continued in 1999 with 86,500 offences, a decrease of 4% from 1998.

Bicycle thefts represented 5% of total thefts in 1999. Over the last ten years, bicycle thefts have declined 43%, from 15,000 in 1990 to 8,600 in 1999.

After steadily increasing between 1990 and 1996, the number of shoplifting offences dropped 8% between 1996 and 1997 and decreased 7% in 1998. The number of shoplifting offences remained relatively constant between 1998 and 1999 with a decrease of 1%.

Figure 24: Number and Rate of Thefts From Motor Vehicles, 1990 to 1999.



Bicycle thefts represented 5% of total thefts in 1999. Over the last 10 years, bicycle thefts declined 43%, from 15,000 in 1990 to 8,600 in 1999.

Have Stolen Goods

A total of 5,200 "have stolen goods" (also known as possession of stolen property) offences were reported during 1999, a decrease of 400 offences or 7% over the 5,600 offences reported in 1998. Despite recent decreases, the total number of reported stolen property offences has increased by 14% since 1990 (rising from 4,600 offences in 1990 to 5,200 offences in 1999).

Of the 3,400 persons charged with possession of stolen property in 1999, 88% were males and 82% were adults.

Due to the nature of these offences, clearance rates are high. In 1999, 82% of possession of stolen property incidents were cleared; 65% were cleared by charge and 17% were cleared by other means. Over the last ten years, an average of 82% of possession of stolen property offences were cleared: 68% were cleared by charge and 15% were cleared by other means.

Fraud

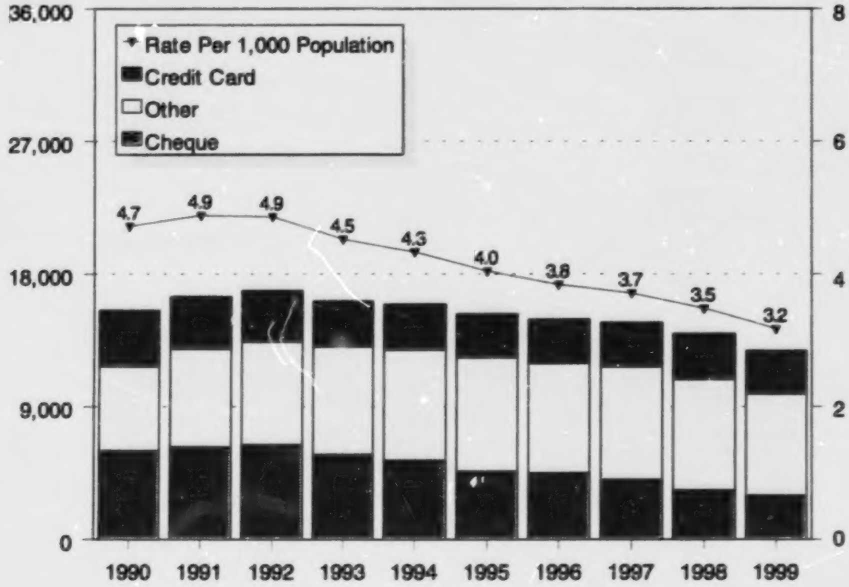
Fraud offences are reported under three categories: cheque, credit card and other fraud. Other fraud includes offences such as criminal breach of trust, real estate fraud, and forgery.

There were 12,800 fraud offences in 1999, a decrease of 8% from the 13,900 offences reported in 1998. The number of fraud offences increased between 1990 and 1992. However, starting in 1993 the number of fraud offences declined by approximately 3% each year.

Of the 2,800 persons charged with fraud in 1999, 67% were male adults, 26% were female adults, 5% were male youths and 2% were female youths.

There were 12,800 fraud offences in 1999, a decrease of 8% from the 13,900 offences reported in 1998.

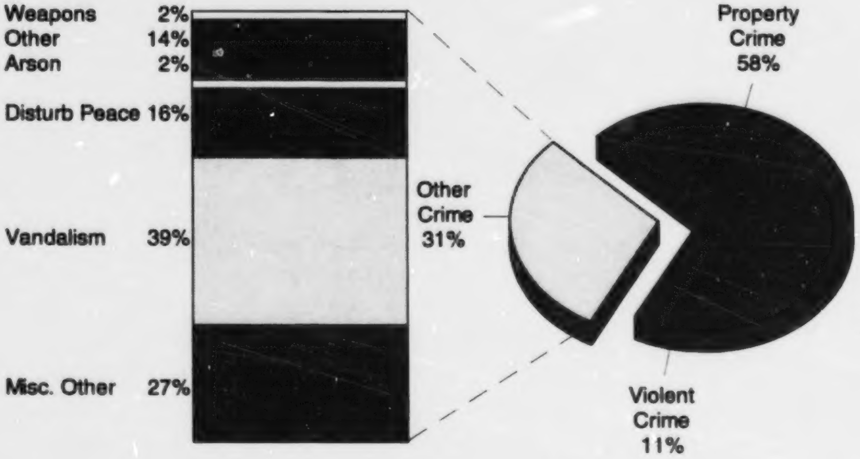
Figure 25: Number and Rate of Fraud Offences, 1990 to 1999.



Clearance rates are relatively high for this type of offence, fluctuating between 51% and 64% over the last ten years. Of the 6,500 offences cleared (solved) in 1999, 33% were cleared by charge and 18% were cleared by other means.

Other Crime in British Columbia

Figure 26: Other Crime by Category, 1999.



Approximately 30% of all Criminal Code offences fall within the category of "other" crime. These other crimes include prostitution, gaming and betting, possession of offensive weapons, arson, disturbing the peace, trespassing, mischief and property damage (vandalism), criminal harassment, and miscellaneous other Criminal Code offences (a catch-all category of offences for which specific data collection codes do not exist).

In 1999, there were 143,000 other crimes, a 2% decrease from the 145,200 other offences reported in 1998.

This category of offences increased steadily from 149,400 offences reported in 1990 to 161,600 reported in 1992, a rise of 8%. After 1992, the number of reported other offences steadily declined by an average of 3% per year.

In 1999, of the total other crimes reported, 55,400 or 39% were mischief and property damage (vandalism). Another 22,900 offences, or 16%, were disturbing the peace offences. Together these two offences represent more than half of all other crimes.

The clearance (solved) rate for other offences was 44% in 1999. This is higher than the average clearance rate of 35% over the previous ten years. This increase is, in part, a result of a decrease in the number of mischief and property damage offences, which traditionally have low clearance rates.

Of the 17,000 persons charged with other crimes during 1999, 84% were adults and 16% were youths between 12 and 17 years. Males represented 86% of total persons charged.

Mischief and Property Damage (Vandalism)

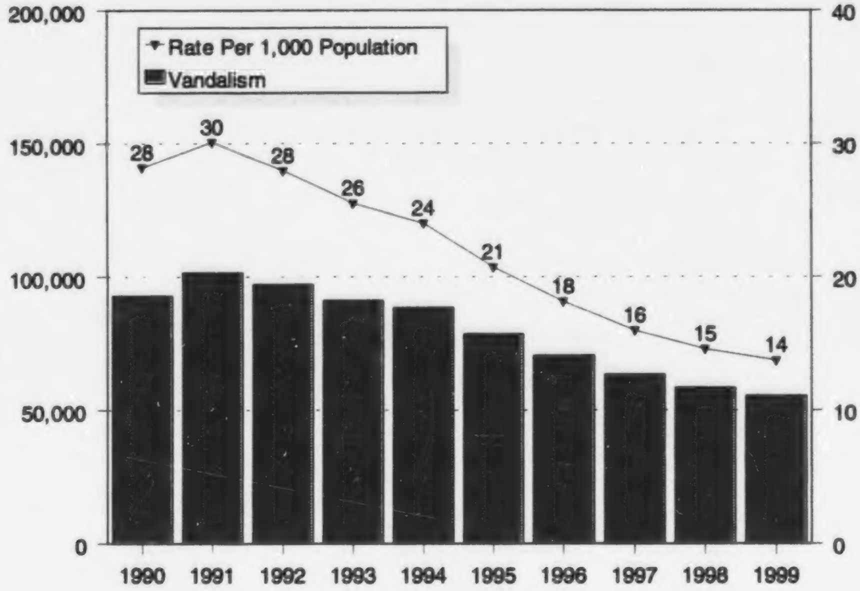
The offence of mischief and property damage is often called vandalism. It includes incidents where property is destroyed or damaged, acts where property is rendered dangerous or inoperative, or acts that render access to property denied or obstructed. Similar to thefts, mischief and property damage offences are classified according to their value. From 1986 to 1994, mischief and property damage offences were divided into over and under $1,000 categories. In 1995, these categories were revised to over and under $5,000. Since the 1995 revisions, most offences in this category have been reported as mischief and property damage under $5,000.

In 1999 a total of 55,400 mischief and property damage offences were reported, a decrease of 5% from 1998.

This section describes the data concerning mischief and property damage but does not distinguish between the over and under categories.

In 1999, a total of 55,400 mischief and property damage offences were reported. This is a 5% decrease from the 58,400 offences reported in 1998.

Figure 27: Number and Rate of Vandalism Offences, 1990 to 1999.



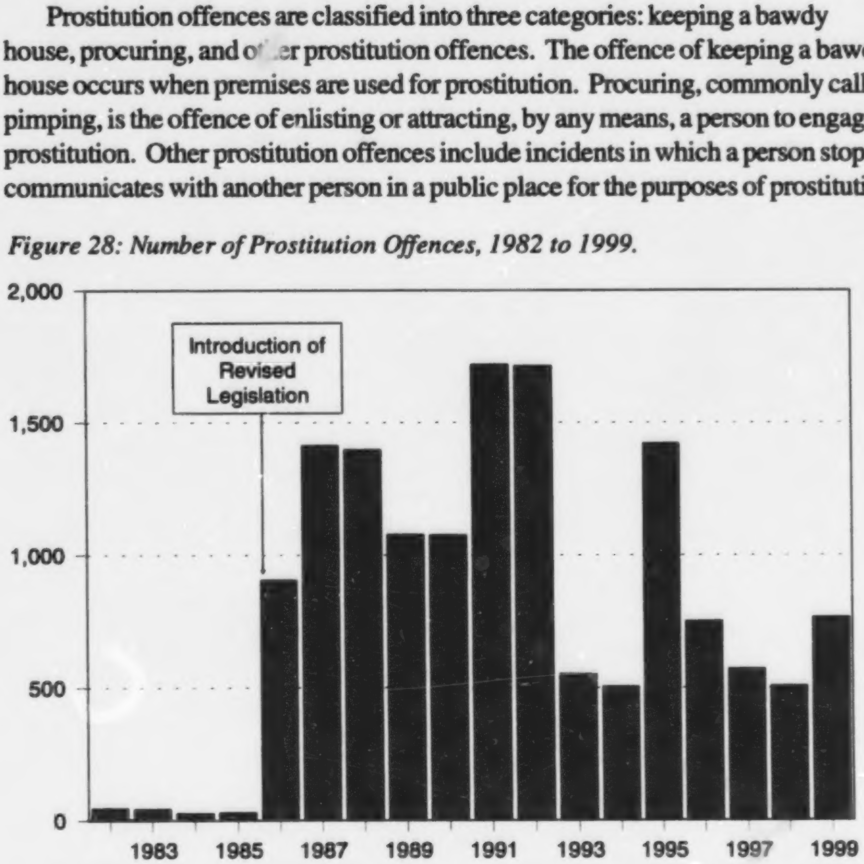
The number of mischief and property damage crimes rose from 92,800 offences in 1990 to 101,500 in 1991. Since 1992, however, the total number of reported mischief and property damage offences has steadily declined by an average of 7% per year. There is no satisfactory explanation for this phenomenon.

In 1999, mischief and property damage offences represented 12% of total Criminal Code offences, a decrease from 1991, when these offences accounted for one-fifth (20%) of total crime.

Prostitution

Prostitution offences are classified into three categories: keeping a bawdy house, procuring, and other prostitution offences. The offence of keeping a bawdy house occurs when premises are used for prostitution. Procuring, commonly called pimping, is the offence of enlisting or attracting, by any means, a person to engage in prostitution. Other prostitution offences include incidents in which a person stops or communicates with another person in a public place for the purposes of prostitution.

Figure 28: Number of Prostitution Offences, 1982 to 1999.



In 1999, there were 760 reported prostitution offences, an increase of 51% from the 500 prostitution offences reported in 1998. Approximately 85% of these crimes were for other prostitution offences, 11% were for procuring and the remaining 4% for keeping a bawdy house.

Three out of five prostitution offences were reported in the core urban areas in the Lower Mainland (i.e., Vancouver, Surrey, New Westminster, and Burnaby).

In 1999, 442 persons were charged with prostitution offences, 19% more than in 1998. Male adults accounted for 29% of persons charged, while female adults accounted for 67%. Female youths represented the remaining 4%.

In 1986, Bill C-49 made it illegal to communicate in a public place for the purposes of prostitution. Consequently, the number of prostitution offences increased substantially over previous years. The number of offences peaked in 1991 and 1992, when 1,700 offences were reported in each of these years, and then declined to a low of 500 offences reported in 1994. In 1995, the number of prostitution offences more than doubled compared with 1994, but then decreased by 47% in 1996, and decreased by an additional 33% from 1996 to 1998. In 1999 there was a 51% increase from 1998. It is important to stress that changes in reported prostitution offences are highly sensitive to changes in police enforcement practices.

Three out of five prostitution offences were reported in core urban areas in the Lower Mainland (i.e., Vancouver, Surrey, New Westminster, and Burnaby).

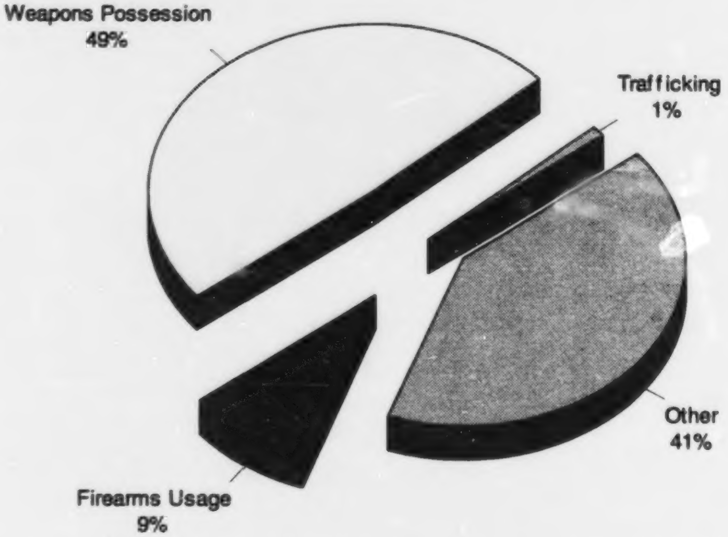
In March 1996, the provincial government established the Provincial Prostitution Unit. The unit is composed of three police officers, Crown counsel, a community coordinator and a social worker. The unit's purpose is to work with communities across B.C. to develop and coordinate enforcement and prosecution strategies; provide training and advice to police, prosecutors and communities; coordinate social support for sexually exploited youth; and coordinate prevention and intervention strategies.

Offensive Weapons

All sections of the new federal Firearms Act were implemented on December 5, 1998. The Firearms Act mandates the licensing of all gun owners by January 1, 2001 and the registration of all guns by January 1, 2003. The Act sets out licensing requirements for all firearms, including enhanced screening procedures, spousal notification, and safety training. The registration of firearms is geared toward the tracking of legal firearms in order to assist in the identification of illegal guns.

The Firearms Act mandates the licensing of all gun owners by January 2001 and the registration of all guns by January 2003.

Figure 29: Percentage of Weapons Offences, 1999



As a reflection of legislative changes, the offence categories for weapons have been modified. These categories are now firearms usage, weapons possession, trafficking import/export, and other weapons offences. Until 1999, offensive weapons crimes were divided into four offence categories: explosives, prohibited weapons, restricted weapons and other weapon offences. The new categories are not comparable with the previous offence categories and thus trend data using the new groupings will not be available for several years.

In 1999, there were 3,400 weapons offences reported. Of these offences, almost one-half were for weapons possession while an additional 1,400 offences or 41% were for "other" weapons offences. There were 300 firearms usage offences (9%) and 19 trafficking or importation offences (representing less than 1%).

Offensive Weapons Trends

What follows is a discussion of trends regarding weapons offences for the ten years prior to the change in both weapons legislation and in the way weapons offences are categorized. Prior to legislative changes, in 1997, after three consecutive years of decreases, the total number of weapons offences increased. An increase was reported again in 1998 when the total number of weapons offences rose from 3,300 reported in 1997 to 3,700 reported in 1998, an increase of 11%. This increase is largely a result of a rise in the number of prohibited weapon offences.

The explosives category includes illegal importation, possession, storage and use of explosives such as dynamite and fireworks, as well as the threat of the use of explosives (i.e., bomb threats). In 1985, possession of an explosive weapon was broadened to include the possession of any explosive substance.

The number of explosives offences is small and has fluctuated considerably over the past ten years. In 1998, there were 205 explosives offences reported to the police, 74 more offences than the 131 reported in 1989.

Prohibited weapons offences include the possession, concealment and importation of non-firearms such as spring knives or switchblades, nunchaka sticks, throwing stars, slingshots, and silencers for handguns. In 1998, there were 1,047 reported prohibited weapons offences, representing an increase of 61% over the 651 prohibited weapons offences reported in 1997.

Overall, the number of weapon offences cleared (solved) averaged 75% over the last 10 years.

Restricted weapons offences include the possession, improper storage and importation of firearms such as handguns, altered guns (sawed-off rifles or shotguns) and fully automatic guns. The number of restricted weapons offences has fluctuated over the ten year period from 1989 to 1998. In 1998, 296 restricted weapons offences were reported, a 22% decrease from the 379 reported in 1997.

Other weapons offences include crimes related to the concealment, importation, possession, storage, and licensing of weapons. Also included in this category are incidents where a firearm is carelessly discharged in a non–life–threatening manner. The number of offences reported in this category has increased steadily from 1,600 offences in 1989 to 2,100 in 1998. This represents an increase of 35% over the ten year period.

Overall, the number of offensive weapons offences cleared (solved) averaged 75% from 1989 to 1998. In 1998, 32% of weapons offences were cleared by charge and 42% were cleared by other means.

Of the 994 persons charged with offensive weapons offences in 1998, 77% were male adults, 4% were female adults, 17% were male youths, and 2% were female youths.

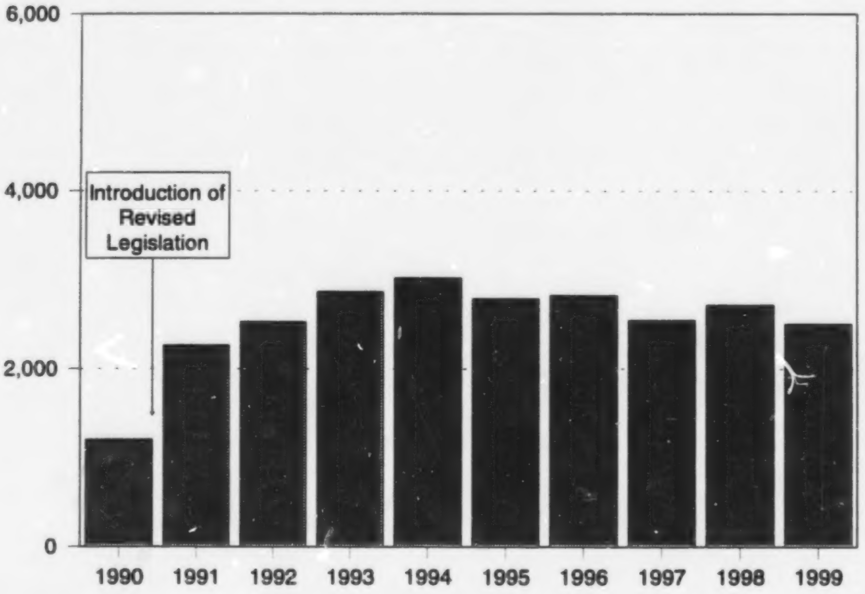
Arson

Before 1990, arson was more narrowly defined than it is today. With the proclamation of Bill C-53 in July 1990, the definition of arson was expanded and the penalties became more serious. Besides causing damage to specific types of property, arson now includes wilful disregard for the lives and safety of others and negligent conduct that results in fires or explosions. It also criminalizes the possession of flammable or incendiary materials.

Mischief arson, such as setting fire to abandoned cars or waste receptacles, was previously reported as mischief and property damage. Under the new legislation, these offences are now reported as arson. This resulted in a significant increase in the number of arson offences recorded since 1990.

In 1999, 2,500 arson offences were reported, an 8% decrease from 1998.

Figure 30: Number of Arson Offences, 1990 to 1999.



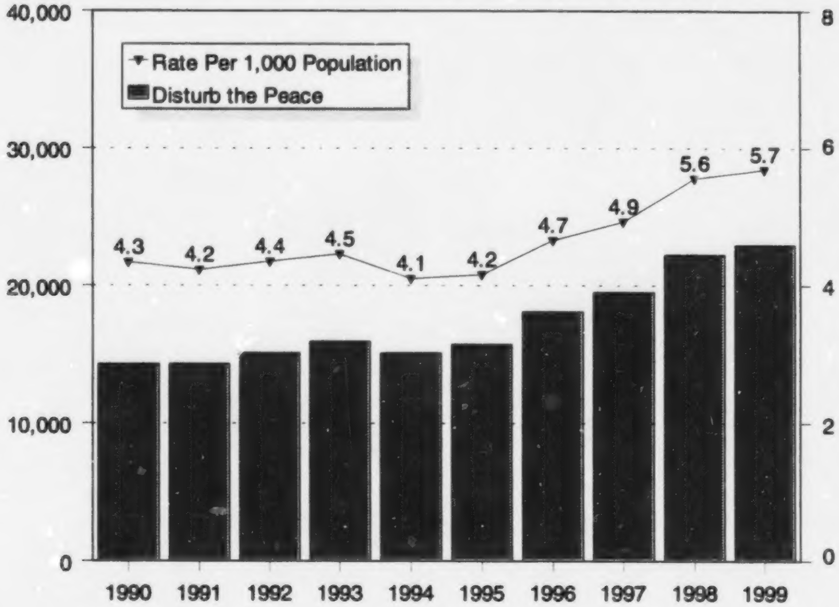
From 1986 to 1990, the number of arson offences remained about the same in each year. Following revisions to arson legislation, the number of arsons nearly doubled, from 1,200 offences reported in 1990 to 2,300 in 1991. From 1991 until 1994, the number of arson offences continued to increase, albeit at a much slower rate. Between 1995 and 1996, the number of arson offences levelled off. In 1997, there was a decrease of 10% in the number of reported arson offences. However, in 1998, 2,700 arson offences were reported, a 7% increase over the 2,500 reported in 1997. In 1999, 2,500 arson offences were reported, a decrease of 8% from 1998.

Before 1991, approximately 20% of arson offences were cleared. Since that time, the average clearance rate has dropped to approximately 14%. This decrease in clearance rates is largely due to the wider definition of arson.

Disturbing the Peace

Disturbing the peace is defined as causing a disturbance in or near a public place. A "disturbance" includes behaviour such as fighting, making loud noise, using obscene language, and being drunk and disorderly.

Figure 31: Number and Rate of Disturb the Peace Offences, 1990 to 1999.



Police often deal with incidents of disturbing the peace through the municipal and provincial ticketing process.

Rather than proceeding under the Criminal Code, police often deal with incidents of disturbing the peace as offences under provincial statutes or municipal bylaws. This allows police to deal with these crimes through the municipal and provincial ticketing process.

In 1999, there were 22,900 disturbing the peace Criminal Code offences reported, representing an increase of 3% from 1998. The number of reported disturb the peace offences has fluctuated somewhat during the ten year period between 1990 and 1999, but has increased on average approximately 5% each year. In 1999, 64% of disturbing the peace offences were cleared.

Criminal Harassment

In 1993, the Criminal Code was amended to include the offence of criminal harassment. Criminal harassment, more commonly known as stalking, prohibits harassing and intimidating conduct that causes a person to fear for his or her safety or the safety of anyone known to him or her.

Criminal harassment is a distinct form of criminal activity involving a series of actions (as opposed to a single isolated event). When these actions are considered individually, they often do not constitute a crime (for example, sending notes or flowers). It is when these activities instill fear of injury that they represent a pattern of behaviour that is considered criminal.

During 1999, approximately 2,500 criminal harassment offences were reported in B.C. Almost 82% of criminal harassment charges were cleared (solved) and about 1,600 persons were charged with criminal harassment. Male adults represented 87% of persons charged with these offences.

Preliminary Criminal Harassment Survey Results

Police Services Division conducted a survey of criminal harassment incidents reported to the police in B.C. during 1995 and 1996. These data are currently being analyzed.

Preliminary survey findings indicate that victims of stalking are female in eight of ten incidents and that the accused are male in eight of ten incidents. Both the victim and the accused are likely to be between the ages of 25 and 45. The harassment occurs at either the victim's home or the victim's place of work in seven out of ten incidents. In nearly half of the incidents there is an intimate relationship between the victim and the accused. When there is an intimate relationship between the parties, in nine of ten incidents, the offender is an ex-boyfriend or an ex-spouse of the victim.

About two-thirds of the incidents are cleared (solved). One-third of incidents are cleared by charge while another third are cleared by other means.

More than half of the accused charged with criminal harassment have prior criminal records. Of those accused persons with prior criminal records, half have a record for violent offences and one in four have a record for weapons offences.

The accused is likely to be convicted of a criminal offence in one-third of the incidents proceeded with by Crown counsel.

In approximately half of the incidents proceeded with by Crown, the accused is not convicted. For those charges that result in a non-conviction, 80% are stayed (with or without a recognizance).

Criminal harassment legislation prohibits harassing and intimidating conduct that causes a person to fear for his or her safety.

Miscellaneous Other Criminal Code Offences

Those Criminal Code offences that do not have specific data collection codes are grouped in the category of "miscellaneous other" offences.

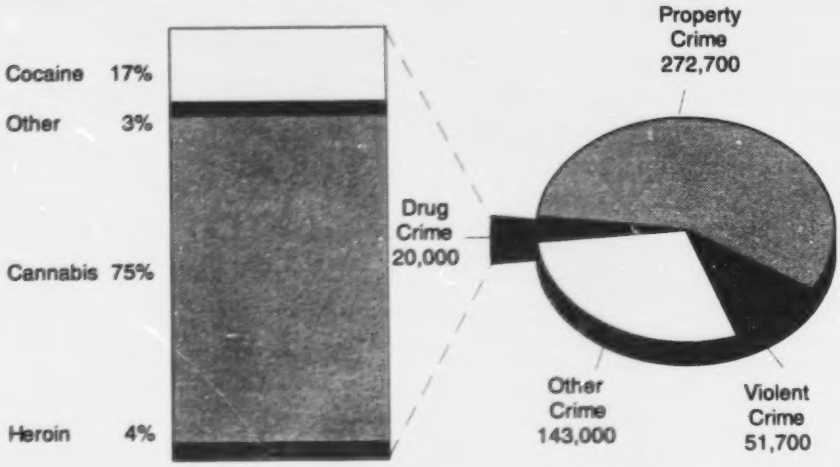
In 1999, there were 38,700 miscellaneous other Criminal Code offences reported, representing a decrease of 5% from 1998. In 1999, 65% of miscellaneous other offences were cleared (27% were cleared by charge and 38% were cleared by other means).

Police Services Division conducted a survey of 1995 miscellaneous other offences to determine the types of crimes that fall into this category. Results showed that 55% of the offences were uttering threats and 29% were harassing or indecent phone calls. Applications for peace bonds or restraining orders were the next largest category at 4%. The remaining 12% were various offences, including breach of peace, cruelty to animals, unlawfully in dwelling house, and possession of break-in instruments.

55% of miscellaneous other Criminal Code offences were uttering threats and 29% were harassing or indecent phone calls.

Drug Crime in British Columbia

Figure 32: Drug Crime by Category, 1999.



Prior to 1997, offences involving drugs fell under two federal statutes: the Narcotic Control Act (NCA) and the Food and Drugs Act (FDA). The Narcotic Control Act dealt with illicit drugs and the Food and Drugs Act covered controlled and restricted drugs. On May 14, 1997, the NCA and Parts III and IV of the FDA were repealed and replaced by the Controlled Drugs and Substances Act (CDSA). This consolidation of drug control legislation allowed for the control of precursors (substances used to make psychoactive substances), and dealt with the forfeiture of property and goods related to illegal drug activities.

Before the proclamation of the CDSA, drug offences were reported on the basis of six drug categories: heroin, cocaine, cannabis, other drugs, controlled drugs and restricted drugs. Under the CDSA there are now four categories of drug offences: heroin, cocaine, cannabis and other CDSA drugs. Generally speaking, the other CDSA drug category contains those drugs previously included in the other, controlled and restricted categories. The consolidation of illicit drugs into the new categories provided by the CDSA did not commence until mid-1997. As such, 1997 was a transition year in the reporting of drug offences, and 1998 represents the first complete calendar year in the reporting of illicit drug offences under the CDSA.

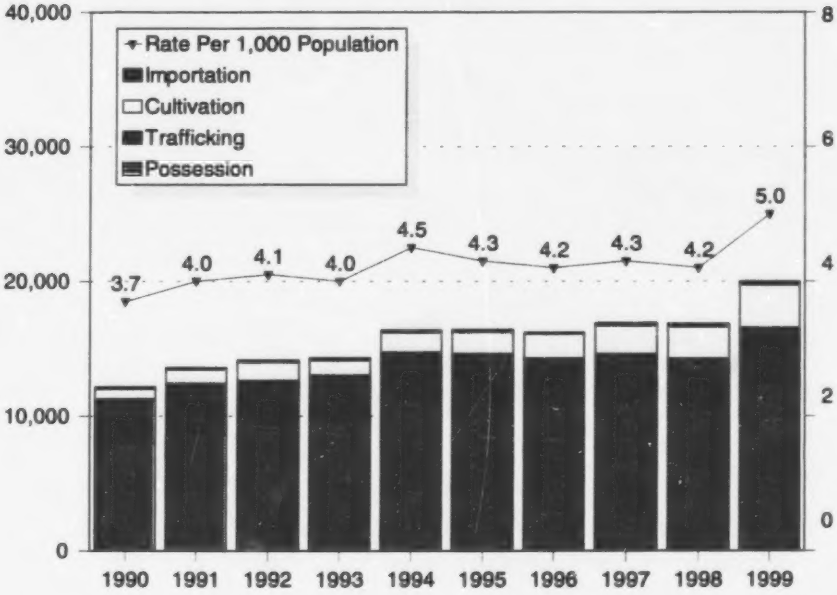
Drug Crime in 1999

The total number of drug-related federal statute offences reported in 1999 was 20,000. This represents a 19% increase in the number of drug offences reported over 1998. During the past decade the number of reported drug offences increased by 64%, from 12,200 in 1990 to 20,000 in 1999, representing a drug offence crime rate of five offences per 1,000 population.

It is important to keep in mind that drug offence data are volatile because the reporting of drug offences is directly influenced by changes in police enforcement practices. For example, decisions by policing organizations to crack down on marijuana grow operations are likely to result in an increase in the number of reported cultivation offences. Consequently, increases (or possible decreases) in the number of drug offences may be the result of enforcement policies rather than an actual change in the rate of drug use by the public. This may not always be the case, however, as drug use can be influenced by the invention of new illicit drugs, by changes in the availability of certain types of drugs, or by fads, such as the use of crack cocaine or methamphetamine.

On May 14, 1997, the Narcotic Control Act and Parts III and IV of the Food and Drugs Act were repealed and replaced by the Controlled Drugs and Substances Act.

Figure 33: Number and Rate of Drug Crimes, 1990 to 1999.

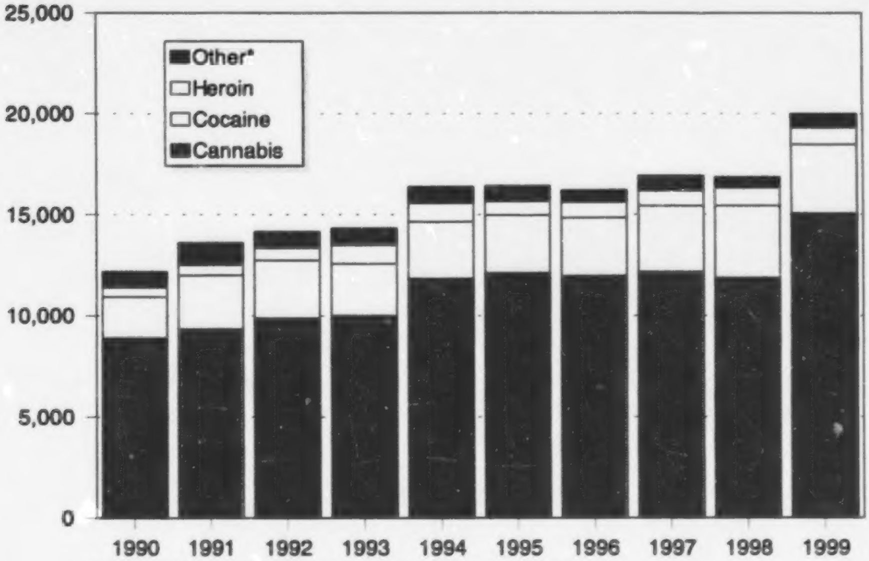


The types of drug offences include possession, trafficking, importation and cultivation. In 1999, possession offences represented 62% of all drug offences, while 21% were for trafficking, 16% for cultivation and 1% for importation. These proportions have remained relatively stable during the past decade, although cannabis cultivation offences increased 335% from 1990 to 1999 (from 700 offences in 1990 to 3,100 offences in 1999).

In 1999, 80% of all drug offences were cleared. Over the last ten years the percentage of drug offences cleared has fluctuated, ranging from a high of 82% in 1993, to a low of 73% in 1990. Of all drug offences, 35% were cleared by charge in 1999 and 46% were cleared by other means. Since 1992, the proportion of incidents cleared by charge has decreased, while the proportion of incidents cleared by other means has increased.

The number of drug offences cleared by charge is relatively low considering the nature of the crime. Lack of verification of ownership of seized or found drugs is the major contributing factor to low cleared by charge rates.

Figure 34: Drug Crimes by Type of Drug, 1990 to 1999.



** Other Includes Other Drugs, Restricted Drugs and Controlled Drugs*

Of the 8,800 people charged with drug offences in 1999, 8,100 (92%) were adults and 700 (8%) were youths. Males accounted for 83% (7,300 offenders) of persons charged, while the remaining 17% (1,500 offenders) were females.

About 75% of drug offences in 1999 involved cannabis. A further 17% involved cocaine. Of the remaining drug offences, 4% involved heroin (considered the most serious drug offence) and 3% involved other drugs.

Drug offence data are volatile because the reporting of drug offences is directly influenced by changes in police enforcement practices.

Cannabis

Cannabis includes hashish or marijuana in either powdered, leaf, liquid or resin form. Offences involving cannabis represented three-quarters of all drug offences in 1999, and have comprised most drug offences in B.C. over the past decade.

In 1999, there were 15,000 cannabis offences, 27% more than the 11,900 offences reported in 1998. Between 1990 and 1999, the number of cannabis offences increased by 69%, increasing from 8,900 offences reported in 1990 to 15,000 offences reported in 1999. In 1999, the crime rate for cannabis offences was four per 1,000 population.

Possession accounted for 68% of cannabis offences, and trafficking represented 11%, while cultivation and importation represented 21% and less than 1% respectively. Although the proportion of possession and importation offences has remained relatively stable in the last ten years, the proportion of trafficking and cultivation offences has fluctuated. Trafficking offences accounted for a high of 18% of all cannabis offences in 1990 and 1991, and a low of 9% in 1998. Cultivation offences have increased 335% in the past ten years. In 1990, cultivation offences represented 8% of cannabis offences compared with 21% in 1999.

Cocaine

The number of reported cocaine offences has increased 68% since 1990. In 1999, the 3,400 cocaine offences reported represented a 4% decrease from the 3,600 offences reported in 1998. Over the last ten years the crime rate for cocaine offences has never exceeded one crime per 1,000 persons.

In 1999, trafficking accounted for 58% of cocaine offences, while possession represented 40%. Importation offences made up only about 1% of all cocaine offences in 1999, and over the last decade it has remained the smallest category of cocaine offences.

About 75% of drug offences in 1999 involved cannabis.

Heroin

In the late 1980s, the number of heroin offences was relatively stable at approximately 280 offences each year. Between 1990 and 1994, however, the number of heroin offences more than tripled, reaching a high of 925 offences in 1994. The heroin crime rate has never exceeded one offence per 1,000 persons between 1990 and 1999 despite large fluctuations in the total number of offences.

In 1999, trafficking accounted for 47% of total heroin offences while possession accounted for 52% of total heroin offences. Importation offences accounted for the remaining 1% of offences. These proportions have fluctuated over the last ten years.

Other CDSA Drugs

The "other drugs" category comprises all narcotics (with the exclusion of heroin, cocaine, and cannabis) described by the Narcotic Control Act, in addition to illicit drugs described in Schedule F of the Food and Drugs Act. These include, for example, derivatives of the opium poppy (such as codeine, morphine and opium), antibiotics, anticoagulants, antidepressants and sex hormones. Beginning in mid-1997, the other drug category was renamed the "other CDSA drug" category and now includes the above noted substances along with many of the drugs previously included in the controlled and restricted drugs categories.

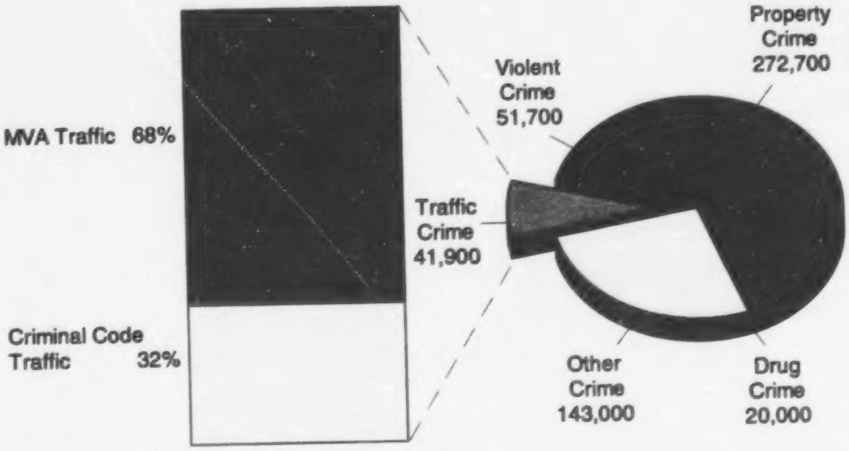
In 1999, there were 670 other drug offences reported, representing a 27% increase over the 530 reported in 1998. The number of offences in this category has fluctuated considerably over the last ten years. During this time period, the total number of other drug offences reached a low of 200 offences in 1995 and peaked at a high of 670 offences reported in 1999. Despite this increase, other drug offences have never exceeded one offence per 1,000 persons.

In 1999, 55% of other CDSA drug offences were for possession. Trafficking and importation represented 29% and 16% respectively. These proportions have fluctuated over the last ten years.

In 1999, 55% of other CDSA drug offences were for possession. Trafficking and importation represented 29% and 16% respectively.

Traffic Crime in British Columbia

Figure 35: Traffic Crime by Category, 1999.



In British Columbia, police report traffic offences under either the federal Criminal Code or the provincial Motor Vehicle Act. A total of 41,900 traffic offences were reported in 1999; 32% were Criminal Code offences and the remaining 68% were offences under the Motor Vehicle Act.

Criminal Code: Traffic

Criminal Code traffic offences are collected under the categories of impaired or dangerous operation of a vehicle (including motor vehicles, boats, vessels, and aircraft), failure to stop at the scene of an accident, driving a vehicle while prohibited from doing so, and failing or refusing to provide either a breath or blood sample upon demand by police.

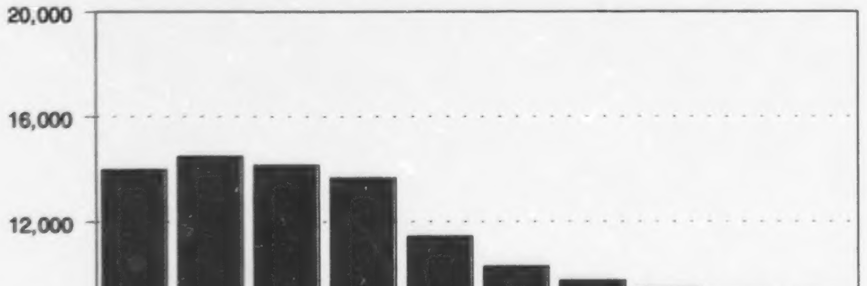
In 1999, there were 13,500 Criminal Code traffic offences reported by the police. From 1990 to 1999, the number of Criminal Code traffic offences reported by the police declined by 60%.

Of the 13,500 Criminal Code traffic offences reported in 1999, 9,200 or 68% were reported in the impaired operation of a vehicle category. The majority of these (99%) were for impaired operation or driving with a blood alcohol level over .08%; approximately 1% were for impaired operation causing bodily harm; and less than 1% were for impaired operation causing death.

Although impaired operation of a vehicle has historically represented the greatest proportion of Criminal Code traffic offences — 42% in 1990 and more than two-thirds in 1999 — the frequency of this type of offence has decreased 34% over the past ten years. Increased police enforcement, anti-drinking and driving campaigns, societal pressure, and joint police and government safety initiatives are thought to have combined to reduce the number of these offences. However, it should be noted that as the number of reported Criminal Code impaired operation crimes has declined, the number of administrative prohibitions (24-hour roadside suspensions) has increased. One possible reason for the diverging trend is that a driving prohibition under provincial legislation can be issued on the suspicion by a peace officer that a person's ability to drive is impaired. In order to lay charges under the Criminal Code, on the other hand, clinically based evidence such as blood or breath samples is normally required.

Increased police enforcement and initiatives such as anti-drinking and driving campaigns are thought to have combined to reduce the number of impaired operation of motor vehicle offences.

Figure 36: Number of Impaired Operation Offences, 1990 to 1999.

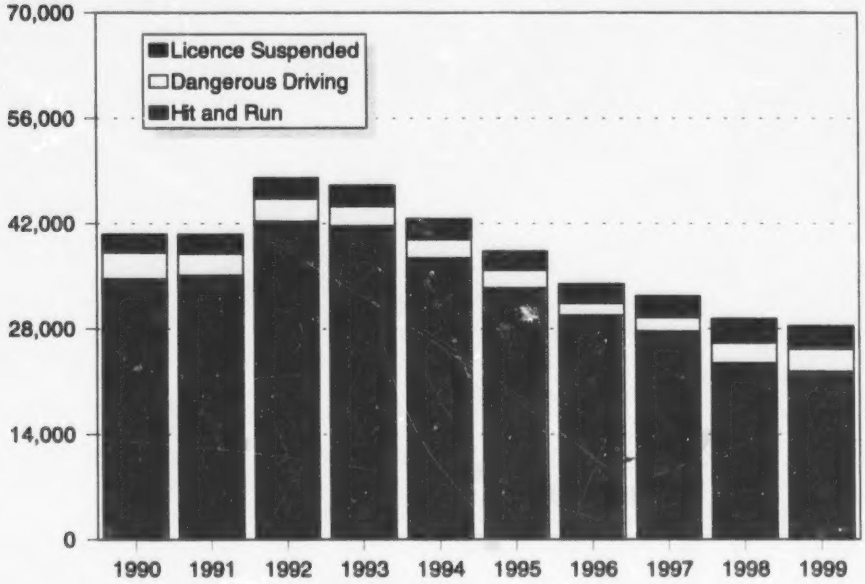


The remaining 32% of Criminal Code traffic offences in 1999 included the following: failure to stop or remain at the scene of an accident (14%), driving a motor vehicle while prohibited (7%), not providing a breath or blood sample upon demand (6%), and dangerous operation of a motor vehicle (5%).

Provincial Statutes: Traffic

Under the UCR Survey, only three categories of traffic offences covered by the provincial Motor Vehicle Act are counted. These include the following: failure to stop or remain at the scene of an accident (hit and run), dangerous driving, and driving while licence suspended.

Figure 37: Number of Provincial Statute Traffic Offences, 1990 to 1999.



In 1999, there were 28,400 Motor Vehicle Act traffic offences ... 79% of these were for hit and run.

In 1999, there were 28,400 Motor Vehicle Act traffic offences reported in B.C. Approximately 79% of these offences were for hit and run; 11% were for driving with a suspended licence; and 11% were for dangerous driving.

APPENDIX A-1 FOOTNOTES

[1] The 1999 population figure includes municipal and First Nations Reserve populations.

[2] Five municipalities exceeded 5,000 population in the 1996 Census and became responsible for their policing services on April 1, 1997. They are: Hope, Ladysmith, Lake Country, Spallumcheen and Whistler. Offence data for these jurisdictions reflects the entire year. The police strengths shown reflect their strength at the end of their proposed phase-in periods. Note that the costs shown for these five municipalities may not represent their total costs for policing in 1999. Fernie's population fell below 5,000 in the 1996 Census, and as a result, reverted to a solely provincial policing jurisdiction on April 1st, 1997.

[3] Oceanside detachment was formerly known as Parksville detachment.

[4] Authorized police strengths and their associated costs for ten jurisdictions have been adjusted to exclude secondments to other agencies (e.g. Justice Institute-B.C. Police Academy, ITCU Photo Radar, OCABC), as reported to Police Services for calendar year 1999. The only jurisdictions not reporting secondments were Central Saanich and Oak Bay.

APPENDIX A-1 DATA QUALIFIERS

1. Canada Census occurred in 1996. The population figures for 1999 contained in this report are estimates based on 1996 Census data. The population in the 1996 Census determines which population category (5,000 to 15,000 or over 15,000 population) a municipality policed by the RCMP is in. Five municipalities exceeded 5,000 population in the 1996 Census and became responsible for their policing services in April 1997. Three municipalities: Courtenay, Fort St. John and Salmon Arm exceeded 15,000 population in the 1996 Census and moved from the 5,000 to 15,000 category to the over 15,000 population category.

2. Population figures reflect the "resident" or "late night" population of a jurisdiction or municipality, rather than the number of people who spend some part of the day in the area either for business or pleasure purposes. Furthermore, populations do not take into account "resident non-residents", i.e. cottage/chalet owners or students residing at universities or colleges whose permanent residence is within another jurisdiction.

3. Authorized police strength is based on the authorized police strength as of December 31, 1999. The authorized strength of the RCMP is obtained from RCMP "E" Division Headquarters. The authorized strength of the independent jurisdictions is collected annually from each department.

4. "Total Costs" refer to actual and not authorized (or budgeted) costs in calendar year 1999, as reported by each municipality, to Police Services. For the municipalities policed by the RCMP, "Total Costs" include the municipality's share of RCMP contract costs, plus those costs borne 100% by the municipality which are over and above the contract costs, such as support staff and accommodation. If a municipality included the costs of Bylaw enforcement or victim services programs in their actual expenditures, these have been excluded from "Total Costs". "Total Costs" also do not include capital expenditures, such as major construction projects, and they are also exclusive of any revenues. Note that some variation exists between jurisdictions with respect to the cost items that are included in their policing budgets.

5. The offence data contained in this report have been recorded by the police on the Uniform Crime Reporting (UCR) Survey. Offences are scored according to the UCR Scoring Rules. If a single criminal incident contains a number of violations of the law, then only the most serious one is recorded for UCR purposes. However, with the exception of robbery offences where one incident with multiple victims is scored as one offence, police record one offence for every victim of a "violent" crime, e.g. homicide, attempted murder, sexual and non-sexual assault, and abduction. CCC Offences represents only those offences reported to, or discovered by police which, upon preliminary investigation, have been deemed to have occurred or been attempted; this data does not represent or imply a count of the number of charges laid, prosecutions conducted, informations sworn or convictions obtained.

6. CCC Offences include Criminal Code-Property, Person and Other offences. Criminal Code-Property offences include break and enters, motor vehicle thefts, theft over and less than $5000, fraud, and possession of stolen property. Criminal Code-Person offences include violent crimes such as homicides, attempted murder, sexual and non sexual assaults, robbery and abduction. Criminal Code-Other offences include prostitution, gaming and betting, possession of offensive weapons, as well as arson, bail violations, disturb the peace, and mischief and property damage (vandalism). Criminal Code-Traffic offences are not included in CCC offences.

APPENDIX A-1 FOOTNOTES

[1] The 1999 population figure includes municipal and First Nations Reserve populations.

[2] Five municipalities exceeded 5,000 population in the 1996 Census and became responsible for their policing services on April 1, 1997. They are: Hope, Ladysmith, Lake Country, Spallumcheen and Whistler. Offence data for these jurisdictions reflects the entire year. The police strengths shown reflect their strength at the end of their proposed phase-in periods. Note that the costs shown for these five municipalities may not represent their total costs for policing in 1999. Fernie's population fell below 5,000 in the 1996 Census, and as a result, reverted to a solely provincial policing jurisdiction on April 1st, 1997.

[3] Oceanside detachment was formerly known as Parksville detachment.

[4] Authorized police strengths and their associated costs for ten jurisdictions have been adjusted to exclude secondments to other agencies (e.g. Justice Institute-B.C. Police Academy, ITCU Photo Radar, OCABC), as reported to Police Services for calendar year 1999. The only jurisdictions not reporting secondments were Central Saanich and Oak Bay.

APPENDIX A-1 DATA QUALIFIERS

1. Canada Census occurred in 1996. The population figures for 1999 contained in this report are estimates based on 1996 Census data. The population in the 1996 Census determines which population category (5,000 to 15,000 or over 15,000 population) a municipality policed by the RCMP is in. Five municipalities exceeded 5,000 population in the 1996 Census and became responsible for their policing services in April 1997. Three municipalities: Courtenay, Fort St. John and Salmon Arm exceeded 15,000 population in the 1996 Census and moved from the 5,000 to 15,000 category to the over 15,000 population category.

2. Population figures reflect the "resident" or "late night" population of a jurisdiction or municipality, rather than the number of people who spend some part of the day in the area either for business or pleasure purposes. Furthermore, populations do not take into account "resident non-residents", i.e. cottage/chalet owners or students residing at universities or colleges whose permanent residence is within another jurisdiction.

3. Authorized police strength is based on the authorized police strength as of December 31, 1999. The authorized strength of the RCMP is obtained from RCMP "E" Division Headquarters. The authorized strength of the independent jurisdictions is collected annually from each department.

4. "Total Costs" refer to actual and not authorized (or budgeted) costs in calendar year 1999, as reported by each municipality, to Police Services. For the municipalities policed by the RCMP, "Total Costs" include the municipality's share of RCMP contract costs, plus those costs borne 100% by the municipality which are over and above the contract costs, such as support staff and accommodation. If a municipality included the costs of Bylaw enforcement or victim services programs in their actual expenditures, these have been excluded from "Total Costs". "Total Costs" also do not include capital expenditures, such as major construction projects, and they are also exclusive of any revenues. Note that some variation exists between jurisdictions with respect to the cost items that are included in their policing budgets.

5. The offence data contained in this report have been recorded by the police on the Uniform Crime Reporting (UCR) Survey. Offences are scored according to the UCR Scoring Rules. If a single criminal incident contains a number of violations of the law, then only the most serious one is recorded for UCR purposes. However, with the exception of robbery offences where one incident with multiple victims is scored as one offence, police record one offence for every victim of a "violent" crime, e.g. homicide, attempted murder, sexual and non-sexual assault, and abduction. CCC Offences represents only those offences reported to, or discovered by police which, upon preliminary investigation, have been deemed to have occurred or been attempted; this data does not represent or imply a count of the number of charges laid, prosecutions conducted, informations sworn or convictions obtained.

6. CCC Offences include Criminal Code-Property, Person and Other offences. Criminal Code-Property offences include break and enters, motor vehicle thefts, theft over and less than $5000, fraud, and possession of stolen property. Criminal Code-Person offences include violent crimes such as homicides, attempted murder, sexual and non sexual assaults, robbery and abduction. Criminal Code-Other offences include prostitution, gaming and betting, possession of offensive weapons, as well as arson, bail violations, disturb the peace, and mischief and property damage (vandalism). Criminal Code-Traffic offences are not included in CCC offences.

APPENDIX A-1 DATA QUALIFIERS CONTINUED

7. Crime rate is defined as the number of Criminal Code offences (Excluding Traffic) per 1,000 population. It is based on the number of crimes occurring within each jurisdiction and on the resident population. Crime rate is based on a population which excludes tourists, commuters, or "part time" residents such as students or cottage/chalet owners. Crime rates for municipalities do not take into account the "core city syndrome" in which a number of people spend some part of the day in the city for either business or pleasure purposes, i.e. tourists and commuters.

8. Many municipalities exhibit what is commonly referred to as the "core city syndrome". These cities are surrounded by urban or unincorporated areas which have substantial residential populations. As a result, the crime rates would be lower for the combined populated areas than for those municipalities by themselves.

9. Criminal Code Case Burden is defined as the number of Criminal Code offences (Excluding Traffic) per authorized police strength. The total number of Criminal Code offences and the authorized police strength as of December 31, 1999 are used to calculate case burden.

10. Comparisons between the case burdens of independent municipal forces and RCMP municipal forces may be erroneous due to differences in the organizational structures of the RCMP and independent municipal forces. The RCMP municipal forces may have a relatively lower sworn strength because of the administrative support provided by "E" Division Headquarters.

11. Populations, crime rates and case burdens are only three of the many factors used to determine the strength and organization of a police force. A number of other factors, such as size, accessibility of the area to be policed, and traffic volume are also taken into consideration. Case burdens and crime rates also do not reflect the time spent by police providing general assistance to the public, or participating in crime prevention programs, or enforcing traffic laws.

12. Summary data and statistics for the independent and RCMP municipal Forces are shown as the last line of each Table. The Criminal Code case burden, and crime rate are generated from the totals, and do not represent the average of the rates for each individual jurisdiction.

Appendix A-2: Contribution to Policing by Level of Government, 1999

APPENDIX A-2 FOOTNOTES

[1] Municipalities policed by the RCMP are categorized into two groups according to their population: 5,000 to 15,000 or over 15,000 population. Population figures for 1999 are estimates based on the results of the 1996 Canada Census.

[2] The unincorporated areas of the province make no direct contribution towards their policing services. However, the rural property tax collected by the province from residents in the unincorporated areas serves to offset, to some degree, the cost of policing rural communities.

APPENDIX A-2 DATA QUALIFIERS

1. All expenditure figures shown above for the Federal and Provincial governments represent the costs paid in fiscal year 1999/2000. The expenditure figures for municipalities with independent and RCMP municipal forces represent the costs paid by them in calendar year 1999. ***Federal and provincial government contributions are preliminary, pending a final reconciliation of RCMP municipal and provincial force contract costs.***

2. Expenditure figures for the 59 municipalities with RCMP municipal forces include both the contract costs, and those costs paid by the municipality which are over and above the contract costs (for example, support staff salaries and benefits, and accommodation costs). These figures exclude Bylaw enforcement and victim services program costs where municipalities have this in their policing budget. The Federal government contributions to policing include their share of municipal and provincial policing costs. These figures only represent their share of the contract costs, and exclude costs borne by the Federal government which are over and above the contract costs. These figures also exclude the costs to Canada for Federal Force members operating in B.C. ***Federal government contributions are preliminary, pending a final reconciliation of RCMP municipal and provincial contract costs.***

3. Canada Census occurred in 1996. The population figures for 1999 in this report are estimates based on 1996 Census data. The population in the 1996 Census determines which population category (5,000 to 15,000 or over 15,000 population) a municipality policed by the RCMP is in. Five municipalities exceeded 5,000 population in the 1996 Census and became responsible for their policing services in April 1997. Three municipalities: Courtenay, Fort St. John and Salmon Arm exceeded 15,000 population in the 1996 Census and moved from the 5,000 to 15,000 category to the over 15,000 population category. Fernie's population fell below 5,000 in the 1996 Census, and as a result, Fernie reverted to a solely provincial jurisdiction on April 1, 1997.

4. Five municipalities exceeded 5,000 population in the 1996 Census and became responsible for their policing services on April 1, 1997. They are: Hope, Ladysmith, Lake Country, Spallumcheen and Whistler. Note that the costs for these five municipalities are included in the 5,000 to 15,000 population group. Hope received a Local Government Restructure Grant for Policing (LGRGP) totaling $231,635 in 1999 from the provincial government. This amount has been deducted from the total costs reported by municipal governments in the 5,000 to 15,000 population category.

5. The unincorporated areas of the province make no direct contribution towards their policing services. However, part of the rural property tax levy could be considered as partially offsetting their police costs.

6. In 1999/2000, under RCMP Policing Agreements, municipalities over 15,000 population were paying 90% of their contract policing costs, and municipalities between 5,000 and 15,000 were paying 70% of their contract costs. In the same years the Province was paying 70% of provincial policing costs.

APPENDIX A-3 FOOTNOTES

[1] In 1999 the overall strength of RCMP Division Administration increased by 3 positions. In departmental administration three lawyers (Appropriate Officer Representatives) were added; there was also a net increase of two positions dedicated to firearms registration. However, division administration lost two fitness and lifestyle advisory positions, cancelling out the two firearms registration positions. In 1998 the strength of RCMP Division Administration was increased by 18 positions: sixteen firearms registration positions and three other administrative positions were added to departmental administration; one position was decreased in the staffing and personnel services area. In 1997 the strength of RCMP Division Administration was decreased by eight positions in the areas of internal affairs, staffing and departmental administration. In 1996 the strength was decreased by twelve positions in the areas of information (informatics) and training services. In 1993 the strength was increased by seven positions in the areas of financial services and internal investigations. In 1992 the strength was increased by thirteen positions in the areas of data processing, staffing, and personnel services.

[2] In 1999 the strength of Federal Criminal Law increased by twenty-two positions. Eleven positions were added to E Division's criminal analysis section, three positions were added in federal protection intelligence support, five positions were added in the Vancouver criminal intelligence section, and three positions were added in district criminal intelligence and proceeds of crime. In 1998 the strength of Federal Criminal Law decreased by one position in the area of foreign and domestic support. In 1997 the strength of Federal Criminal Law was increased by seven positions in the areas of drug enforcement and awareness, and proceeds of crime enforcement. In 1996 the strength was decreased by five positions in the area of immigration and passport services. In 1995 the strength was decreased by six positions in the areas of investigative and support services. In 1994 the strength was increased by three positions assigned to the proceeds of crime section. In 1993 the strength was increased by six positions in the areas of drug enforcement and investigative services. In 1992 the strength of Federal Criminal Law was increased by nineteen positions in the areas of drug enforcement and anti-smuggling operations.

[3] In 1993 and 1994 the strength of the RCMP First Nations Policing Program increased each year by eleven positions to provide Aboriginal Community Constables (ACCP) and First Nations Community Policing Services (FNCPS). The Aboriginal Community Constables were known as Indian Special Constables before 1993. In 1999 there were 32 ACCP and 39 FNCPS positions.

[4] In 1997 the strength of International Airports was decreased by 65 positions as a result of Richmond Municipal Detachment assuming policing responsibility for Vancouver International Airport from the RCMP Federal Force. In 1994 the strength of International Airports was decreased by twelve positions — eight at Vancouver International Airport and four at Victoria International Airport. In 1993 the strength of International Airports was decreased by six positions as a result of Federal Treasury Board policy directives.

[5] In 1998 the strength of Protective Policing decreased by four positions assigned to departmental security and security systems education. In 1997 the strength of Protective Policing increased by two positions assigned to VIP services. In 1996 the strength of Protective Policing was decreased by three positions in the area of diplomatic protection services. In 1995 the strength of Protective Policing was decreased by ten positions: six in the area of counter-surveillance and four after the completion of the Commonwealth Games. In 1994 the strength of Protective Policing was decreased by ten positions in the area of diplomatic protection. In 1993 the strength of Protective Policing was decreased by twelve positions as a result of Treasury Board policy directives.

APPENDIX A-3 FOOTNOTES

[1] In 1999 the overall strength of RCMP Division Administration increased by 3 positions. In departmental administration three lawyers (Appropriate Officer Representatives) were added; there was also a net increase of two positions dedicated to firearms registration. However, division administration lost two fitness and lifestyle advisory positions, cancelling out the two firearms registration positions. In 1998 the strength of RCMP Division Administration was increased by 18 positions: sixteen firearms registration positions and three other administrative positions were added to departmental administration; one position was decreased in the staffing and personnel services area. In 1997 the strength of RCMP Division Administration was decreased by eight positions in the areas of internal affairs, staffing and departmental administration. In 1996 the strength was decreased by twelve positions in the areas of information (informatics) and training services. In 1993 the strength was increased by seven positions in the areas of financial services and internal investigations. In 1992 the strength was increased by thirteen positions in the areas of data processing, staffing, and personnel services.

[2] In 1999 the strength of Federal Criminal Law increased by twenty-two positions. Eleven positions were added to E Division's criminal analysis section, three positions were added in federal protection intelligence support, five positions were added in the Vancouver criminal intelligence section, and three positions were added in district criminal intelligence and proceeds of crime. In 1998 the strength of Federal Criminal Law decreased by one position in the area of foreign and domestic support. In 1997 the strength of Federal Criminal Law was increased by seven positions in the areas of drug enforcement and awareness, and proceeds of crime enforcement. In 1996 the strength was decreased by five positions in the area of immigration and passport services. In 1995 the strength was decreased by six positions in the areas of investigative and support services. In 1994 the strength was increased by three positions assigned to the proceeds of crime section. In 1993 the strength was increased by six positions in the areas of drug enforcement and investigative services. In 1992 the strength of Federal Criminal Law was increased by nineteen positions in the areas of drug enforcement and anti-smuggling operations.

[3] In 1993 and 1994 the strength of the RCMP First Nations Policing Program increased each year by eleven positions to provide Aboriginal Community Constables (ACCP) and First Nations Community Policing Services (FNCPS). The Aboriginal Community Constables were known as Indian Special Constables before 1993. In 1999 there were 32 ACCP and 39 FNCPS positions.

[4] In 1997 the strength of International Airports was decreased by 65 positions as a result of Richmond Municipal Detachment assuming policing responsibility for Vancouver International Airport from the RCMP Federal Force. In 1994 the strength of International Airports was decreased by twelve positions — eight at Vancouver International Airport and four at Victoria International Airport. In 1993 the strength of International Airports was decreased by six positions as a result of Federal Treasury Board policy directives.

[5] In 1998 the strength of Protective Policing decreased by four positions assigned to departmental security and security systems education. In 1997 the strength of Protective Policing increased by two positions assigned to VIP services. In 1996 the strength of Protective Policing was decreased by three positions in the area of diplomatic protection services. In 1995 the strength of Protective Policing was decreased by ten positions: six in the area of counter-surveillance and four after the completion of the Commonwealth Games. In 1994 the strength of Protective Policing was decreased by ten positions in the area of diplomatic protection. In 1993 the strength of Protective Policing was decreased by twelve positions as a result of Treasury Board policy directives.

APPENDIX A-3 FOOTNOTES CONTINUED

[6] Provincial Force Headquarters provides specialized policing services and functions at the provincial level, e.g. log theft unit, anti-tobacco smuggling unit, unsolved homicide unit, etc. In 1999, there was a decrease of five positions in the Security Frauds Investigations office. In 1998, there was an increase of twelve positions: six for the auto theft task force, five in operational support and one for Substance Abuse Education. In 1997, there was a net increase of five positions. There were increases of twelve positions in Anti-Tobacco Smuggling, two Proceeds of Crime, three Criminal Intelligence and six Technical Services positions, but decreases of four Telecommunications and fourteen Operational Support positions. In 1996 the strength of Provincial Force Headquarters increased by thirty-eight positions: twelve of these were for the unsolved homicide squad, four were for Liquor Act enforcement, and most of the balance were for operational support. In 1992 the strength was increased by ten positions re-allocated from the Extended Contract detachments to telecommunication services. In 1990 the responsibility for telecommunication services was transferred from Subdivision Headquarters to Provincial Force Headquarters, resulting in an increase of strength for the latter.

[7] In 1997 the RCMP restructured its eight subdivisions into four districts known as Island, North, Southwest, and Southeast. Each District Headquarters provides specialized policing services and functions at the regional level, e.g. clerical/administrative services, communication centres, patrol vessels, and air services. In 1998, there was a net decrease of seventeen positions at District Headquarters. There was a decrease of thirty-three positions in operational support: these were District, Section, and Co-ordinator positions. There were increases of seven investigation, three telecommunications, four substance abuse education and two other support positions for a total of sixteen. In 1997, there was a net increase of fifty-four positions at District Headquarters. There was an increase of thirty-three positions at Communications Centres and twenty positions in operational support due to restructuring of subdivisions into districts. There was an increase of four other positions in intelligence and other support services. There was a decrease of three positions in investigation and identification services at the District level. In 1996 there was a net increase of five positions assigned to subdivision Headquarters. There were increases of four positions in telecommunications, two in identification and three in dog squads; there were decreases of one position in operational support and three in marine services. In 1992 the strength was increased by eleven positions re-allocated from the Extended contract detachments to patrol vessels and telecommunications services. In 1990 the responsibility for telecommunications was transferred from Subdivision Headquarters to Provincial Force Headquarters, resulting in a decrease for Subdivision Headquarters.

[8] Provincial Force Detachments provide policing services to municipalities under 5,000 population, as well as to the unincorporated areas of the Province. Provincial Force Detachments are usually named after a municipality; however, if a municipality is under 5,000 population the detachment polices not only the municipality but also the unincorporated or rural area surrounding it. If a municipality is over 5,000 population, the Provincial Force Detachment polices only the surrounding or unincorporated area. The specialized functions at Provincial Force Detachments include sworn members assigned to specialized police services at the community level, i.e. forensic identification, crime prevention, victim services, and police dogs. In 1996, as a result of changes in reporting responsibility, twenty-five positions assigned to community service (specialized) functions were transferred from Provincial Force Detachments to District Headquarters. In 1992 the strength was decreased by forty-one positions re-allocated from the Extended contract detachments to traffic enforcement and Provincial Force and Subdivision Headquarters.

[9] In 1999 the strength for Traffic Enforcement was increased by five photo radar positions and decreased by one traffic services position at E Division. Therefore, there was a net increase of four positions in dedicated traffic enforcement. In 1998 the strength for Traffic Enforcement was increased by two photo radar positions. In 1997 there was a net increase in the strength for Traffic Enforcement of one position (net decrease of one Highway Patrol and increase of two Traffic NCO/Analyst positions). In 1996 the strength for Traffic enforcement was increased by forty-two Photo Radar and two Highway Patrol positions at detachments, but decreased by ten Traffic NCO and Analyst positions and four Highway Patrol positions not reportable to detachments, for a net gain of thirty positions. In 1995, Traffic enforcement strength increased by forty-one positions as a result of the Photo Radar Project. In 1992 the strength was increased by twenty-one positions re-allocated from the Extended Contract Detachments.

[10] In 1981 Canada Census indicated that seven municipalities — Coldstream, Fernie, North Saanich, Parksville, Pitt Meadows, Port Hardy, and Revelstoke — exceeded 5,000 population. The 1986 Canada Census indicated that the Municipality of Colwood was also over 5,000 population. Since their populations were officially over 5,000 persons, these municipalities pursuant to the Police Act and Municipal Act became responsible for their police services. Instead of contracting for RCMP Municipal police services, it was agreed that the Provincial Force would "extend" police services to these eight municipalities on a fee for service basis, and the municipalities would reimbruse the Province for the Provincial Force police services they received. In 1992 seven of these municipalities contracted for RCMP Municipal police services; the eight municipality, Fernie, entered into an RCMP Municipal contract in 1994. In 1997 Fernie reverted to a provincial policing jurisdiction based on the result of the 1996 Canada Census which placed its population below 5,000 persons. Five municipalities — Hope, Ladysmith, Lake Country, Spallumcheen, and Whistler — exceeded 5,000 population in the 1996 Census, however, and became responsible for their policing services on April 1, 1997.

[11] In British Columbia a municipality under the Police Act and Municipal Act becomes responsible for its police services when the Canada Census indicates its population exceeds 5,000 persons. In 1999 there were twelve municipalities which operated their own independent police departments, and fifty-nine which contracted with the RCMP for municipal police services.

[12] In 1999 there were four First Nations Administered Police Services: Stl'atl'imx Tribal Police; Kitasoo-Xaixais Public Safety Department; Dididaht First Nation Public Safety and Policing Service; and Tsewultun Police Service. These police services are autonomous and independent of the RCMP.

APPENDIX A-3 DATA QUALIFIERS

1. The police strength of the RCMP is obtained from the EO-5 Report, and is based on the authorized strength as of December 31st of each calendar year. Authorized strength includes all sworn members and sworn civilian members. Police strength for the RCMP forces does not include non-sworn civilian support staff, bylaw enforcement officers, or RCMP Auxiliary Police.

2. The police strength of the Twelve Independent Municipal Forces is submitted annually to Police Services, and is based on the authorized strength as of December 31st of each calendar year. Police strength for the Independent Forces does not include non-sworn civilian support staff, bylaw enforcement officers or reserve police officers.

APPENDIX A-4 AND A-5 FOOTNOTES

[1] The following provincial policing jurisdictions have either been closed or opened as a result of RCMP detachment restructures. In 1992, Cassiar detachment was closed and the Dease Lake detachment assumed policing responsibilities for the area. In 1995, as a result of Mackenzie detachment being restructured, Tsay Keh Dene detachment was opened. In 1997, Field detachment was closed and the Golden detachment assumed policing responsibilities for the area. In 1998 Radium Hot Springs detachment was closed and the Columbia Valley detachment assumed policing responsibilities for the area.

[2] The Police Act and Municipal Act state that when the population of a municipality reaches 5,000 persons as a result of Canada Census it must assumed responsibility for its police services. These municipalities may form their own independent police forces or contract with the RCMP for municipal police services. In 1992, the municipalities of Sechelt and View Royal became responsible for their police services. In 1993, the municipality of Qualicum Beach became responsible for its police services. In 1994, the municipalities of Smithers and Langford became responsible for their police services. In 1997, the municipalities of Spallumcheen, Lake Country, Hope, Whistler and Ladysmith became responsible for their police services. All of the aforementioned municipalities contracted with the RCMP for their municipal police services.

[3] In 1997, as a result of the 1996 Canada Census, the population of the municipality of Fernie dropped below 5,000 persons and Fernie reverted to a provincial policing jurisdiction.

[4] In 1995, the municipalities of Abbotsford and Matsqui were amalgamated. As a result, the Abbotsford Municipal RCMP detachment and the Matsqui Police Department were formed into an independent police force called the Abbotsford Police Department.

[5] From 1989 to 1994, data for North Vancouver provincial detachment is included in Bowen Island provincial detachment.

[6] Population figures also include First Nations Reserve populations.

[7] Provincial parks are located within the policing jurisdictions of North Vancouver Prov and Ridge Meadows Prov. The crime rates for both of these policing jurisdictions are inflated due to small residential populations and the relatively large amount of property crimes occurring within the parks.

APPENDIX A-4 AND A-5 FOOTNOTES

[1] The following provincial policing jurisdictions have either been closed or opened as a result of RCMP detachment restructures. In 1992, Cassiar detachment was closed and the Dease Lake detachment assumed policing responsibilities for the area. In 1995, as a result of Mackenzie detachment being restructured, Tsay Keh Dene detachment was opened. In 1997, Field detachment was closed and the Golden detachment assumed policing responsibilities for the area. In 1998 Radium Hot Springs detachment was closed and the Columbia Valley detachment assumed policing responsibilities for the area.

[2] The Police Act and Municipal Act state that when the population of a municipality reaches 5,000 persons as a result of Canada Census it must assumed responsibility for its police services. These municipalities may form their own independent police forces or contract with the RCMP for municipal police services. In 1992, the municipalities of Sechelt and View Royal became responsible for their police services. In 1993, the municipality of Qualicum Beach became responsible for its police services. In 1994, the municipalities of Smithers and Langford became responsible for their police services. In 1997, the municipalities of Spallumcheen, Lake Country, Hope, Whistler and Ladysmith became responsible for their police services. All of the aforementioned municipalities contracted with the RCMP for their municipal police services.

[3] In 1997, as a result of the 1996 Canada Census, the population of the municipality of Fernie dropped below 5,000 persons and Fernie reverted to a provincial policing jurisdiction.

[4] In 1995, the municipalities of Abbotsford and Matsqui were amalgamated. As a result, the Abbotsford Municipal RCMP detachment and the Matsqui Police Department were formed into an independent police force called the Abbotsford Police Department.

[5] From 1989 to 1994, data for North Vancouver provincial detachment is included in Bowen Island provincial detachment.

[6] Population figures also include First Nations Reserve populations.

[7] Provincial parks are located within the policing jurisdictions of North Vancouver Prov and Ridge Meadows Prov. The crime rates for both of these policing jurisdictions are inflated due to small residential populations and the relatively large amount of property crimes occurring within the parks.

APPENDIX A-4 AND A-5 DATA QUALIFIERS

1. The Provincial Force provides policing services to municipalities under 5,000 population, as well as to the unincorporated areas of the province. If a municipality is under 5,000 population, the Provincial Force polices not only the municipality but also the unincorporated or rural area surrounding it. If a municipality is over 5,000 population, the Provincial Force polices only the surrounding unincorporated area.

2. The police strength for municipal force jurisdictions (Mun) represents the number of sworn members assigned to a detachment or municipal department but does not include civilian members, support staff and bylaw enforcement officers. The police strength for provincial force jurisdictions (Prov) represents the number of police assigned to general duty and general investigation functions but does not include police assigned to specialized functions such as highway patrol or forensic identification.

3. The offence data contained in Appendix A5 have been recorded by the police according to the Uniform Crime Reporting (UCR) Survey crime scoring rules (see section "Overview of Crime Data Collection Procedures in British Columbia" in this report for a detailed explanation of these rules).

4. The crime rate is defined as the number of Criminal Code offences (excluding traffic offences) per 1,000 population. Population figures are estimates based on the results of the 1996 Canada Census. These figures reflect the "resident" population of a jurisdiction and exclude commuters, students, tourists and other part-time residents. Municipal crime rates do not necessarily reflect the relative safety of one municipality over another. More often than not, a high crime rate indicates that a municipality is a core city or tourist destination. Core cities are usually surrounded by unincorporated areas or other municipalities that have large residential populations. Core cities are also the business and entertainment centres for many people who reside outside, as well as inside, the municipality. Core cities may also have a large "part-time" population relative to the resident population. Part-time residents include tourists, cottage or chalet owner, students and seasonal staff. If core cities expanded their boundaries to include residential areas outside their borders, the crime rate for the combined populated area would be considerably lower than the municipality itself. Similarly, if tourist destinations included part-time residents in their population base, their crime rates would be substantially lower.

5. The case burden is defined as the number of Criminal Code offences (excluding traffic offences) per authorized police strength. Because it represents the workload per officer in each policing jurisdiction, the case burden is a better indicator of the demand for police services than either population or crime rate. In Appendix A5, the total number of Criminal Code offences in 1999, and the authorized police strength as of December 31, 1999, are used to calculate the case burden. Comparisons between the case burdens of independent municipal forces and RCMP municipal forces may be erroneous due to differences in the organizational structures of the RCMP and independent municipal forces. The RCMP municipal forces may have a relatively lower sworn strength because of the administrative support provided by "E" Division Headquarters.

6. Case burden, crime rate and population are only three of the many factors used to determine the strength and organization of a police force. A number of other factors, such as size, accessibility of the area to be policed and traffic volume are also take into consideration. Case burden and crime rate also do not reflect the amount of time spent by police providing general assistance to the public, participating in crime prevention programs, or enforcing traffic laws.

APPENDIX B FOOTNOTES

[1] Population figures also include First Nations Reserve populations.

[2] Provincial parks are located within the policing jurisdictions of North Vancouver Prov and Ridge Meadows Prov. The crime rates for both of these policing jurisdictions are inflated due to small residential populations and the relatively large amount of property crimes occurring within these parks.

[3] The theft and motor vehicle theft data shown are based on data contained in the Vancouver Police Department's "Monthly Activity Report" and on data supplied by the Vancouver Police Department's Special Support Unit.

APPENDIX B DATA QUALIFIERS

1. The offence data contained in Appendix B have been recorded by the police according to the Uniform Crime Reporting (UCR) Survey crime scoring rules (see section "Overview of Crime Data Collection Procedures in British Columbia" in this report for a detailed explanation of these rules).

2. The crime rate is defined as the number of Criminal Code offences (excluding traffic offences) per 1,000 population. Population figures are estimates based on the results of the 1996 Canada Census. These figures reflect the "resident" population of a jurisdiction and exclude commuters, students, tourists and other part-time residents. Municipal crime rates do not necessarily reflect the relative safety of one municipality over another. More often than not, a high crime rate indicates that a municipality is a core city or tourist destination. Core cities are usually surrounded by unincorporated areas or other municipalities that have large residential populations. Core cities are also the business and entertainment centres for many people who reside outside, as well as inside, the municipality. Core cities may also have a large "part-time" population relative to the resident population. Part-time residents include tourists, cottage or chalet owners, students and seasonal staff. If core cities expanded their boundaries to include residential areas outside their borders, the crime rate for the combined populated area would be considerably lower than the municipality itself. Similarly, if tourist destinations included part-time residents in their population base, their crime rates would be substantially lower.

3. The police strength for municipal force jurisdictions (Mun) represents the number of sworn members assigned to a detachment or municipal department but does not include civilian members, support staff and bylaw enforcement officers. The police strength for provincial force jurisdictions (Prov) represents the number of police assigned to general duty and general investigation functions but does not include police assigned to specialized functions such as highway patrol or forensic identification.

4. The British Columbia total includes additional reporting from Canadian National Railway Police, Canadian Pacific Railway Police and other specialized units.

Footnotes and Data Qualifiers for this report appear on page 143

APPENDIX C FOOTNOTES

[1] The crime data shown for 1990 include estimates for the City of Vancouver. These estimates cover the reporting period of June to December 1990 and are based on the Vancouver Police Department's "Monthly Activity Report" dated January 14, 1992. The crime data shown for 1994 include estimates for the Cities of Vancouver and Victoria. The estimates for Vancouver cover the reporting period of July to December 1994 and are based on the Vancouver Police Department's 1993 reporting under the UCR Incident-Based Survey. The estimates for Victoria cover the entire reporting year and are based on the Victoria Police Department's 1993 reporting under the UCR Survey. The crime data shown for 1995 include estimates for the City of Vancouver. These estimates cover the reporting periods of August and October 1995 and are based on the Vancouver Police Department's "Monthly Activity Reports" for each month.

[2] In 1993, revised reporting procedures related to level 2 assault and assault unlawfully causing bodily harm were instituted. Consequently, from 1993 onward, level 2 assault offences increased while assault unlawfully causing bodily harm offences decreased.

[3] The theft and motor vehicle theft data shown for 1995 to 1999 are based on data contained in the Vancouver Police Department's "Monthly Activity Reports" and on data provided by the Vancouver Police Department's Special Support Unit.

[4] In 1995, the Vancouver Police Department (VPD) revised their reporting practices for offences in which property damage to motor vehicles occurred. Prior to 1995, these offences were reported as mischief and property damage. Subsequent to the revision in reporting practices, the VPD began reporting these offences as theft from motor vehicle offences. As a result of this change, in 1995 the number of mischief and property damage offences decreased and the number of theft from motor vehicle offences increased.

[5] Theft offences are classified according to the value of the goods stolen. Theft offences are divided into over and under $5,000 categories. The data shown are the total of these categories. Prior to 1995, theft offences were divided into over and under $1,000 categories.

[6] The incidence of prostitution offences is highly sensitive to changes in police enforcement practices and it is this factor that largely contributes to any increase or decrease in these offences.

[7] In 1990, revisions to arson legislation expanded the definition of arson offences to include setting fire to abandoned cars or waste receptacles. Previously, these offences were reported as mischief offences. As a result of the expanded definition of arson, these offences increased from 1990 onward.

[8] From 1991 to 1993 and in 1999, RCMP Commercial Crime Sections incorrectly reported counterfeit currency offences. As a result, estimates of RCMP Commercial Crime counterfeit currency data for these reporting periods are included in the figures shown.

[9] Mischief and property damage offences are classified according to the value of damage done to property. Mischief and property damage offences are divided into over and under $5,000 categories. The data shown are the total of these categories. Prior to 1995, mischief and property damage offences were divided into over and under $1,000 categories.

[10] OCC: Other offences include Criminal Code offences not covered by a specific UCR offence category (e.g., breach of probation, extortion, computer/data mischief, uttering threats, criminal harassment, etc.).

[11] The other drugs data shown for 1990 and 1991 contain estimates for the City of Vancouver. These estimates are based on the Vancouver Police Department's 1992 and 1993 reporting under the UCR Incident-Based Survey.

[12] The cannabis data shown for 1990, 1991, and 1992 contain estimates for the City of Vancouver. The estimates for 1990 and 1991 cover the entire year and are based on data provided by the Vancouver Police Department's Drug Enforcement Section. The estimates for 1992 also cover the entire year but are based on the Vancouver Police Department's "Monthly Activity Report" dated January 8, 1993.

[13] In June 1997, the Controlled Drugs and Substances Act (CDSA) came into effect. The CDSA consolidates the Narcotic Control Act (NCA) and Parts III and IV, and Schedules F, G, and H of the Food and Drugs Act (FDA). Prior to the proclamation of the CDSA, drug offences were reported on the basis of six drug categories: heroin, cocaine, cannabis, other drugs, controlled drugs and restricted drugs. Under the CDSA there are now four categories of drug offences: heroin, cocaine, cannabis and other CDSA drugs. Generally speaking, the other CDSA drug category contains those drugs previously included in the controlled, restricted, and other drug categories. The consolidation of illicit drugs into the new categories provided by the CDSA did not commence until mid-1997. As such, 1997 is a transition year in the reporting of drug offences. The 1997 data contain approximately half a year of data reported under the drug categories provided by the NCA/FDA and half a year of reporting under the new CDSA drug categories. Consequently, data anomalies are apparent in the other drug, controlled drug and restricted drug categories.

[14] The incidence of non-drug offences under federal statutes is highly sensitive to changes in police enforcement practices and it is this factor that largely contributes to any increase or decrease in these offences.

[15] In 1986, the provincial government introduced new summary ticketing procedures for a wide variety of provincial statute offences. As a result, provincial statute offences, particularly offences under the Liquor Control and Licensing Act, increased. It should be noted, however, that any increases or decreases in Liquor Control and Licensing Act offences from 1990 onward are directly attributable to policy and enforcement changes relating to incidents of public drunkenness rather than actual increases or increases in the incidence of this type of offence.

[16] In 1990, the City of Richmond incorrectly reported municipal bylaw parking violations by including them in the municipal bylaw non-traffic category. As a result, estimates of Richmond municipal bylaw data for this reporting period are included in the figures shown.

APPENDIX C FOOTNOTES CONTINUED

[17] The traffic data shown for 1990, 1991, 1994 and 1995 contain estimates for the City of Vancouver. The estimates cover all of 1991 and the last six months of 1990 and are based on the Vancouver Police Department's "Monthly Activity Report" dated January 14, 1992. The estimates for 1994 cover the last six months of 1994 and are based on the Vancouver Police Department's 1993 reporting under the UCR Incident-Based Survey. The estimates for 1995 cover the reporting periods of August and October 1995 and are based on the Vancouver Police Department's "Monthly Activity Report" for each month.

[18] From 1990 to 1991, the City of Vancouver reported the majority of their "fail to stop or remain" incidents as Criminal Code traffic offences. From 1992 onward, they discontinued this practice and reported the majority of these incidents as provincial statute traffic offences. Consequently, there was a decrease in the number of Criminal Code "fail to stop or remain" offences between 1991 and 1992.

[19] In December 1998, the Firearms Act came into effect. As a result, a new federal statute offence category called the Firearms Act was added to the UCR Survey. This category covered all non–Criminal Code weapons offences reported under the new legislation. As a result of the new legislation, the descriptions and contents of the UCR offence categories relating to Criminal Code weapons offences were changed. In 1999 offensive weapons data have been collected under the new categories of firearms usage, weapons possession and trafficking, and other weapons offences.

APPENDIX C DATA QUALIFIERS

1. The offence, clearance, and persons charged data contained in Appendices C1 to C7 have been recorded by the police according to the Uniform Crime Reporting (UCR) Survey crime scoring rules (see section "Overview of Crime Data Collection Procedures in British Columbia" in this report for a detailed explanation of these rules).

2. The offence data contained in Appendix C8 have been recorded by the police according to the Uniform Crime Reporting (UCR) Survey traffic scoring rules. If a single criminal traffic incident contains a number of violations of the law, only the most serious one is recorded for UCR purposes (MSO Rule). The only exception to the MSO Rule is in incidents where an offender is charged with impaired operation and failure to provide either a breath or blood sample. In this situation both offences would be scored and cleared by charge, but only the more serious offence of impaired operation would reflect persons charged data.

3. The number of traffic offences represents only those traffic offences reported to or discovered by police which, upon preliminary investigation, have been deemed to have occurred or been attempted. These data do not represent or imply a count of the number of charges laid, prosecutions conducted, informations sworn or convictions obtained. Parking violations are not included in any of the offence categories contained in Appendix C8.

4. The crime rate is defined as the number of Criminal Code offences (excluding traffic offences) per 1,000 population. Population figures are estimates based on the results of the 1996 Canada Census. These figures reflect the "resident" population of a jurisdiction and exclude commuters, students, tourists and other part-time residents. Municipal crime rates do not necessarily reflect the relative safety of one municipality over another. More often than not, a high crime rate indicates that a municipality is a core city or tourist destination. Core cities are usually surrounded by unincorporated areas or other municipalities that have large residential populations. Core cities are also the business and entertainment centres for many people who reside outside, as well as inside, the municipality. Core cities may also have a large "part-time" population relative to the resident population. Part-time residents include tourists, cottage or chalet owner, students and seasonal staff. If core cities expanded their boundaries to include residential areas outside their borders, the crime rate for the combined populated area would be considerably lower than the municipality itself. Similarly, if tourist destinations included part-time residents in their population base, their crime rates would be substantially lower.

5. The number of offences cleared represents the number of offences solved by the police. Offences are cleared by charge when the police file a Report to Crown Counsel (RCC) recommending charges. This does not necessarily imply the swearing of an information or prosecution as Crown may return the case to police due to insufficient evidence or take no further action. Offences are cleared otherwise when the police have identified an offender and have enough evidence to support a charge, but do not recommend charges. Offences are cleared otherwise in specific situations, such as, the offender was under 12 years of age, the victim was uncooperative, the offender had diplomatic immunity, or the offender was previously sentenced for similar crimes.

6. The clearance rate is defined as the number of offences solved by police as a percentage of the number of offences reported by police. Caution should be used in the interpretation of clearance rates because the number of offences reported and the number of offences cleared within the same calendar year are not necessarily linked. Offences may be cleared or considered solved many months or even years after they are reported to police. Consequently, within the same reporting year, it is possible that the number of cleared offences exceeds the actual number of offences, resulting in clearance rates of over 100%.

7. The number of persons charged represents the number of people for whom the police have filed a Report to Crown Counsel (RCC) alleging responsibility for an offence. An RCC does not necessarily imply the swearing of an information, or the prosecution or conviction of an individual as the Crown may return the case to police due to insufficient evidence, take no further action, approve diversion or alternative measures, or in the case of young offenders (youths), issue a letter of caution. Under the provisions of the Young Offenders Act, a young offender is defined as any individual under 18 years and over 11 years of age.

APPENDIX D FOOTNOTES

[1] In 1995, the municipalities of Abbotsford and Matsqui were amalgamated. As a result, the Abbotsford Municipal RCMP detachment and the Matsqui Police Department were formed into an independent police force called the Abbotsford Police Department. Data shown for previous years combine both jurisdictions.

[2] The following provincial policing jurisdictions have either been closed or opened as a result of RCMP detachment restructures. In 1992, the Cassiar detachment was closed and the Dease Lake detachment assumed policing responsibilities for the area. In 1995, as a result of Mackenzie detachment being restructured, Tsay Keh Dene detachment was opened. In 1997, the Field detachment was closed and the Golden detachment assumed policing responsibilities for the area.

[3] In 1997, according to the 1996 Canada Census, the population of the municipality of Fernie dropped below 5,000 persons and Fernie reverted to a provincial policing jurisdiction.

[4] The Police Act and Municipal Act state that when the population of a municipality reaches 5,000 persons according to the Canada Census, it must assume responsibility for its police services. These municipalities may form their own independent police forces or contract with the RCMP for municipal police services. In 1992, the municipalities of Sechelt and View Royal became responsible for their police services. In 1993, the municipality of Qualicum Beach became responsible for its police services. In 1994, the municipalities of Smithers and Langford became responsible for their police services. In 1997, the municipalities of Spallumcheen, Lake Country, Hope, Whistler and Ladysmith became responsible for their police services. All of these municipalities contracted with the RCMP for their municipal police services.

[5] From 1990 to 1994, data for North Vancouver provincial detachment were included in Bowen Island provincial detachment.

[6] The crime data shown for 1990, 1994 and 1995 include estimates for the City of Vancouver. The 1990 estimates cover the reporting period of June to December 1990 and are based on the Vancouver Police Department's "Monthly Activity Report" dated January 14, 1992. The 1994 estimates cover the reporting period of July to December 1994 and are based on the Department's 1993 reporting under the UCR Incident-Based Survey. The 1995 estimates cover the reporting periods of August and October 1995, and are based on the Department's "Monthly Activity Reports" for each month.

[7] The crime data shown for 1994 include estimates for the City of Victoria. These estimates cover the entire reporting year and are based on the Victoria Police Department's 1993 reporting under the UCR Survey.

[8] Provincial parks are located within the policing jurisdictions of North Vancouver Prov and Ridge Meadows Prov. The crime rates for both of these policing jurisdictions are inflated due to small residential populations and the relatively large amount of property crimes occurring within these parks.

[9] The theft and motor vehicle theft data shown for 1995 to 1999 are based on data contained in the Vancouver Police Department's "Monthly Activity Reports" and on data supplied by the Vancouver Police Department's Special Support Unit.

[10] In 1995, the Vancouver Police Department (VPD) revised their reporting practices for offences in which property damage to motor vehicles occurred. Prior to 1995, these offences were reported as mischief and property damage. Subsequent to the revision in reporting practices, the VPD began reporting these offences as theft from motor vehicle offences. In 1995, as a result of this change, the number of mischief and property damage offences decreased and the number of theft from motor vehicle offences increased.

[11] Population figures also include First Nations Reserve populations.

APPENDIX D DATA QUALIFIERS

1. The offence data contained in Appendices D1 to D13 have been recorded by the police according to the Uniform Crime Reporting (UCR) Survey crime scoring rules (see section "Overview of Crime Data Collection Procedures in British Columbia" in this report for a detailed explanation of these rules).

2. The crime rate is defined as the number of Criminal Code offences (excluding traffic offences) per 1,000 population. Population figures are based on the results of Canada Census, which is conducted every five years. Canada Census occurred in 1986, 1991, and 1996; population figures for intervening years are estimates based on Census data. These figures reflect the "resident" population of a jurisdiction and exclude commuters, students, tourists and other part-time residents. Municipal crime rates do not necessarily reflect the relative safety of one municipality over another. More often than not, a high crime rate indicates that a municipality is a core city or tourist destination. Core cities are also the business and entertainment centres for many people who reside outside, as well as inside, the municipality. Core cities may also have a large "part-time" population relative to the resident population. Part-time residents include tourists, cottage or chalet owners, students and seasonal staff. If core cities expanded their boundaries to include residential areas outside their borders, the crime rate for the combined populated area would be considerably lower than the municipality itself. Similarly, if tourist destinations included part-time residents in their population base, their crime rates would be substantially lower.

3. The number of sexual offences includes level 1 sexual assault (least amount of bodily harm), level 2 sexual assault (involving bodily harm/weapon), level 3 sexual assault (aggravated), and other sexual offences including sexual interference, invitation to sexual touching, sexual exploitation and incest.

4. The number of assaults (non-sexual) includes level 1 assault (least amount of bodily harm), level 2 assault (involving bodily harm/weapon), level 3 assault (aggravated), unlawful bodily harm, shoot with intent, assault police, assault other officer and other assaults including poisoning and torture.

APPENDIX D DATA QUALIFIERS CONTINUED

5. The number of break and enter offences includes break and enter (business premises), break and enter (residence), and other break and enter offences including breaking into trains, box-cars, unattached trailers and storage lockers.

6. The number of motor vehicle thefts includes thefts of automobiles, trucks, motorcycles, and other motor vehicles including motorized snow vehicles, and self-propelled farming and construction implements.

7. The number of thefts includes bicycle theft, theft from motor vehicle, shoplifting and other theft. Thefts are divided into over and under $5,000 categories. Prior to 1995, theft offences were divided into over and under $1,000 categories.

8. The number of mischief and property damage offences (vandalism) includes mischief and property damage over $5,000, and mischief and property damage under $5,000. Prior to 1995 mischief and property damage offences were divided into over and under $1,000 categories.

9. The B.C. total includes additional reporting from Canadian National Railway Police, Canadian Pacific Railway Police and other specialized units.

APPENDIX E-1 AND E-2 FOOTNOTES

[1] The number of incidents where there are two offenders represents those incidents reported to police in which both parties of a spousal or intimate relationship assaulted each other. These incidents are not contained in either of the male offender or female offender categories.

[2] Detailed spousal assault data are not available for Vancouver, Victoria and Esquimalt. As a result, the data shown contain estimates for these three municipalities. The estimates for Vancouver have been calculated based on the combined incident data and incident rates (number of incidents per resident population) of the following jurisdictions: Burnaby, Coquitlam, New Westminster, North Vancouver, Port Coquitlam, Richmond, Surrey and West Vancouver. The estimates for Victoria and Esquimalt have been calculated based on the combined incident data and incident rates of the following jurisdictions: Delta, Abbotsford, Port Moody and West Vancouver.

APPENDIX E-1 AND E-2 DATA QUALIFIERS

1. The number of spousal assaults represents the number of Criminal Code incidents that contain supplementary information indicating that a spousal assault has occurred. This number does not count the number of different victims of spousal assault. For example, if the same person is a victim of spousal assault at different times, this would be recorded in separate incidents and, in effect, the same victim would be counted more than once.

2. The data on spousal assault incidents are retrieved from the PIRS/OSR Master Detail File sent to Police Services Division from RCMP Headquarters in Ottawa. The Master Detail File contains data from all RCMP reporting jurisdictions, including the nine independent municipal departments (Central Saanich, Delta, Abbotsford, Nelson, New Westminster, Oak Bay, Port Moody, Saanich and West Vancouver) that utilize the PIRS/OSR system. Data for the remaining three independent municipal jurisdictions (Vancouver, Victoria and Esquimalt) are estimated (see footnote 2).

3. Spousal assault incidents include any offence that occurs as a direct result of a spousal relationship, including assaults that result from an ongoing marriage or common-law relationship or assaults that result after subjects are separated or divorced. Spousal relationships include marriages, common-law marriages, same-sex relationships, and intimate partners.

4. The offence, clearance and persons charged data contained in Appendices E1 and E2 have been recorded by the police according to the Uniform Crime Reporting (UCR) Survey crime scoring rules (see section "Overview of Crime Data Collection Procedures in British Columbia" in this report for a detailed explanation of these rules).

5. The number of offences cleared by charge represents the number of offences where police have filed a Report to Crown Counsel (RCC) recommending charges. This does not necessarily imply the swearing of an information or prosecution as Crown may return the case to police due to insufficient evidence or take no further action.

6. The number of persons charged represents the number of people for whom the police have filed a Report to Crown Counsel (RCC) alleging responsibility for an offence. An RCC does not necessarily imply the swearing of an information, or the prosecution or conviction of an individual as Crown may return the case to police due to insufficient evidence or take no further action.

7. The number of convictions represents the number of people who have either plead guilty or been found, beyond a reasonable doubt, to be guilty of the charges.

Footnotes and Data Qualifiers for this report appear on page 204

APPENDIX E-3 FOOTNOTES

[1] In 1995, the municipalities of Abbotsford and Matsqui were amalgamated. As a result, the Abbotsford Municipal RCMP detachment and the Matsqui Police Department were formed into an independent police force called the Abbotsford Police Department. Data shown for 1994 combines both jurisdictions.

[2] Detailed spousal assault data are not available for Vancouver, Victoria and Esquimalt. As a result, the data shown contain estimates for these three municipalities. The estimates for Vancouver have been calculated based on the combined incident data and incident rates (number of incidents per resident population) of the following jurisdictions: Burnaby, Coquitlam, New Westminster, North Vancouver, Port Coquitlam, Richmond, Surrey and West Vancouver. The estimates for Victoria and Esquimalt have been calculated based on the combined incident data and incident rates of the following jurisdictions: Delta, Abbotsford, Port Moody and West Vancouver.

[3] In 1997, according to the 1996 Canada Census, the population of the municipality of Fernie dropped below 5,000 persons and Fernie reverted to a provincial policing jurisdiction.

[4] The following provincial policing jurisdictions have been closed or opened as a result of RCMP detachment restructures. In 1995, as a result of Mackenzie detachment being restructured, Tsay Keh Dene detachment was opened. In 1997, the Field detachment was closed and the Golden detachment assumed policing responsibilities for the area.

[5] The Police Act and Municipal Act state that when the population of a municipality reaches 5,000 persons according to the Canada Census, it must assume responsibility for its police services. These municipalities may form their own independent police forces or contract with the RCMP for municipal police services. In 1997, the municipalities of Spallumcheen, Lake Country, Hope, Whistler and Ladysmith became responsible for their police services. All of these municipalities contracted with the RCMP for their municipal police services.

[6] The number of incidents where there are two offenders represents those incidents reported to police in which both parties of a spousal or intimate relationship assaulted each other. These incidents are not contained in either of the male offender or female offender categories.

APPENDIX E-3 DATA QUALIFIERS

1. The number of spousal assaults represents the number of Criminal Code incidents that contain supplementary information indicating that a spousal assault has occurred. This number does not count the number of different victims of spousal assault. For example, if the same person is a victim of spousal assault at different times, this would be recorded in separate incidents and, in effect, the same victim would be counted more than once.

2. The data on spousal assault incidents are retrieved from the PIRS/OSR Master Detail File sent to Police Services Division from RCMP Headquarters in Ottawa. The Master Detail File contains data from all RCMP reporting jurisdictions, including the nine independent municipal departments (Central Saanich, Delta, Abbotsford, Nelson, New Westminster, Oak Bay, Port Moody, Saanich and West Vancouver) that utilize the PIRS/OSR system. Data for the remaining three independent municipal jurisdictions (Vancouver, Victoria and Esquimalt) are estimated (see footnote 2).

3. Spousal assault incidents include any offence that occurs as a direct result of a spousal relationship including assaults that result from an ongoing marriage or common-law relationship or assaults that result after subjects are separated or divorced. Spousal relationships include marriages, common-law marriages, same-sex relationships, and intimate partners.

FOOTNOTE

[1] Federal drug offence categories cover drugs, salts and derivatives of substances described by the SCHEDULES attached to the Controlled Drugs and Substances Act, which replaced the Narcotic Control Act and Sections III and IV of the Food and Drugs Act on May 14, 1997.
